Introduction: Challenges of Managing in a Network Economy  1

Theme 1: Market Structure and Industry Dynamics  4
Theme 2: Evolving Business Models  6
Theme 3: IT Impact  7
Theme 4: Prioritizing IT Investments  8
Theme 5: Assimilation and Organizational Learning  11

   Phase 1. Opportunity Identification and Investment  12

   Phase 2. Organizational Learning and Adaptation  13

   Phase 3. Rationalization and Continuous Evolution  13

Theme 6: Buy versus Make  13
Theme 7: Partnership among Key Constituencies as IT Evolves  14
Theme 8: Protecting IT Assets and Managing Risks  16
Theme 9: Pervasive Computing: Opportunities and Risks  17
Summary  17

Appendix A: Analyzing the Strategic Impact of IT  19
Support  19
Turnaround  19
Factory  20
Strategic  20

MODULE ONE
BUILDING THE NETWORK ECONOMY: MARKETS AND MODELS  21

Chapter 1
Creating Business Advantage with IT  23

Forces That Shape Business Strategy  27
MODULE 2
BUILDING THE NETWORK ECONOMY: CAPABILITIES AND ORGANIZATION

Chapter 3
Building Networked Businesses

The Need for New Capabilities
Is History Repeating Itself?
Blueprint for a Networked Organization
Operating and Innovating
Managing and Learning
Leading and Engaging
Building Value Networks
Where Should Activities Be Performed?
How Should We Relate to Market Participants?
Evolving Market Structure and Relationships

Summary

Appendix 3A
Characteristics of the Hierarchy, Entrepreneurial Organization, and Networked Organization

Chapter 4
Making the Case for Networked Business

Changing Economics
Comparing Industrial and Networked Economics
Linking Strategy to Execution to Results
Analyzing Performance Drivers
Developing the Business Case for IT
Benefits from Investments in Infrastructure
Benefits from Doing Business on a Networked Infrastructure

Summary

Appendix 4A
Analyzing Business Models
Appendix 4B
Analyzing Financial Performance
Appendix 4C
Approaches to Valuing Public Companies
Chapter 5
Understanding Internetworking Infrastructure 151

The Drivers of Change: Better Chips, Bigger Pipes 153
The Basic Components of Internetworking Infrastructures 157

The Technological Elements of Networks 159
The Technological Elements of Processing Systems 162
The Technological Elements of Facilities 165
Operational Characteristics of Internetworks 167

The Rise of Internetworking: The Business Implications 169

The Emergence of Real-Time Infrastructures 170
Broader Exposure to Operational Threats 172
New Models of Service Delivery 173
Managing Legacies 175

The Future of Internetworking Infrastructure 175
Summary 176

Chapter 6
Assuring Reliable and Secure IT Services 179

Availability Math 181

The Availability of Components in Series 181
The Effect of Redundancy on Availability 183
High-Availability Facilities 184
$N+1$ and $N+N$ Redundancy 186

Securing Infrastructure against Malicious Threats 188

Classification of Threats 189
Defensive Measures 194
A Security Management Framework 199
Risk Management of Availability and Security 200
Incident Management and Disaster Recovery 202
Managing Incidents before They Occur 202
Chapter 7
Managing Diverse IT Infrastructures 207

New Service Models 209
Managing Risk through Incremental Outsourcing 214
   An Incremental Outsourcing Example: Hosting 215
Managing Relationships with Service Providers 219
   Selecting Service Provider Partners 219
   Relationship Management 222
Managing Legacies 225
Managing IT Infrastructure Assets 228
Summary 230

MODULE 4
MANAGING AND LEADING A NETWORKED IT ORGANIZATION 231

Chapter 8
Organizing and Leading the IT Function 233

Organizational Issues in the Control of IT Activities 233
1. From Centralized, IT-Driven Innovation to Decentralized, User-Driven Innovation 234
2. User-Driven Innovation over IT Department Protests 234
3. From Decentralized, User-Driven Innovation to Centralized IT Management 236
4. From Decentralized, User-Driven Innovation to Unexpected Centralized Innovation 236

Implications and Conclusions 237
Drivers toward User Dominance 237
   Pent-Up User Demand 238
   The Need for Staff Flexibility 238
   Growth in the IT Services Industry 238
Chapter 9
Managing IT Outsourcing 251

Why Outsourcing Alliances Are So Difficult 252
Outsourcing in Retrospect 253
Outsourcing in the 21st Century 254
  Acceptance of Strategic Alliances 254
  IT's Changing Environment 254
What Drives Outsourcing? 256
  General Managers' Concerns about Costs and Quality 256
  Breakdown in IT Performance 257
  Intense Vendor Pressures 257
  Simplified General Management Agenda 258
  Financial Factors 258
  Corporate Culture 259
  Eliminating and Internal Irritant 259
  Other Factors 259
When to Outsource 259
  Position on the Strategic Grid 260
  Development Portfolio 261
  Organizational Learning 261
  A Firm's Position in the Market 262
  Current IT Organization 262
Structuring the Alliance 262
  Contract Flexibility 262
  Standards and Control 263
Areas to Outsource 263
Cost Savings 264
Supplier Stability and Quality 264
Management Fit 265
Conversion Problems 265
Managing the Alliance 265
The CIO Function 265
Performance Measurement 266
Mix and Coordination of Tasks 267
Customer-Vendor Interface 267
Summary 268

Chapter 10
A Portfolio Approach to IT Projects 269

Sources of Implementation Risk 270
Product Categories and Degree of Risk 271
   Assessing Risk for Individual Projects 271
   Portfolio Risk 275
Project Management: A Contingency Approach 276
