

Contents

1	Introduction	1
1.1	Finite populations, sample surveys and opinion polls	2
1.2	Some basic concepts and definitions	7
1.3	Why sample?	11
1.4	How should we sample?	12
1.5	The central concept: probability sampling	14
1.6	A real-life study population: a statistics class	18
1.7	Selected bibliography and references	19
1.8	Exercises	20
2	Simple random sampling	22
2.1	The simple random sampling procedure	22
2.2	Estimating the Mean, \bar{Y}	25
2.3	Random sampling with replacement	27
2.4	Estimating the variance, S^2	27
2.5	Confidence intervals for \bar{Y}	28
2.6	Choice of sample size, n	31
2.7	Systematic sampling	34
2.8	Non-epsem sampling	36
2.9	Estimating the population total, Y_T	39
2.10	Estimating a proportion, P	41
2.11	Confidence intervals for P	43
2.12	Choice of sample size in estimating a proportion	45
2.13	Further comments on estimating proportions	50
2.14	Exercises	52
3	Carrying out a sample survey	55
3.1	Sources of variation and error	55
3.2	Pre-survey sampling	61
3.3	Methods of collecting the data	64
3.4	Questionnaire design	71
3.5	Initial processing of the data	72
3.6	Complex surveys	76

4 Ratios: ratio and regression estimators	77
4.1 Estimating a ratio	78
4.2 Ratio estimator of a population total or mean	84
4.3 Regression estimator of a population total or mean	91
4.4 Comparison of ratio and regression estimators	98
4.5 Ratio estimates and pps sampling	101
4.6 Exercises	103
5 Stratified populations and stratified simple random sampling	105
5.1 Stratified (simple) random sampling	107
5.2 Comparison of the simple random sample mean and the stratified sample mean	113
5.3 Optimum choice of stratum sample sizes	117
5.4 Comparison of proportional allocation and optimum allocation	122
5.5 Some practical considerations	125
5.6 Quota sampling	131
5.7 Estimating proportions	132
5.8 Ratio estimators in stratified populations	134
5.9 Conclusions	136
5.10 Exercises	138
6 Cluster and Multi-stage sampling	140
6.1 One-stage cluster sampling with equal sized clusters	142
6.2 Systematic sampling revisited	146
6.3 One-stage cluster sampling with different sized clusters	148
6.4 Cluster sampling with probability proportional to size	151
6.5 Multi-stage sampling	153
6.6 Two-stage cluster sampling	154
6.7 Comment	159
6.8 Exercises	160
7 Postscript	162
Appendix	164
Table 1 Random digits	164
Table 2 Percentage points for student's <i>t</i> -distribution and for the normal distribution	165
Bibliography	166
Index	169
