The Black Report

A. Resources available for services (1980/81 to 1985/6)	20
1. Death rates by sex and social class	49
2. Regional variations in mortality	50
3. Mortality by country of birth and occupational class	51
4. Mortality by tenure and class	52
5. Comparison of distribution of standardized patient consultation ratios and standardized mortality ratios	54
6. Sickness and medical consultation in early adulthood	55
7. Mortality of men by occupational class	59
8. Mortality rates per 100,000 and as percentage of rates for occupational classes I and II	60
9. Mortality of women by occupational class	62
10. Trends in infant mortality by occupational class	63
11. Working males absent from work owing to illness or injury	64
12. Rates of long-standing and acute illness and consultations of occupational classes IV and V, as a percentage of class I	65
13. 'Use/need ratios' by social group	69
14. Morbidity and GP attendance indicators for socio-economic groups	70
15. Hospital standardized discharge ratios and standardized bed-day ratios by occupational class	73
16. Late ante-natal booking	74
17. Use of health services by children under 7 by occupational class of father	75
18. Percentage of old persons of different occupational class who receive or feel the need for chiropody treatment	75
19. Percentage of old persons of different occupational class who were receiving public or private domestic help, or who said help was needed	76
20. Perinatal and infant mortality in Europe	83
21. Adult mortality in Europe	84
22. Mortality rates under 1 year per 1,000 live births, for selected causes (Sweden, and England and Wales)	86
23. Physicians, nurses and hospital beds in Europe	87
24. Regional variations in number of physicians	88
25. Denmark: neonatal mortality rate by occupation	89
26. Finland: age-adjusted mortality indices by social group	90

27. France: rates of infant, neonatal and post-neonatal death by socio-professional group of father	90
28. France 1968: mortality rates among economically active men	91
29. West Germany 1974: infant mortality and early neonatal mortality rates, by <i>Land</i>	93
30. Netherlands 1971: age-standardized adult mortality	94
31. Norway 1975: morbidity by age and income	95
32. Numbers of persons in poverty and on the margins of poverty	108
33. Household food consumption by income group	111
34. Cigarette-smoking by socio-economic group	111
35. Active leisure pursuits by males	112
36. Causes of death from accidents of children	117
37. Planned and recommended revenue expenditure on selected services	137
38. Highest-ranking local authority areas on each of eight 1971 census and mortality indicators	141
39. Evidence of capacity of elderly residents in homes for self-care	150
40. Desire for day provisions for under-5s by occupational class	173
41. Numbers and percentage of total and disabled population living in poverty or on the margins of poverty	184
42. Mortality by occupation unit	186

The Health Divide

A. Resources available for services	20
1. SMRs for select causes of death, 1979-83	231
2. Mortality of men and women by housing tenure, education and access to cars	237
3. Mortality of males in selected clusters by housing tenure	238
4. Mortality of men and women in different regions of Britain, 1979-83	246
5. SMRs for all causes by region and occupational class, 1979-83	247
6. Deprivation and ill-health. Small area analyses	249
7. Summary of main findings of Immigrant Mortality Study	251
8. Infant mortality by occupational class, 1975-84	259
9. Mortality from all causes in selected countries, 1983	275
10. Denmark: neonatal mortality, 1974 and 1977	278
11. Prevalence of cigarette-smoking by sex and socio-economic group, 1972-84	290
12. Prevalence of cigarette-smoking by region, 1984	291
13. Food consumption by income group, 1976 and 1984	293
14. Exercise in leisure-time by socio-economic group, 1977 and 1984	294
15. Relative risk of CHD death, controlled for risk factors	295
16. A comparison of the social indicators used in five area-based studies	310
17. Children in or on the margin of poverty, 1979 and 1983	334
18. Changes in the extent of poverty in Great Britain, 1979, 1981, 1983	334
