## PREFACE xv

### Chapter 1 INTRODUCTION 1

<b>1.1 Dominance of the Problem</b>	<b>2</b>
<b>1.2 Quantitative Analysis and the Decision-Making Process</b>	<b>3</b>
<b>1.3 The Quantitative Analysis Process</b>	<b>6</b>
Problem Definition	6
Model Development	6
Data Preparation	9
Model Solution	10
Report Generation	11
<b>1.4 Implementation</b>	<b>12</b>
<b>1.5 Models of Cost, Revenue, and Profit</b>	<b>13</b>
Cost and Volume Models	13
Revenue and Volume Models	14
Profit and Volume Models	14
Break-Even Analysis	14
<b>1.6 A Microcomputer Software Package</b>	<b>15</b>
Top Level Menu	16
Opening Menu	17
Data Input	17
Data Editing	17
Saving, Retrieving, and/or Deleting Problems	17
Solution and Output Information	18
Further Advice about Data Input	18
SUMMARY	19
GLOSSARY	19
PROBLEMS	20
Introduction to Chapter-Ending Quantitative Methods in Practice	24
Quantitative Methods in Practice: Mead Corporation	25

### Chapter 2 INTRODUCTION TO PROBABILITY 28

<b>2.1 Experiments and Sample Space</b>	<b>29</b>
<b>2.2 Assigning Probabilities to Experimental Outcomes</b>	<b>30</b>

Classical Method	30
Relative Frequency Method	31
Subjective Method	31
<b>2.3 Events and Their Probabilities</b>	<b>32</b>
<b>2.4 Some Basic Relationships of Probability</b>	<b>33</b>
Complement of an Event	33
Addition Law	34
Conditional Probability	37
Multiplication Law	40
<b>2.5 Bayes' Theorem</b>	<b>41</b>
Tabular Approach	43
SUMMARY	45
GLOSSARY	46
PROBLEMS	47
Quantitative Methods in Practice: Morton Thiokol, Inc.	54
<b>Chapter 3 PROBABILITY DISTRIBUTIONS</b>	<b>57</b>
<b>3.1 Random Variables</b>	<b>57</b>
<b>3.2 Discrete Random Variables</b>	<b>58</b>
The Probability Distribution of a Discrete Random Variable	59
Expected Value	61
Variance	62
<b>3.3 The Binomial Distribution</b>	<b>63</b>
The Nastke Clothing Store Problem	64
The Expected Value and Variance for the Binomial Probability Distribution	67
<b>3.4 The Poisson Distribution</b>	<b>68</b>
An Example Involving Time Intervals	68
An Example Involving Length or Distance Intervals	70
<b>3.5 Continuous Random Variables</b>	<b>70</b>
An Example Using the Uniform Distribution	70
Area as a Measure of Probability	72
<b>3.6 The Normal Distribution</b>	<b>73</b>
The Standard Normal Distribution	74
Computing Probabilities for Any Normal Distribution by Converting to the Standard Normal Distribution	79
The Grear Tire Company Problem	80
<b>3.7 The Exponential Distribution</b>	<b>82</b>
Relationship between the Poisson and Exponential Distributions	84
SUMMARY	84
GLOSSARY	84
PROBLEMS	85
Quantitative Methods in Practice: Burroughs Corporation	93
<b>Chapter 4 DECISION ANALYSIS</b>	<b>96</b>
<b>4.1 Structuring the Decision Problem</b>	<b>97</b>
Payoff Tables	98
Decision Trees	98

<b>4.2 Decision Making without Probabilities</b>	<b>99</b>
Optimistic Approach	99
Conservative Approach	100
Minimax Regret Approach	101
<b>4.3 Decision Making with Probabilities</b>	<b>102</b>
<b>4.4 Sensitivity Analysis</b>	<b>104</b>
<b>4.5 Expected Value of Perfect Information</b>	<b>107</b>
<b>4.6 Decision Analysis with Sample Information</b>	<b>109</b>
<b>4.7 Developing a Decision Strategy</b>	<b>111</b>
Computing Branch Probabilities	111
Computing Branch Probabilities: A Tabular Procedure	114
An Optimal Decision Strategy	116
<b>4.8 Expected Value of Sample Information</b>	<b>118</b>
Efficiency of Sample Information	119
<b>4.9 Decision Analysis Involving Numerous Decision Alternatives and Numerous States of Nature</b>	<b>120</b>
SUMMARY	126
GLOSSARY	126
PROBLEMS	127
Case Problem: Property Purchase Strategy	142
Quantitative Methods in Practice: Ohio Edison Company	144
<b>Chapter 5 UTILITY AND DECISION MAKING</b>	<b>148</b>
<b>5.1 The Meaning of Utility</b>	<b>149</b>
<b>5.2 Developing Utilities for Monetary Payoffs</b>	<b>150</b>
The Expected Utility Approach	153
<b>5.3 Summary of Steps for Determining the Utility of Money</b>	<b>155</b>
<b>5.4 Risk Avoiders versus Risk Takers</b>	<b>155</b>
<b>5.5 Expected Value versus Expected Utility as an Approach to Decision Making</b>	<b>159</b>
SUMMARY	160
GLOSSARY	161
PROBLEMS	161
<b>Chapter 6 FORECASTING</b>	<b>167</b>
<b>6.1 The Components of a Time Series</b>	<b>168</b>
Trend Component	168
Cyclical Component	169
Seasonal Component	170
Irregular Component	171
<b>6.2 Forecasting Using Smoothing Methods</b>	<b>171</b>
Moving Averages	171
Weighted Moving Averages	175
Exponential Smoothing	175
<b>6.3 Forecasting a Time Series Using Trend Projection</b>	<b>180</b>
Trend Projections	184
<b>6.4 Forecasting a Time Series with Trend and Seasonal Components</b>	<b>184</b>
Calculating the Seasonal Indexes	186

Deseasonalizing the Time Series	190	
Using the Deseasonalized Time Series to Identify Trend	191	
Seasonal Adjustments	193	
Models Based on Monthly Data	193	
Cyclical Component	193	
<b>6.5 Forecasting Using Regression Models</b>	194	
<b>6.6 Qualitative Approaches to Forecasting</b>	199	
SUMMARY	200	
GLOSSARY	200	
PROBLEMS	201	
Case Problem: Forecasting Sales	210	
<b>Quantitative Methods in Practice: The Cincinnati Gas &amp; Electric Company</b>		212
<b>Chapter 7 LINEAR PROGRAMMING: THE GRAPHICAL METHOD</b>		215
<b>7.1 A Simple Maximization Problem</b>	216	
<b>7.2 The Objective Function</b>	217	
<b>7.3 The Constraints</b>	218	
<b>7.4 The Mathematical Statement of the RMC Problem</b>	219	
<b>7.5 Graphical Solution</b>	220	
A Note on Graphing Lines	231	
Summary of the Graphical Solution Procedure for Maximization Problems		232
Slack Variables	233	
<b>7.6 Extreme Points and the Optimal Solution</b>	235	
Alternate Optimal Solutions	237	
<b>7.7 A Simple Minimization Problem</b>	238	
Summary of the Graphical Solution Procedure for Minimization Problems		240
Surplus Variables	241	
<b>7.8 Infeasibility and Unboundedness</b>	243	
Infeasibility	243	
Unboundedness	244	
SUMMARY	245	
GLOSSARY	246	
PROBLEMS	247	
Case Problem: Advertising Strategy	259	
<b>Chapter 8 LINEAR PROGRAMMING: SENSITIVITY ANALYSIS AND COMPUTER SOLUTION</b>		261
<b>8.1 Introduction to Sensitivity Analysis</b>	261	
<b>8.2 Graphical Sensitivity Analysis</b>	263	
Objective Function Coefficients	263	
Right-Hand Sides	268	
Cautionary Note on Interpretation of Shadow Prices		269
Coefficients of the Constraints	270	
<b>8.3 Computer Solution using LINDO/PC: A Microcomputer Package</b>		270
Interpretation of Computer Output	272	
Interpretation of Computer Output—A Second Example		276
<b>8.4 More than Two Decision Variables</b>	279	
The Electronic Communications, Inc. Problem	279	

Formulation of the Electronic Communications, Inc. Problem	280
Computer Solution and Interpretation for Electronic Communications, Inc. Problem	281
SUMMARY	284
GLOSSARY	285
PROBLEMS	286
Case Problem: Product Mix	300

## **Chapter 9 LINEAR PROGRAMMING APPLICATIONS** 302

<b>9.1 Marketing Applications</b>	303
Media Selection	303
Marketing Research	305
<b>9.2 Financial Applications</b>	309
Portfolio Selection	309
Financial-Mix Strategy	313
<b>9.3 Production Management Applications</b>	317
Production Scheduling	317
Labor Planning	326
<b>9.4 Blending Problems</b>	329
SUMMARY	334
PROBLEMS	334
Case Problem: Environmental Protection	347
Quantitative Methods in Practice: Marathon Oil Company	350

## **Chapter 10 LINEAR PROGRAMMING: THE SIMPLEX METHOD** 352

<b>10.1 An Algebraic Overview of the Simplex Method</b>	352
Algebraic Properties of the Simplex Method	353
Determining a Basic Solution	353
Basic Feasible Solutions	354
<b>10.2 Tableau Form</b>	356
<b>10.3 Setting up the Initial Simplex Tableau</b>	357
<b>10.4 Improving the Solution</b>	359
<b>10.5 Calculating the Next Tableau</b>	363
Interpreting the Results of an Iteration	365
Moving toward a Better Solution	366
Interpreting the Optimal Solution	369
<b>10.6 Solution of a Sample Problem</b>	370
<b>10.7 Tableau Form: The General Case</b>	371
Greater-than-or-Equal-to Constraints	372
Equality Constraints	379
Eliminating Negative Right-Hand-Side Values	379
Summary of the Steps to Create Tableau Form	380
<b>10.8 Solving a Minimization Problem Using the Simplex Method</b>	382
<b>10.9 Special Cases</b>	385
Infeasibility	385
Unboundedness	386
Alternate Optimal Solutions	388
Degeneracy	390

<b>10.10 Sensitivity Analysis with the Simplex Tableau</b>	<b>390</b>
Objective Function Coefficients	390
Right-Hand Sides and Shadow Prices	395
Simultaneous Changes	401
SUMMARY	401
GLOSSARY	403
PROBLEMS	404

Quantitative Methods in Practice: Performance Analysis Corporation 416

**Chapter 11 TRANSPORTATION, ASSIGNMENT, AND TRANSSHIPMENT PROBLEMS 419**

<b>11.1 The Transportation Problem</b>	<b>420</b>
<b>11.2 The Transportation Problem: A Linear Programming Formulation</b>	<b>422</b>
Special Considerations	425
A General Linear Programming Formulation of the Transportation Problem	426
<b>11.3 The Transportation Problem: A Special-Purpose Solution Procedure</b>	<b>427</b>
Finding an Initial Feasible Solution: The Minimum-Cost Method	429
Summary of the Minimum-Cost Method	434
Moving to an Optimal Solution: The Stepping-Stone Method	435
Maintaining $m + n - 1$ Transportation Routes Using the Stepping-Stone Method	441
Modified Distribution (MODI) Method	443
Summary of the Special-Purpose Solution Procedure for the Transportation Problem	444
Handling Special Situations	445
Computer Solution	447
<b>11.4 The Assignment Problem</b>	<b>448</b>
<b>11.5 The Assignment Problem: A Linear Programming Formulation</b>	<b>450</b>
Handling Special Situations	452
A General Linear Programming Formulation of the Assignment Problem	453
Handling Multiple Assignments	453
<b>11.6 The Assignment Problem: A Special-Purpose Solution Procedure</b>	<b>454</b>
Finding the Minimum Number of Lines	457
Handling Special Situations	457
<b>11.7 The Transshipment Problem</b>	<b>460</b>
<b>11.8 The Transshipment Problem: A Linear Programming Formulation</b>	<b>462</b>
SUMMARY	465
GLOSSARY	465
PROBLEMS	466

Case Problem: Assigning Umpire Crews 481

Quantitative Methods in Practice: Optimal Decision Systems, Inc. 485

**Chapter 12 INTEGER LINEAR PROGRAMMING 488**

<b>12.1 Types of Integer Linear Programming Models</b>	<b>489</b>
<b>12.2 Graphical Solution</b>	<b>489</b>
<b>12.3 Applications of Integer Linear Programming</b>	<b>493</b>
Capital Budgeting	493
Multiple-Choice and Mutually Exclusive Constraints	495

<i>k</i> out of <i>n</i> Alternatives Constraint	496	
Conditional and Corequisite Constraints	496	
Cautionary Note on Sensitivity Analysis	497	
Distribution System Design	497	
<b>12.4 Computer Solution</b>	<b>499</b>	
A Bank-Location Application	500	
SUMMARY	503	
GLOSSARY	505	
PROBLEMS	505	
Case Problem: Textbook Publishing	513	
Quantitative Methods in Practice: Ketrion	515	
<b>Chapter 13 PROJECT MANAGEMENT: PERT/CPM</b>		<b>519</b>
<b>13.1 PERT/CPM Networks</b>	<b>520</b>	
<b>13.2 Project Scheduling with PERT/CPM</b>	<b>523</b>	
The Critical Path	525	
Contributions of PERT/CPM	529	
Summary of the PERT/CPM Critical Path Procedure	530	
<b>13.3 Project Scheduling with Uncertain Activity Times</b>		<b>531</b>
The Daugherty Porta-Vac Project	531	
Uncertain Activity Times	531	
The Critical Path	534	
Variability in the Project Completion Time	537	
<b>13.4 Considering Time–Cost Trade-offs</b>	<b>539</b>	
Crashing Activity Times	540	
A Linear Programming Model for Crashing Decisions	542	
<b>13.5 PERT/Cost</b>	<b>545</b>	
Planning and Scheduling Project Costs	545	
Controlling Project Costs	548	
SUMMARY	551	
GLOSSARY	552	
PROBLEMS	553	
Case Problem: Warehouse Expansion	569	
Quantitative Methods in Practice: Seasongood & Mayer	571	
<b>Chapter 14 INVENTORY MODELS</b>		<b>574</b>
<b>14.1 Economic Order Quantity (EOQ) Model</b>	<b>575</b>	
The How-Much-to-Order Decision	578	
The When-to-Order Decision	580	
Computer Models for Inventory Decisions	581	
Sensitivity Analysis in the EOQ Model	582	
The Manager’s Use of the EOQ Model	582	
How Has the EOQ Decision Model Helped?	583	
<b>14.2 Economic Production Lot Size Model</b>	<b>583</b>	
The Total Cost Model	585	
Finding the Economic Production Lot Size	587	
<b>14.3 An Inventory Model with Planned Shortages</b>	<b>587</b>	

<b>14.4 Quantity Discounts for the EOQ Model</b>	592	
<b>14.5 Order Quantity–Reorder Point Models with Probabilistic Demand</b>	594	
The How-Much-to-Order Decision	595	
The When-to-Order Decision	595	
<b>14.6 Single-Period Inventory Models</b>	597	
<b>14.7 Material Requirements Planning</b>	601	
Dependent Demand and the MRP Concept	601	
Information System for MRP	602	
MRP Calculations	604	
SUMMARY	607	
GLOSSARY	607	
PROBLEMS	609	
Case Problem: A Make-or-Buy Analysis	617	
Appendix 14.1 Development of the Optimal Order Quantity ( $Q^*$ ) Formula for the EOQ Model	619	
Appendix 14.2 Development of the Optimal Lot Size ( $Q^*$ ) for the Production Lot Size Model	619	
Quantitative Methods in Practice: Informatics General Corporation	621	
<b>Chapter 15 COMPUTER SIMULATION</b>	624	
<b>15.1 County Beverage Drive-Thru</b>	625	
Simulation of Customer Arrivals	627	
A Simulation Model for County Beverage Drive-Thru	629	
Computer Simulation: Generating Pseudorandom Numbers	632	
Computer Simulation: Computer Program and Results	632	
<b>15.2 County Beverage Drive-Thru: Additional Simulation Results</b>	637	
System A	638	
System B	638	
<b>15.3 Some Practical Considerations</b>	639	
Selecting a Simulation Language	639	
Validation	640	
Start-up Problems	640	
Statistical Considerations	641	
<b>15.4 An Inventory Simulation Model</b>	642	
<b>15.5 Advantages and Disadvantages of Computer Simulation</b>	648	
SUMMARY	649	
GLOSSARY	649	
PROBLEMS	650	
Case Problem: Machine Repair	661	
Quantitative Methods in Practice: Champion International Corporation	663	
<b>Chapter 16 WAITING-LINE MODELS</b>	666	
<b>16.1 The Schlips, Inc. Truck Dock Problem</b>	667	
The Single-Channel Waiting Line	667	
Arrival Distribution	667	
Service Time Distribution	670	
Queue Discipline	672	

<b>16.2 The Single-Channel Waiting-Line Model with Poisson Arrivals and Exponential Service Times</b>	<b>672</b>
Improving the Service Rate for Schips Truck Dock	674
<b>16.3 The Multiple-Channel Waiting-Line Model with Poisson Arrivals and Exponential Service Times</b>	<b>676</b>
<b>16.4 Economic Analysis of Waiting Lines</b>	<b>679</b>
<b>16.5 Other Waiting-Line Models</b>	<b>681</b>
<b>16.6 Simulation of Waiting Lines</b>	<b>682</b>
SUMMARY	683
GLOSSARY	683
PROBLEMS	684
Case Problem: Airline Reservations	689
<b>Quantitative Methods in Practice: Goodyear Tire &amp; Rubber Company</b>	<b>690</b>

## **Chapter 17 MULTICRITERIA DECISION PROBLEMS** 693

<b>17.1 Goal Programming</b>	<b>694</b>
The Basic Goal Programming Model	694
Priority Levels for Goals	698
<b>17.2 The Analytic Hierarchy Process</b>	<b>698</b>
Developing the Hierarchy	699
<b>17.3 Establishing Priorities Using the AHP</b>	<b>700</b>
Pairwise Comparisons	700
The Pairwise Comparison Matrix	701
Synthesis	702
Consistency	704
Other Pairwise Comparisons for the Car-Selection Example	706
<b>17.4 Using the AHP to Develop an Overall Priority Ranking</b>	<b>708</b>
<b>17.5 Using <i>Expert Choice</i> to Implement the AHP</b>	<b>710</b>
SUMMARY	714
GLOSSARY	714
PROBLEMS	715

## **EPILOGUE QUANTITATIVE METHODS AND COMPUTER-BASED INFORMATION SYSTEMS** 722

<b>E.1 Decision Support Systems: An Overview</b>	<b>722</b>
A Framework for Computer-Based Information Systems	723
Characteristics of Decision Support Systems	724
Components of Decision Support Systems	725
<b>E.2 Applications of Decision Support Systems</b>	<b>725</b>
A DSS for Truck Fleet Scheduling	726
A DSS for Portfolio Management	727
<b>E.3 The Impact of Personal Computers</b>	<b>727</b>
<b>E.4 Expert Systems</b>	<b>728</b>
Components of an Expert System	729
Recent Software Developments	729
The Future of ES and Its Relationship to DSS	729
SUMMARY	730

**Appendixes** 731

- A. Binomial Probabilities 731
- B. Poisson Probabilities 737
- C. Areas for the Standard Normal Distribution 743
- D. Values of  $e^{-\lambda}$  744
- E. Random Digits 745

**REFERENCES AND BIBLIOGRAPHY** 746

**ANSWERS TO EVEN-NUMBERED PROBLEMS** 751

**INDEX** 771
