

Introduction	xiii
Acknowledgments	xviii
Nothing New under the Sun?	1
What's New in the "New" Economy	3
E-Commerce	3
E-Media	5
E-Markets	6
The Luxury of Focusing on Customers	7
The Importance of Customers	8
The Role of Data Mining	8
Bringing It Together	9
The Role of Marketing	10
Brands	10
Brands and Advertising	12
Advertising Is Changing	13
Targeted Marketing	13

	Beyond Targeted Marketing	14
	Defining Customer Value	15
	Real-Time Considerations	16
	Understanding Customers and Business Processes	17
	Experimental Design for Marketing	17
	Lessons Learned	18
2	Approaches to Mining the Web	21
	The Web, from the Perspective of Data Mining	22
	Mining Structure	24
	Global Structure	24
	Local Structure	32
	Mining Usage Patterns	34
	Clickstream Analysis	35
	Web Logs	35
	Application Logs	41
	Usage Mining to Improve Site Usability	42
	Mining Content	43
	Information Retrieval	43
	Classification Based on Content	44
	Extracting Information from Free Text	53
	Lessons Learned	54
3	Online Retailing: Selling Things That Get Delivered in a Truck	55
	Retailing	56
	Intermediaries Exist for a Reason	57
	Managing Supply Chain and Inventory	62
	Catalogs and Web Sites	64
	A Bit of History	64
	And Now	65
	Why Catalogs Are Relevant to E-Commerce	66
	Similarities between Catalogs and Web Sites	68
	Differences between Catalogs and Web Sites	68
	Retail Customers on the Web	71
	From Visitors to Customers	73
	Anatomy of a Purchase	73

	Purchasing Behavior	74
	Browsing Behavior	76
	Making Recommendations	78
	Infrastructure to Support Web Mining	83
	Different Modules for Different Tasks	84
	One Example of an IT Architecture for E-Commerce	86
	Lessons Learned	89
4	Digital Content: Selling Things That Get Delivered through the Ether	91
	What Can Be Delivered as Bits?	92
	Delivering Music	93
	The Web as Radio	94
	The Web as Jukebox	96
	The Web as Music Store	98
	The Web as Swap Meet	101
	The Web as Open Mike Night	106
	Delivering Video	106
	Pornography's Leading Role	107
	Delivering Information	108
	Businesses Based on Information Retrieval	108
	Making Recommendations	111
	Collaborative Filtering	112
	Delivering Interactive Entertainment	114
	Lessons Learned	115
5	Selling Eyes to Advertisers	117
	Advertising Business Models	118
	Publishers	118
	Advertisers	120
	Ad Brokers	121
	Ad Creators	123
	The Technology of Online Advertising	124
	Frames and Windows	124
	Cookies	126

Basics of Online Advertising	133
Matching Publishers and Advertisers	133
What Is a Click Worth?	137
Microconversion Rates	138
Finding the Right Audience	139
How Fit Are Your Readers?	140
The Business of Providing Space for Advertising	140
Measuring the Fitness of One Reader	141
Measuring Fitness for Groups of Readers	143
Tracking User Behavior	146
Invisible Tracking Devices	147
Tracking Email Readers	149
Attracting Eyeballs	149
E-Media	150
Portals	151
Directories and Services	153
Lessons Learned	153
6 Marketplaces: Connecting Sellers and Buyers	155
History of Free Markets	156
The Free Market and Its Simplifying Assumptions	157
Commodities Exchanges	158
The Minneapolis Grain Exchange	159
Data Mining Opportunity: Forecasting Prices	163
Other Relevant Historical Models	168
The Electronic Marketplace	168
Many-to-Many, Cross-Industry Public Exchanges	171
Data Mining Opportunities for a Many-to-Many Exchange	175
Many-to-Many, Single-Industry Public Exchanges	178
Many-to-Few Public Exchanges	182
Private Marketplaces	184
Lessons Learned	187
7 How Much Are Your Customers Worth?	189
The Basics of Calculating Customer Value	190
Myths of Using Customer Value	191

Myth 1: Customer Value Helps Us Focus on Our Best Customers	191
Myth 2: Customer Value Equates to Overall Profitability	192
Myth 3: Customer Value Determines Investment in the Customer Relationship	193
Myth 4: Customer Value Identifies the Bad Customers We Should Get Rid Of	194
How Good Was It: Retrospective Customer Value	195
Elements of the Customer Value Calculation	197
Definition of Customer	197
Units of Measurement	198
Customer Value Timeframes	200
Customer Value Components	201
Drilling Down and Aggregating	202
From Drivers to Components	203
Revenues	204
The Simple Case	204
Indirect Revenue	205
Other Sources of Value	209
Costs	209
Fixed Costs versus Variable Costs	209
Costs to Include in Customer Value	210
Accounting for Marketing Costs	211
Customer Acquisition	212
Moving Toward Prospective Value	214
Lessons Learned	215
8 Knowing When to Worry: Hazard Functions and Survival Analysis in Marketing	217
Customer Retention	218
What a Retention Curve Tells Us	218
Looking at Retention as Decay	222
Hazard Functions	228
The Basic Idea	228
Applying Hazard Functions	230
The Importance of Censoring	231

Examples of Hazard Functions	234
Constant Hazard	234
Bathtub Hazard	235
A Real-World Example	235
From Hazards to Survival	236
Retention	237
Survival	238
Proportional Hazards	240
Examples of Proportional Hazards	240
Time-Dependent Factors	241
Hazard Functions in Practice	242
Voluntary versus Involuntary Attrition	243
When Will a Customer Come Back?	243
Applications Beyond Retention	245
Lessons Learned	245
9 Cohort Analysis: Using Cohorts to Track Customers	247
A Simple Example	248
Background	249
Approach to Problem	249
Results	250
Summary of Approach	251
Memory-Based Reasoning	252
How Close Is Close?	253
Combination Function	255
Choosing Fields for Distance	255
Cells and Cohorts	258
Initial Customer Behavior	259
Important Attributes of Customers	260
Putting Them Together	265
Using Cohorts to Evaluate and Plan Marketing Efforts	266
Defining the Cohort	267
Using the Cohort to Understand Retention	269
Quantifying Retention Benefits	272
Incorporating Customer Value	273

10 Using Marketing Tests to Understand Customers**277**

The Science of Marketing

278

Marketing Science . . . An Oxymoron?

278

Marketing and the Scientific Method

281

How Big Is Big Enough?

283

A Marketing Example

283

What Do We Really, Really Want

284

Confidence in Response Rate

284

How Big Should the Sample Be?

287

The End Result

289

When Does It Make a Difference?

290

Customer Segmentation

290

Example Using Groups

291

A Caveat about Comparing Many Different Groups

292

Factors in Designing a Marketing Test

293

The Situation

293

Proposed Test

294

Improved Test

296

Analyzing the Results

299

Guidelines for Designing a Comparative Test

301

Which Factors Are Important? Comparing the Results from Tests

301

What If It Doesn't Work?

301

Setting Up a Marketing Intervention

302

Is Acquisition Source an Important Factor?

303

Is Tenure at Acceptance an Important Factor?

306

Using the Results

307

Guidelines on Using Chi-Square

308

Lessons Learned

309

11 Live (and Test) and Learn**311**

How Does Data Mining Contribute to Learning?

312

Building a Data Mining Group

312

Potential Low-Hanging Fruit

313

Solving the Problem	315
Data Mining to the Rescue	316
Willingness to Learn	317
Market Segmentation	318
The Market Research Approach	319
The Challenge of Finding the Segments in the Database	325
The Advantage of Operational Segments	327
An Approach for Developing Operational Segments	327
Planning to Learn	333
Learning Is an Ongoing Process	333
Customers as an Ongoing Process	334
Plan to Analyze in Advance	336
Learning and Memory	337
Requirement 1: Creating Customer Signatures	337
Requirement 2: Creating Signatures in the Past	338
Requirement 3: Drilling Down to Detail	339
Requirement 4: Keeping Track of Customers over Time	340
Requirement 5: Keeping Track of Campaigns over Time	340
Lessons Learned	342
Index	343
