INTRODUCTION BY ISAAC LEVI	IX
FURTHER READINGS	XXXIX
ACKNOWLEDGMENTS	XLIX
NOTE TO READER	LI
CHAPTER 1	
× Ambiguity and Risk	1
Vagueness, Confidence, and the Weight of Arguments	6
The Nature and Uses of Normative Theory	17
The Validation of Normative Propositions	22
The Utility Axioms as Norms	26
Normative Theory and Empirical Research	30
CHAPTER 2	
The Bernoulli Proposition	37
A Possible Counterexample: Are there Uncertainties that are Not Risks?	45
Vulgar Evaluations of Risk	
CHAPTER 3	
The Measurement of Definite Opinions	53
von Neumann-Morgenstern Utilities	56
Probability as Price	57
"Coherence" and "Definiteness" of Probability-Prices	65
Appendix to Chapter Three	75
On Making a Fool of Oneself:	
The Requirement of Coherence	75
Acceptable Odds: Definite, Coherent, and Otherwise	81

CHAPTER 4

Opinions and Actions: Which Come First?	91
The Logic of Degrees of Belief	93
Opinions that Make Horse Races	97
Postulate 2: the "Sure-Thing Principle"	106
Intuitive Probabilities and "Vagueness"	115
Appendix to Chapter Four	127
The Savage Postulates	127
The Koopman Axioms	129

CHAPTER 5

X Uncertainties that are Not Risks	131
The "Three-Color Urn" Example	137
Vulgar Evaluations of Ambiguity	143
Appendix to Chapter Five	151

CHAPTER 6

Why Are Some Uncertainties Not Risks?	155
Decision Criteria for "Complete Ignorance"	158
Decision Criteria for "Partial Ignorance"	169

CHAPTER 7

The "Restricted Hurwicz Criterion"	179
The "Restricted Bayes/Hurwicz Criterion"	190
Boldness and Prudence: The "n-Color Urn" Example	199
Ignorance, Probability, and Varieties of Gamblers	209

CHAPTER 8

Ambiguity and the Utility Axioms	219
The Pratt/Raiffa Criticisms and the Value of Randomization	230
Rubin's Axiom	246
Allais and the Sure-Thing Principle	
Winning at Russian Roulette	263

BIBLIOGRAPHY
