Contents

1. Introduction, 3

Organizational Populations Studied, 6
Analytic Strategy, 12
Relation to Other Theory and Research, 20
The Plan of This Book, 23

2. Theoretical Approach, 25

Competition Processes, 26
Legitimation Processes, 33
Density, Competition, and Legitimation, 37
Density Dependence in Vital Rates, 44
Reversibility of Processes, 47
Conclusion, 48

3. Models and Modeling Strategy, 50

Classical Models of Population Growth, 51
Relating Vital Rates to Legitimation and Competition, 54
Density Dependence in Founding Rates, 60
Density Dependence in Mortality Rates, 65
Interpretations of Density Dependence, 67

4. Density and Founding Rates, 75

Prior Research, 76
Methodological Issues, 78
Generalized-Yule and Log-Quadratic Models, 83
Logistic and Gompertz Models, 86
Theoretical Implications, 90

5. Interactions Between Subpopulations, 98

Multi-Population Models, 99
Empirical Results, 101

6. Density and Organizational Mortality, 116

Prior Research, 119
Results, 121
Controls for Size and Total Mass, 127
Implications of Unobserved Heterogeneity, 131
Theoretical Implications, 138

7. Complications, 143

Levels of Analysis, 145
Apparent Reversals, 156
Left-truncated Observation Schemes, 163

8. Population Trajectories, 168

Simulation Methods, 170
Simulating Historical Trajectories, 174
Density Dependence, 179
Discussion, 185

9. Implications for Social Organization, 188

Extending the Theory, 190
Issues of Microfoundations, 194
Applications to Other Types of Problems, 200

Appendix A: Designs of Empirical Studies, 207

Labor Unions, 209
Newspapers and Newspaper Publishers, 215
Brewing Firms, 220
Banks, 224
Life Insurance Companies, 228

Appendix B: Methods of Analysis, 232

Event Data and Stochastic Models of Vital Rates , 232
Analysis of Organizational Founding Rates , 235
Analysis of Rates of Organizational Mortality , 244

Appendix C: Simulation Program, 248

References, 261
Name Index, 279
Subject Index, 283
