List of Tables	vi
List of Figures	viii
1 Introduction	1
1.1 The most independent central bank in the world	1
1.2 Purpose of the study	3
1.3 Means of influencing central banks	5
1.4 The models	6
1.4.1 Models linked to election dates	6
1.4.2 Conflict models	8
1.4.3 Which model to chose?	9
1.5 Outline of the study	13
2 Review Of The Literature	15
2.1 The institutional setting	15
2.1.1 Germany	15
2.1.2 The structure of the Deutsche Bundesbank	17
2.1.3 Aims and instruments of the Deutsche Bundesbank	18
2.2 Measures of monetary policy	21
2.3 Direct political influence on the Deutsche Bundesbank	27
2.3.1 Cross-country studies	27
2.3.2 Studies on Germany	29
2.4 Indirect influence on the Deutsche Bundesbank	34
2.5 Interpretation of the empirical studies	37

3	Interest Rates As Indicators For Monetary Policy	41
3.1	Overview	41
3.2	When do political business cycles occur?	42
3.2.1	Restricting institutional features	42
3.2.2	Possible interest rate patterns before elections	46
3.3	Empirical evidence	48
3.3.1	Country-specific results	48
3.3.2	Panel data estimation	54
3.4	Summary	56
4	Monetary Policy Indices As Indicators For Monetary Policy	59
4.1	Overview	59
4.2	Monetary policy indices as indicators for a central bank's rhetoric	60
4.2.1	How monetary policy indices are constructed	60
4.2.2	Properties of the German monetary policy index	62
4.3	Empirical evidence	64
4.3.1	The basic model	64
4.3.2	The 'Political Business Cycle'	67
4.3.3	Conflict models	72
4.4	Interpretation of the German evidence	82
4.5	Rhetoric of the Bank of Japan and the US Federal Reserve	83
4.5.1	Japan	84
4.5.2	United States	87
4.6	Summary	88
5	A New Indicator For (Political) Pressure	91
5.1	Overview	91
5.2	The Havrilesky approach	92
5.2.1	Methodology	92
5.2.2	Constructing a 'Pressure Indicator' for Germany	94
5.3	Properties of the new 'Pressure Indicator'	95
5.4	Comparison of different indicators for 'Pressure' and 'Conflicts'	100
5.5	Estimation procedure	102
5.6	Empirical evidence	105
5.6.1	The aggregated 'Pressure Index'	105
5.6.2	Disaggregating the 'Pressure Index'	105

5.6.3	Interpretation	109
5.7	Summary	110
6	The Role Of Public Support	113
6.1	Overview	113
6.2	Methodology	114
6.3	Traditional Macroeconomic model	117
6.4	Traditional Public Choice model	119
6.5	The ‘Extended’ Public Choice model	121
6.5.1	The Support variables	121
6.5.2	Empirical evidence	124
6.5.3	Interpretation	126
6.6	Summary	128
7	The European Context	131
7.1	Overview	131
7.2	The European Central Bank	131
7.3	Political pressure on the ECB?	134
7.4	Can inflation differentials in the EMU cause pressure?	141
7.4.1	Explaining inflation differentials	142
7.4.2	Empirical evidence	147
7.4.3	Should the ECB worry about inflation differentials?	158
7.5	Summary	161
8	Conclusion	163
8.1	Overview	163
8.2	Main findings	164
8.3	Discussion	167
A	Data sources	171
A.1	Interest rates as indicators for monetary policy	171
A.2	Monetary policy indices as indicators for monetary policy	172
A.3	The newspaper indicators for ‘Pressure’ and ‘Support’	173
A.4	The European context	174
	Bibliography	177

Author Index	193
Samenvatting (Dutch Summary)	197

List of Tables

1.1	Legal indices of central bank independence: The ranking of the Deutsche Bundesbank	2
2.1	Direct influence on the Deutsche Bundesbank	35
2.2	Indirect influence on the Deutsche Bundesbank	37
2.3	Summary: Impact of political pressure on the Deutsche Bundesbank	38
3.1	National constraints	44
3.2	Participation in Fixed Exchange Rate Systems	46
3.3	International constraints	47
3.4	Summary: National and international constraints	47
3.5	Country-specific tests	50
3.6	Additional results for Austria and Japan	52
3.7	Results for the UK	53
3.8	Results for the panel regression	55
4.1	Properties of the Bundesbank Index: Granger causality tests	64
4.2	Pre- and post-electoral behavior of the Bundesbank index	68
4.3	Pre- and post-electoral behavior of the day-to-day rate	69
4.4	Additional political variables	70
4.5	The impact of additional PBC variables on the Bundesbank index	71
4.6	The impact of additional PBC variables on the day-to-day rate	72
4.7	The Berger/Schneider conflict model for the Bundesbank index and the day-to-day rate	74
4.8	The Lohmann conflict model of Bundesrat support for the Bundesbank index	76

4.9	The Lohmann conflict model of Bundesrat support for the day-to-day rate	78
4.10	Impact of political majority of the Bundesbank council on the Bundesbank index	80
4.11	Vaubel's obstructionist hypothesis for the Bundesbank index	81
4.12	Impact of political majority of the Bundesbank council on the day-to-day rate	81
4.13	Vaubel's obstructionist hypothesis for the day-to-day rate	82
4.14	The PBC model for the Japan index	86
4.15	The PBC model for the FED index	89
4.16	Post-electoral behavior for the FED index	89
5.1	Pressure on the Bundesbank as reported in the newspapers	99
5.2	Correlation of Pressure Indicators	101
5.3	The influence of the 'Total Pressure' variable	106
5.4	Disaggregating the 'Pressure Index'	107
5.5	The influence of the newspapers: Pressure from the financial sector reported in the <i>Frankfurter Allgemeine Zeitung</i>	108
5.6	The influence of the newspapers: Pressure from the financial sector reported in the <i>Handelsblatt</i>	108
5.7	The influence of the newspapers: Pressure from the financial sector reported in the <i>Die Welt</i>	109
5.8	Robustness checks with additional economic variables	111
6.1	Traditional Macroeconomic Model	118
6.2	Traditional Public Choice model	120
6.3	Support for the Bundesbank in different newspapers	122
6.4	Relation between Pressure and Support	123
6.5	'Extended' Public Choice model	127
7.1	Inflation rates in the EU member countries	143
7.2	Empirical evidence on inflation differentials	148
7.3	Coefficients of the BS model	151
7.4	Decomposition of real exchange rate movements	153
7.5	Implied Inflation Differentials with France	155
7.6	Simulated inflation rates for EMU member countries	157

List of Figures

1.1	Testable implications of the theoretical models	10
2.1	The structure of the Deutsche Bundesbank	18
2.2	Comparison of growth rates of M1 and M3	24
2.3	Comparison of the discount rate and the monetary policy index for Germany ('Bundesbank Index')	26
3.1	Comparison of short-term interest rates in Austria and Germany	51
4.1	The monetary policy index for Germany ('Bundesbank Index') and the day-to-day rate	63
4.2	The monetary policy index for Germany ('Bundesbank Index') and the growth rate of M3	65
4.3	The monetary policy index for Germany ('Bundesbank Index') and the consumer price index	65
4.4	The Berger/Schneider conflict indicator	73
4.5	Comparison of the traditional PBC indicator and Lohmann's con- flict variable	77
4.6	The monetary policy index for Japan ('Japan Index') and Japan Overnight Call Money-Market Rate	85
4.7	The monetary policy index for the US ('US Index') and the Fed- eral Funds Rate	88
5.1	Pressure from the German government	96
5.2	Political pressure on US monetary policy (Havrilesky)	96
5.3	Pressure from the German financial sector	97
5.4	Total Pressure on the Bundesbank	98

5.5	Comparison of different conflict indicators	100
6.1	Economic and political determinants of monetary policy	115
6.2	Total support for the Bundesbank	122
6.3	Pressure and Support from the German government	124
6.4	Effect of public support on forecast error ϵ_t	128
7.1	The structure of the ECB	132
7.2	Pressure from interest groups on the ECB	137
7.3	Spread of the inflation rate within monetary unions	142
7.4	Real exchange rate movements	152
