Preface	xi
Introduction	xiii
1 Decision making under certainty and uncertainty	1
1.1 The importance of present value	1
1.2 The effect of risk on present value	4
1.3 Principal issues	5
1.4 Diversification and portfolio theory	6
1.5 The development of capital market theory	16
1.6 The capital asset pricing model	20
1.7 Relaxing the assumptions	22
1.8 Tests of the capital asset pricing model	25
1.9 Property and the market portfolio	26
1.10 Portfolio expansion and revision	27
1.11 Criticisms of risk return measures used in property investment analysis	28
1.12 Conclusion	32
<i>Appendices</i>	33
1A Statistical techniques, risk measures and portfolio analysis	33
1B The capital asset pricing model, the capital market line and index models	43
1C The expectations operator and other expressions	49
1D Regression analysis	51
1E Continuous rates of return	58
<i>References</i>	60

2	Market efficiency and its effect on pricing	62
2.1	The importance of information in assessing value	62
2.2	Efficiency of the market	68
2.3	Capitalizing on information	70
2.4	Valuation models	71
2.5	A general approach to valuation	71
2.6	Simplifying the model	73
2.7	Alternative valuation models	74
2.8	The equivalent yield model	74
2.9	The equated yield model	76
2.10	The rational valuation model	77
2.11	Reconciliation	79
2.12	Conclusions	80
 <i>Appendices</i>		
2A	Valuations versus prices	81
2B	An analysis of weak form market efficiency in the commercial property market	87
2C	Term structure and its potential impact on valuation	98
2D	An analysis of the changing risk profile of the commercial property market	102
2E	The assessment of systematic risk using a scenario approach	108
2F	The assessment of systematic risk using a certainty equivalent approach	112
2G	Assessing the risk premium for property	126
2H	The decomposition of property yields	132
 <i>References</i>		
		138
3	Hedging against inflation	139
3.1	Development of inflation	139
3.2	Hedging against inflation: the theory	140
3.3	Defining a hedge against inflation	141
3.4	Assessing expected inflation	147
3.5	UK studies on inflation hedging	150
3.6	USA studies on inflation hedging	155
3.7	Conclusion	160
 <i>Appendix</i>		
3A	A test for inflation hedging	161
		161

<i>References</i>	164
4 Portfolio construction	165
4.1 Background	166
4.2 Sample statistics	168
4.3 Methodology	171
4.4 Empirical tests using value-weighted portfolios	176
4.5 Investment in all sectors	177
4.6 Portfolio diversification	180
4.7 Systematic risk of existing portfolios	186
4.8 Conclusion	189
<i>Appendices</i>	
4A The characteristics of property returns	191
4B Risk reduction, correlation and average property risk	201
<i>References</i>	205
5 Portfolio strategy and asset allocation	206
5.1 Portfolio strategy	206
5.2 Technical analysis	207
5.3 Fundamental analysis	208
5.4 Active/passive strategies	209
5.5 Tracking an index with a property portfolio	211
5.6 Consistent and inconsistent strategies	213
5.7 Tracking expectations	213
5.8 Property selection	215
5.9 Processing information	216
5.10 Asset allocation and sector allocation	221
5.11 Conclusion	227
<i>Appendices</i>	
5A Eliminating smoothing in property indices	228
5B The performance of property bonds	231
<i>References</i>	237
6 Performance measurement	238
6.1 The valuation process	239
6.2 Valuations versus prices	241
6.3 Valuations versus valuations	241
6.4 Valuation whim	242
6.5 Communication, accountability and research	245

6.6	Objectives of a performance measurement system	246
6.7	Measuring returns	247
6.8	Money-weighted and time-weighted rates of return	248
6.9	Calculating time-weighted rates of return	251
6.10	The linked internal rate of return	253
6.11	The mean fund concept	254
6.12	Choosing a bench-mark	255
6.13	Analysing the results	258
6.14	Conclusion	262

Appendices

6A	Performance measurement of a property portfolio	264
6B	Comparison of property indices	282
