       1.3.1 Research Design .................................................................................................. 5
       1.3.2 Research Methods ............................................................................................... 6
   1.4 Structure of the Thesis ............................................................................................... 8

2 Iran and Central Asia as Parts of the Silk Route Region ............................................ 11
   2.1 The Old Silk Road ....................................................................................................... 11
   2.2 The Emergence of the Silk Road Region Today ......................................................... 13
   2.3 The Islamic Republic of Iran: An Economic Perspective .......................................... 14
       2.3.1 Current Economic Situation ................................................................................. 16
       2.3.2 The Oil and Gas Sector ......................................................................................... 17
           2.3.2.1 Foreign Investments in the Oil and Gas Sector ........................................... 19
       2.3.3 The Industrial Sector ............................................................................................ 20
       2.3.4 The Agricultural Sector ....................................................................................... 21
       2.3.5 The Mining Sector ............................................................................................... 21
       2.3.6 Iran's Foreign Trade ............................................................................................. 22
   2.4 Central Asia ............................................................................................................... 23
       2.4.1 Overview .............................................................................................................. 23
       2.4.2 Kazakhstan ......................................................................................................... 26
           2.4.2.1 Current Economic Situation ......................................................................... 26
           2.4.2.2 The Oil and Gas Sector ................................................................................. 28
           2.4.2.3 Foreign Investment in the Oil and Gas Sector ........................................... 30
3 Conceptual Framework ................................................................. 49

3.1 Strategic Issues of an International Business Entry .................. 49
3.2 Structure of the Conceptual Framework .................................. 51
3.3 Research Questions for the Study .............................................. 52
3.4 Corporate Motives for Business Entres .................................... 53
    3.4.1 Corporate Stages in the Internationalisation Process .......... 53
    3.4.2 Motives for Growth and Internationalisation .................. 56
3.5 Market Choice Issue .............................................................. 59
    3.5.1 Cultural and Historical Considerations within the Market Choice .. 60
    3.5.2 Market-Specific Factors Affecting the Target Country Choice ...... 62
    3.5.3 Measuring the “Investment Climate” ............................... 63
3.6 Product/Service Choice Issue .................................................. 66
    3.6.1 Physical Products ..................................................... 66
    3.6.2 Services ................................................................... 67
    3.6.3 Iran’s Business Offer to Central Asia .............................. 67
3.7 Classification of Entry Modes .................................................. 70
    3.7.1 Export Entry Modes .................................................. 70
    3.7.2 Contractual Arrangements ......................................... 72
    3.7.3 Foreign Direct Investments ........................................... 74
4 Empirical Study ................................................................. 86
  4.1 Oil Sector .................................................................. 86
  4.2 Central Asia’s Need for Energy Export Transit Routes ....... 87
    4.2.1 Production and Export Potential in Central Asia’s Oil Sector .................................................................................. 87
    4.2.2 Existing Pipeline System in Central Asia ....................... 89
  4.3 The Business Entry Strategy by the National Iranian Oil Company (NIOC) .......................................................... 90
    4.3.1 Profile National Iranian Oil Company (NIOC) ................. 91
    4.3.2 Building up NIOC’s Business Entry Strategy ................. 93
      4.3.2.1 Assessing Iran’s Pipeline Network and Refinery Capacity .......................................................... 95
      4.3.2.2 Oil Swap Arrangements with Central Asia ................. 96
      4.3.2.3 Refinery and Pipeline Modifications ....................... 100
      4.3.2.4 New Pipelines via Iran ........................................ 102
      4.3.2.5 Central Asian Energy Transport via Iran: Strategic Aspects .......................................................... 104
  4.4 Alternative Oil Export Routes ........................................ 105
  4.5 Export Markets for Central Asian Oil ............................ 109
    4.5.1 Asian Markets ..................................................... 109
    4.5.2 Mediterranean Markets .......................................... 110
    4.5.3 Black Sea Markets ............................................... 110
  4.6 Gas Sector .................................................................. 110
    4.6.1 Production and Export Potential in Central Asia’s Gas Sector .......................................................... 112
  4.7 The Business Entry Strategy by the National Iranian Gas Company (NIGC) .......................................................... 114
    4.7.1 Profile National Iranian Gas Company (NIGC) ................. 114
    4.7.2 Building up NIGC’s Business Entry Strategy .................. 116
      4.7.2.1 Gas Swaps between Iran, Turkey and Turkmenistan (Phase One) .......................................................... 117
      4.7.2.2 Regional Pipeline Connection (Phase Two) ............... 118
      4.7.2.3 Regional Gas Exports to Europe and India (Phase Three) .......................................................... 120
  4.8 Alternative Gas Export Routes ........................................ 122
### 4.9 Export Markets for Central Asian Gas
