1	Introduction	1
1.1	Motivation	1
1.2	Relationship to the literature	4
2	The framework	6
3	The Financial System at Work	9
3.1	Some basic effects	9
3.2	The bank-based financial system	14
3.3	The market-oriented financial system	20
4	Financial Crises	23
4.1	Financial crises in market-oriented financial systems	24
4.2	Financial crises in bank-based financial systems	26
5	Summary and Conclusion	33
	Appendix	36
A	Solution to Problem 2	36
B	Pooling contract for maximizing expected utility of type <i>A</i> and type <i>B</i> households	37
C	Solution to Problem 3	38
D	Proof that $p_{1;2}^{BR}$ has a lower bound at $\gamma \cdot R$ in market-oriented financial systems	39
E	Proof that $p_{1;2}^{BR}$ is monotonically falling for $i > \bar{i}$	40
F	Proof that $p_{1;2}^{BR} > p_{1;2}^{CT}$ for $i > \bar{i}$	42
