1. Introduction	1
2. An Overview of the Korean Economy, Sources of Economic Growth, the Role of Government, and the Characteristics of the Capital Income Tax System in Korea	7
2.1 An Overview of the Korean Economy	7
2.2 Sources of Korean Economic Growth	14
2.2.1 The Demand Components	14
2.2.2 The Supply Side	16
2.3 The Role of Government in the Korean Economy	19
2.3.1 The Role of Government in Economic Growth	19
2.3.2 The Role of Government in Economic Policies	21
2.4 Characteristics of the Capital Income Tax System in Korea	26
2.4.1 Capital Income Taxes	26
2.4.1.1 Personal Income Tax	28
2.4.1.2 Corporate Income Tax	28
2.4.1.3 Wealth Taxes	28
2.4.2 Various Characteristics of the Current Korean Capital Income Tax System	28
2.4.2.1 The Depreciation System	29
2.4.2.2 Tax-Deductibility of Debt-Interest Payments	29
2.4.2.3 The Legal Constraint on Debt Financing	29
2.4.2.4 The Limited Loss-Offset	29
2.4.2.5 A Tax Credit for Dividend Incomes	30
2.4.2.6 The Residence Principle	30
2.4.2.7 The Asset Revaluation System	31
2.4.3 Various Tax Incentives for Investment	31
2.4.3.1 Tax Holidays	31
2.4.3.2 Investment Tax Credit	32
2.4.3.3 Special Depreciation	32
2.4.3.4 Tax-Free Reserves for Export Promotion	32
2.4.3.5 Investment Reserves	33
2.5 Financial Institutions of Korea	33
2.5.1 Formal Financial Sector	34
2.5.2 The Curb-Market	34

3.	Effects of the Korean Tax system on the Allocation of Capital:	
	The Korean Studies	37
3.1	The Korean Tax system, Investment Decision of the Korean Firm and the Allocation of Capital in the Corporate Sector	37
3.1.1	The Studies of Taewon Kwack (1983, 1985a, 1985b, 1988)	37
3.1.1.1	Derivation of a Korean Formula of the Cost of Capital	37
3.1.1.1.1	A Basic Formula of the Cost of Capital by Jorgenson (1967, 1971)	37
3.1.1.1.2	Consideration of the Characteristics of the Korean Financial Policy	39
3.1.1.1.3	Consideration of the Diverse Tax Incentives of the Korean Tax System	41
3.1.1.2	Derivation of a Korean Formula of the Effective Marginal Tax Rate	46
3.1.1.2.1	A Basic Formula of the Effective Marginal Tax Rate by Jorgenson/Sullivan (1981)	46
3.1.1.2.2	Consideration of the Diverse Tax Incentives of the Korean Tax System	47
3.1.1.3	Empirical Results by Taewon Kwack (1985a, 1985b, 1988)	47
3.1.1.3.1	Effects of the Korean Tax System on the Investment Decision of the Korean Firm	47
3.1.1.3.2	Effects of the Korean Tax System on the Allocation of Capital in the Corporate Sector	49
3.1.1.4	Tax Reform Proposal by Taewon Kwack (1985b)	52
3.1.2	The Studies of Kunyong Yun (1988a, 1988b)	53
3.1.2.1	Derivation of Korean Formulas of the Costs of Capital	53
3.1.2.1.1	A Korean Formula of the Cost of Capital under the "Traditional" View	53
3.1.2.1.2	A Korean Formula of the Cost of Capital under the "New" View	56
3.1.2.1.3	A Korean Formula of the Cost of Capital: The 1984 King/Fullerton Model	57
3.1.2.2	Derivation of Korean Formulas of the Effective Marginal Tax Rates	59
3.1.2.3	Empirical Results by Kunyong Yun (1988a, 1988b)	60
3.1.2.4	Tax Reform Proposal by Kunyong Yun (1988a, 1988b)	62
3.2	Effects of the Korean Tax System on the Intersectoral Allocation of Capital: The 1984 Study of Kwang Choi/Taeyoung Ha	63
3.2.1	Derivation of a Double Taxation Formula for Korea	63
3.2.2	Empirical Results by Kwang Choi/Taeyoung Ha (1984)	65
3.2.3	Tax Reform Proposal by Kwang Choi/Taeyoung Ha (1984)	67
3.3	Effects of Inflation on the Investment Decision of the Korean Firm: An Appraisal of the Korean Asset Revaluation System by Taewon Kwack (1985b)	68
3.3.1	Derivation of Formulas of the Costs of Capital under the Influence of Inflation	68
3.3.1.1	Cost of Capital without Any Asset Revaluation System	68
3.3.1.2	Cost of Capital with the Current Korean Asset Revaluation System	69
3.3.1.3	Cost of Capital with the Continuous Asset Revaluation System	70
3.3.2	Derivation of Formulas of the Effective Marginal Tax Rates under the Influence of Inflation	70
3.3.3	Empirical Results by Taewon Kwack (1985b)	71
3.3.3.1	Inflation, Costs of Capital and Asset Revaluation Systems	71
3.3.3.2	Effects of Inflation on the Effective Marginal Tax Rates	73
3.3.4	Tax Reform Proposal by Taewon Kwack (1985b)	73

4.	Korean Capital Income Taxation, Finance, and Investment Decision of the Korean Firm	75
4.1	Focus of Analysis	75
4.2	Taxation and Investment Decision of the Firm	78
4.2.1	An Optimal Investment Decision of the Firm under the Influence of Corporate Taxation	79
4.2.2	Depreciation Patterns, Tax-Deductibility or Non-Deductibility of Debt Interest and Investment Decision of the Firm	81
4.2.2.1	True Economic Depreciation and Tax-Deductibility of Debt Interest	81
4.2.2.2	True Economic Depreciation and Non-Deductibility of Debt Interest	82
4.2.2.3	Free Depreciation and Tax-Deductibility of Debt Interest	82
4.2.2.4	Free Depreciation and Non-Deductibility of Debt Interest	83
4.2.3	Taewon Kwack (1983, 1985a, 1988) and Kunyoung Yun (1988a, 1988b): Studies on Investment Decision of the Korean Firm	84
4.3	Problems of Investment-Neutral Taxes	86
4.3.1	The Johansson-Samuelson Theorem	86
4.3.2	Cash-Flow Taxes	88
4.3.2.1	The R-Base Tax	88
4.3.2.2	The S-Base Tax	90
4.3.3	Critical Interpretations on the Korean Tax Reform Proposals by Taewon Kwack (1985b) and Kunyoung Yun (1988a, 1988b)	91
4.4	Korean Capital Income Taxation and Financial Decision of the Korean Firm	93
4.4.1	A General View of the Current Korean Capital Income Tax System	94
4.4.2	An Optimisation Problem of the Korean Firm under the Influence of Korean Capital Income Taxation	96
4.4.3	Comparisons of the Financing Methods of the Korean Firm	99
4.4.3.1	Emission of New Shares versus Retained Profits	100
4.4.3.2	Debt Financing versus Retained Profits	101
4.4.3.3	Debt Financing versus Emission of New Shares	102
4.4.4	Critical Interpretations on the Studies of Taewon Kwack (1983, 1985a, 1985b, 1988) and Kunyoung Yun (1988a, 1988b)	103
4.5	A More Realistic Analysis of the Relation between Korean Capital Income Taxation, Finance, and Investment Decision of the Korean Firm	106
4.5.1	A Formula for an Optimal Investment Decision of the Korean Firm	107
4.5.2	The Debt Constraint and Its Impact on the Financial Decision of the Korean Firm	109
4.5.3	Accelerated Depreciation, Finance, and Investment Decision of the Korean Firm	110
4.5.3.1	The Taxation Paradox: A Basic Concept by D. Schneider (1969)	111
4.5.3.2	The Taxation Paradox in the Korean Capital Income Tax system	112
4.5.3.3	A Consideration of the Limited Loss-Offset of the Korean Tax Laws	114
4.5.3.3.1	The Limited Loss-Offset, Accelerated Depreciation, and the Financial Decision of the Korean Firm	114
4.5.3.3.2	The Taxation Paradox despite a Consideration of the Limited Loss-Offset for the Korean Firm	116

5.	Korean Capital Income Taxation and the Intersectoral Allocation of Capital	118
5.1	Focus of Analysis.....	118
5.2	The Traditional View: The Harberger Model (1962, 1966).....	120
5.2.1	Effects of Corporation Income Taxation on the Intersectoral Allocation of Capital.....	120
5.2.2	Calculation of the Welfare Loss.....	123
5.3	Korean Capital Income Taxation and the Intersectoral Allocation of Capital.....	125
5.3.1	True Economic Depreciation, Financial Decision of the Korean Firm and the Intersectoral Allocation of Capital.....	125
5.3.2	The Problem of Double Taxation of Dividends of the Korean Firm.....	127
5.3.3	A More Realistic Analysis of the Relation between Accelerated Depreciation, Financial Decision of the Korean Firm and the Intersectoral Allocation of Capital in Korea.....	129
5.3.3.1	Accelerated Depreciation, the Legal Constraint on Debt Financing of the Korean Firm and the Intersectoral Allocation of Capital in Korea.....	129
5.3.3.2	Consideration of the Limited Loss-Offset of the Korean Firm.....	131
5.4	Critical Interpretations of the Korean Literature.....	133
6.	Korean Capital Income Taxation and the Direction of International Capital Flows	135
6.1	Focus of Analysis.....	135
6.2	International Reform Trends.....	138
6.3	The International Level of the German Firm's Tax Burden and Calculation Problems Hereof in an International Comparison.....	141
6.3.1	The International Level of the German Firm's Tax Burden.....	141
6.3.2	Important Calculation Methods of the German Firm's Tax Burden in an International Comparison.....	144
6.3.2.1	Calculation of the Effective Average Tax Burden of the Model Firm.....	144
6.3.2.1.1	The Study of Leibfritz/Parsche (1988).....	144
6.3.2.1.2	The <i>D/W</i> Study (1989).....	145
6.3.2.2	Calculation of the Effective Marginal Tax Burden on Investments: The Study of King/Fullerton (1984).....	146
6.3.3	Problems Concerning the Calculation Methods of the German Firm's Tax Burden in an International Comparison.....	147
6.3.3.1	The Study of Leibfritz/Parsche (1988).....	147
6.3.3.2	The <i>D/W</i> Study (1989).....	148
6.3.3.3	The Study of King/Fullerton (1984).....	149
6.4	Korean Capital Income Taxation and the Direction of International Capital Flows.....	151
6.4.1	Derivation of a Basic Korean Formula.....	151
6.4.2	True Economic Depreciation, Financial Decision of the Korean Firm and the Direction of International Capital Flows.....	157
6.4.3	A More Realistic Analysis of the Relation between Accelerated Depreciation, Financial Decision of the Korean Firm and the Direction of International Capital Flows.....	159

6.4.3.1	Accelerated Depreciation, the Legal Constraint on Debt Financing of the Korean Firm and the Direction of International Capital Flows	159
6.4.3.2	The Limited Loss-Offset of the Korean Firm	160
6.4.3.2.1	The Corporate Income Tax Rate	161
6.4.3.2.2	The Personal Income Tax Rate	162
7.	Inflation, Korean Capital Income Taxation and the Allocation of Capital.....	164
7.1	Focus of Analysis	164
7.2	Inflation, Korean Capital Income Taxation and Investment Decision of the Korean Firm	166
7.2.1	Derivation of a Basic Korean Formula	166
7.2.2	Implications for the Investment Decision of the Korean Firm under the Influence of Inflation in the Korean Capital Income Tax System	171
7.3	Inflation, Korean Capital Income Taxation and the Direction of International Capital Flows	173
7.3.1	Derivation of a Basic Condition of Korea	173
7.3.2	Implications for the Direction of International Capital Flows under the Influence of Inflation in the Korean Capital Income Tax System	175
7.4	Critical Interpretations of Taewon Kwack's Study (1985b)	178
8.	Concluding Remarks	180
8.1	Summary	180
8.2	Implications of the Cash-flow Taxation for the Korean Capital Income Tax System	188
	Bibliography	193
