Contents

1 Introduction 1

2 Preliminaries 3
2.1 Stylised facts of aggregate growth in developing countries 3
2.2 Development economics and growth theory 10
2.3 Methodological foundations 12
2.3.1 Essential concepts in growth theory 12
2.3.1.1 Dynamic equilibrium 12
2.3.1.2 Representative agent models 14
2.3.2 Neoclassical research programme 16
2.3.3 Critical rationalism 17

3 Economic growth with subsistence consumption 21
3.1 Introduction 21
3.2 The subsistence level of consumption 23
3.3 A linear growth model with subsistence consumption 27
3.3.1 The model 27
3.3.2 Implications 31
3.3.2.1 Dynamic equilibria 31
3.3.2.2 Transitional dynamics 33
3.3.3 Convergence considerations 37
3.4 Extensions of the basic linear growth model 43
3.4.1 The model 43
3.4.2 Implications 46
3.4.2.1 Dynamic equilibria 46
3.4.2.2 Transitional dynamics: simulation results 48
3.5 Summary and conclusion 52
3.6 Appendix 53
3.6.1 The linear growth model with subsistence consumption 53
3.6.2 The Jones-Manuelli model with subsistence consumption 57

4 Productive consumption and growth in developing countries 61
4.1 Introduction 61
4.2 Productive consumption: an overview 63
4.2.1 Empirical evidence 63
4.2.2 Theoretical approaches 66
4.2.2.1 Preliminary remarks 66

4.2.2.2 Consumption and the probability of survival.....67
4.2.2.3 Consumption and the productivity of labour 69
4.3 The importance of productive consumption for growth 71
4.3.1 Productive consumption enhances the stock of human capital 71
4.3.1.1 The human-capital-enhancement function.....71
4.3.1.2 The human-capital model 73
4.3.1.3 Implications.....77
4.3.1.4 Simulation results.....83
4.3.1.5 Modifications 87
4.3.1.6 Summary and conclusion 89
4.3.2 Productive consumption increases the efficiency of labour 90
4.3.2.1 The labour-efficiency model.....90
4.3.2.2 Implications.....92
4.3.2.3 Simulation results.....93
4.3.2.4 Summary and conclusion.....96
4.4 Appendix 97
4.4.1 The human-capital model.....97
4.4.2 The labour-efficiency model 100

5 Transitional dynamics with endogenous control variables 107
5.1 Introduction 107
5.2 The convergence debate: a selective overview.....108
5.2.1 Structural convergence equations.....108
5.2.2 Main empirical results.....116
5.2.3 Some methodological issues 118
5.3 Cross-sectional convergence analysis 122
5.3.1 Procedure and data 122
5.3.2 Endogeneity of control variables.....126
5.3.3 Convergence analysis with endogenous control variables128
5.3.4 Interpretation of main findings.....130
5.4 Summary and conclusion.....134

6 Summary and conclusion 137

7 References.....141

List of figures.....149

List of tables 150
