Contents	IX
1 Introduction	1
2 Trading Mechanisms on Financial Markets	5
2.1 Typology of Security Markets	5
2.2 Market Participants and Institutional Setup on the NYSE	9
2.2.1 Market Participants	9
2.2.2 Handling of Orders and Execution	10
2.2.3 Order Routing and Information Systems	13
3 Sequential Trade Models	15
3.1 Market Microstructure Theory	15
3.2 Microstructure Models of the Black Box under Asymmetric Information	17
3.2.1 Sequential Trade Models	17
3.2.2 Walrasian Batch Models	20
3.2.3 Critical Assessment	22
3.3 The Basic Sequential Trade Model	24
3.4 Extensions	27
3.4.1 Trade Size Effects, No-Trading Events, and History Dependence	27
3.4.2 Discriminating Between Market and Limit Orders	33
3.4.3 Models for Dually Listed Assets	37
3.5 Estimation of Structural Models	43
3.5.1 Estimation of the Basic Model Using Information on Buys and Sells	43
3.5.2 Estimation of the Basic Model Using Information on Trades	44
3.5.3 Estimation of Related Models	47

3.6	Results of Previous Studies	50
4	Econometric Analysis of Sequential Trade Models	61
4.1	The EKOP Model and Finite Mixture Models	61
4.1.1	Motivation	61
4.1.2	An Alternative Version of the EKOP Model	64
4.1.3	A Multivariate Finite Mixture Poisson Regression Model	67
4.1.4	A Mixture Regression Model Based on the Negative Binomial Distribution	71
4.1.5	Accounting for Intraday Seasonality	73
4.1.6	Autoregressive Specification of the Conditional Mean Function	74
4.1.7	A Markov Switching Approach	76
4.2	Model Evaluation and Specification Testing	82
4.2.1	Specification Tests in Static Mixture and Markov Switching Models	82
4.2.2	Determining the Number of Regimes	84
4.2.3	A Conditional Moment Test for Goodness of Fit	86
4.2.4	Testing Parameter Restrictions	87
4.2.5	Testing for Autocorrelation	89
4.3	Mixture and Regime Switching Models in Econometrics	91
5	Empirical Results	93
5.1	The TAQ Database	93
5.2	The Trade Direction	96
5.2.1	Algorithms for the Determination of the Trade Direction	96
5.2.2	Empirical Evidence on the Accuracy of Classification ..	98
5.2.3	Classification of Trades	103
5.3	Descriptive Statistics	106
5.4	Estimation Results	112
5.4.1	Model Selection	112
5.4.2	Parameter Estimates	120
5.4.3	Specification Tests	129
5.4.4	Classification of Regimes	135
5.4.5	Testing Parameter Restrictions	142
6	Conclusions	145
Appendix		147
A.1	The Poisson Process	149
A.2	Maximum Likelihood Estimation of a Multivariate Poisson Mixture Model	151
A.3	The EM-Algorithm	153
A.4	The Poisson Regression Model	156
A.5	The Negative Binomial Regression Model	157

A.6 Moments of Mixture Distributions	160
A.7 Unobserved Individual Variation of Trade Arrival Rates	167
A.8 Markov Chains	169
A.9 The Smoothing Algorithm	172
A.10 Estimation of Transition Probabilities in the Markov Switching Model	173
A.11 Moments of the Dependent Variable in a Markov Switching Model	174
