Preface	xv
Acknowledgements	xvii
Part I: Introduction	
1 Introduction	1
1 Social research: an historical overview	2
2 Types of social research	6
3 Research and theory:	8
a Theory construction in quantitative research	8
b Theory construction in qualitative research	12
c Theory construction in quantitative and qualitative research	15
4 Aims of social research	16
5 Motives of social research	16
6 Application of social research	17
7 Principles of social research	18
8 Objectivity in social research:	18
a Objectivity in quantitative research	18
b Objectivity in qualitative research	20
9 Ethics in social research:	21
a Introduction	21
b Professional practice and ethical standards	23
c The researcher–respondent relationship	24
d The researcher–researcher relationship	25
e The researcher–animal relationship	25
10 Representativeness:	26
a Quantitative research	26
b Qualitative research	27
11 Limits of social research	27
12 Summary	28
2 Varieties of Social Research	29
1 Introduction	30
2 Perspectives, paradigms, methodologies and methods:	30
a Definitions	30
b Paradigms	30

c	Methodologies	32
d	Methods	33
3	Theoretical perspectives:	33
a	Dominant paradigms	33
b	Perception of reality	34
c	Perception of human beings	35
d	The nature of science	36
e	The purpose of social research	37
4	Perspectives and methodologies	39
5	Quantitative methodology:	40
a	Theoretical background	40
b	Critique of quantitative methodology	41
6	Qualitative methodology:	44
a	General criteria	45
b	Theoretical foundations	46
c	Central principles	49
d	Research foundations	50
e	Strengths and weaknesses	51
7	Similarities and differences	52
8	Quantitative and qualitative methods:	54
a	Quantitative methods	54
b	Qualitative methods	54
9	The right methodology?	55
10	Emerging methodologies	57
11	The basis for a methodological distinction	58
12	Feminist research:	60
a	Introduction	60
b	The nature of feminist research	61
c	Feminist research and conventional research	65
d	Is there a feminist methodology?	66
13	Summary	68
3	Measurement and Scaling	70
1	Introduction	70
2	Nature of measurement	71
3	Levels of measurement:	71
a	Nominal level	72
b	Ordinal level	72
c	Interval level	73
d	Ratio level	73
e	Summarising	74
4	Validity:	74
a	In quantitative research	74
b	In qualitative research	74
5	Reliability:	79
a	In quantitative research	79
b	In qualitative research	79
6	Validity and reliability	80
7	Indexes	80

8	Scaling:	81
	a Reasons for using scale	82
	b The Thurstone scale	82
	c The Likert scale	83
	d The Bogardus social distance scale	85
	e The Guttman scale	86
	f The semantic differential scale	87
4	The Research Process	90
1	Introduction	90
2	Quantitative research: the research model:	91
	a Basic assumptions	91
	b Content of the research model	91
	c Purpose of the research model	92
	d Structure of the research model	93
	e Steps in the research model	93
3	Research design in qualitative research:	98
	a Introduction	98
	b Conceptual frameworks	99
4	Summary	100

Part II: Data Collection

5	Initiating Social Research	105
1	Introduction	105
2	Choosing a methodology — quality criteria	106
3	Selecting the research question:	107
	a The nature of the research question	108
	b The right to make the choice	108
	c Selection in a social context	109
	d Basic questions	110
4	Formulation of the research question	111
5	Formal definition of the topic	111
6	Selection of the methodological framework	113
7	Exploration:	114
	a Introduction	114
	b Types of exploratory studies	115
8	Operationalisation:	116
	a In quantitative research	116
	b In qualitative research	118
	c Value of operationalisation	119
9	Formulation of hypotheses:	119
	a Introduction	119
	b Criteria of hypothesis construction	120
	c Generating hypotheses	120
	d Nature of hypotheses	120
	e Types of hypotheses	120
	f Formulating the hypothesis	122

g	Functions of hypotheses	122
h	Critique of hypotheses	123

6	Sampling Procedures	124
1	Introduction:	124
a	Reasons for sampling	125
b	Problems of sampling	125
c	Principles of sampling	126
2	Types of sampling	126
3	Types of probability sampling:	126
a	Simple random sampling	127
b	Systematic sampling	130
c	Stratified random sampling	131
d	Cluster sampling	132
e	Multi-stage sampling	133
f	Area sampling	134
g	Multi-phase sampling	134
h	Panel studies	135
i	Spatial sampling	136
4	Non-probability sampling:	137
a	Accidental sampling	137
b	Purposive sampling	138
c	Quota sampling	138
d	Snowball sampling	139
5	Sampling procedures in qualitative research	140
6	Non-response	142
7	Sample size:	143
a	In qualitative estimations	143
b	In statistical methods	144
c	Using tables	147
7	The Survey	151
A	METHODS OF DATA COLLECTION:	152
1	Introduction	152
2	Methods in quantitative and qualitative research	153
3	Triangulation	155
4	The 'right' method of data collection	156
B	THE SURVEY METHOD	157
C	QUESTIONNAIRES:	157
1	Introduction	157
2	Advantages and limitations of questionnaires	158
3	Structure of the questionnaire	159
4	The questionnaire format	160
5	Size of the questionnaire	161
6	Type of questions	162
7	Response format:	166
a	Introduction	166
b	Response sets	167
8	Question content	170

9	Rules of questionnaire construction:	171
a	Layout	171
b	Content	171
c	Format	172
10	Steps in questionnaire construction	172
11	Reviewing the questionnaire	174
12	Relevance of the questionnaire	175
13	Questionnaires in the computer age	176
D	INTERVIEWING:	177
1	Introduction	177
2	Types of interviews:	178
a	Interviews employed in qualitative and/or quantitative research	178
b	Interviews employed in qualitative research	187
3	The interviewer:	189
a	The interviewer's tasks	189
b	Interviewer selection	189
c	Interviewer training	190
4	The process of interviewing:	191
a	Seeking respondents	191
b	Asking the questions and recording	192
c	Field supervision	193
d	Completion of the interview	193
5	Interviewer–respondent relationship	194
6	Prompting and probing	194
7	Intensive interviewing	195
8	Telephone interviewing	196
9	Interviewing: advantages and limitations	197
10	Interviewing in the computer age	199
11	Problems and errors in interviewing	200
8	Indirect Methods of Data Collection	203
1	Introduction	203
2	Physiological methods	204
3	Disguised methods	205
4	Study of physical traces	205
5	Documentary methods:	206
a	Types of documents	206
b	Applications	207
c	Forms of research	207
d	The process of documentary research	207
e	Advantages and limitations of documentary methods	208
6	The biographical method	209
7	Content analysis:	210
a	Steps in content analysis	211
b	Construction of categories	212
c	The meaning of data	213
d	Coding	213
e	Methods of content analysis	213

f	Content analysis in the computer age	216
g	Strengths and weaknesses of content analysis	216
8	Projective methods:	217
a	Introduction	217
b	Types of projective methods	218
9	Observation	221
1	Introduction	221
2	Types of observation	222
3	The process of observation:	224
a	Steps in observation	224
b	The structure	224
4	Selection and formulation of the topic	225
5	Research design:	226
a	Selection of the sample	226
b	The arrangements	227
6	The observer:	227
a	Observer skills	227
b	Observer training	228
7	Collection of the data	228
8	Analysis of data and reporting	230
9	Participant observation	230
10	Ethical issues	231
11	Advantages and limitations	232
12	Problems of observation:	233
a	Sources of errors	233
b	Prevention of errors	234
10	Experiments and Sociometry	236
A	EXPERIMENTS:	237
1	Introduction	237
2	The nature of experiments	238
3	Stages in experimental research	238
4	Experimental sampling:	239
a	Characteristics of the sample	239
b	Methods of selection	240
c	Strengths and weaknesses	240
5	Arrangement of experimental conditions	240
6	The process of data collection	241
7	Analysis and interpretation of experimental data	242
8	Types of experimental designs	242
9	Types of experiments	243
10	Field experiments	244
11	Validity of experiments	245
B	SOCIOMETRY:	246
1	Introduction	246
2	Methods	246
3	Presentation of the data	247

4	Interpretation of the data	247
5	Application	247
6	Evaluation	247
C	GROUP DISCUSSION:	248
1	Introduction	248
2	The purposes of group discussion	249
3	The discussion process:	250
	a Choice of respondents	250
	b Introduction of a goal-directed discussion	251
	c Controlling the discussion	251
	d Recording the data	251
4	The leader	252
5	Recording	252
6	Evaluation	252
7	Problems with group discussion	253
11	Field Studies and Grounded Theory	255
A	FIELD STUDIES:	256
1	Types of field studies	257
2	Field design	258
B	FIELD WORK: CASE STUDIES:	259
1	Introduction	259
2	Case studies in quantitative research	260
3	Case studies in qualitative research	260
4	Research design	261
5	The case-study protocol	261
6	Aspects of the research model:	262
	a Sampling	262
	b Planning data collection	262
	c Planning data analysis	263
	d Interpretation and reporting	263
7	Use of case studies	263
C	FIELD WORK: ETHNOGRAPHIC RESEARCH:	264
1	Introduction	264
2	Theoretical foundations	264
3	Methodology in ethnographic research	265
4	Criteria of ethnographic research	266
5	Evaluation	268
D	GROUNDING THEORY RESEARCH:	268
1	Introduction	268
2	Main steps in the research process	270
3	Main procedures and elements of the research process	270
4	Details of the main procedures	271
12	Data Collection	275
1	Pre-tests and pilot studies:	276
	a Pre-tests	276
	b Pilot studies	277
	c Designing pre-tests and pilot studies	278

d	Nature of pilot studies	278
e	Evaluation	278
2	Data collection in quantitative and qualitative studies	279
3	Interviewing:	280
a	Tasks to be accomplished	280
b	Telephone interviewing	282
4	Questionnaires	283
5	Non-response in survey research:	283
a	Non-response to questionnaires — the researcher's task	284
b	Reducing or avoiding non-response	285
c	Some considerations	285
d	Interview 'response' rate	287
6	Documentary methods	288
7	Observational research	288
a	General overview	288
b	Tasks to be performed in participant observation	289
8	Experiments	290
9	Case-study research	292
10	Summary	293

Part III: Data Analysis

13	Analysis and Interpretation	297
A	QUALITATIVE ANALYSIS:	298
1	Introduction	298
2	The process of qualitative analysis	300
3	Methods of qualitative analysis:	301
a	Neuman's typology	302
b	The methods of Miles and Huberman	303
4	Qualitative analysis in specific contexts	305
5	Interpreting the findings of qualitative analysis	308
6	Statistical procedures and computer-aided analysis	310
B	QUANTITATIVE ANALYSIS:	311
1	Introduction	311
2	Electronic data processing	312
3	A comparative summary of quantitative and qualitative analysis	318
4	Data preparation in quantitative analysis:	319
a	Coding data	320
b	Editing and checking data	322
c	Feeding the computer	322
d	Storing data	324
e	Manual preparation of data	324
5	Processing open-ended questions	324
6	Counting	325
7	Tallying the frequencies	326
C	SUMMARY	328

14 Data Presentation	329
A PRESENTATION OF DATA IN QUANTITATIVE RESEARCH:	330
1 Distributions	330
2 Tables:	331
a Table structure	331
b Types of tables	332
c Working with tables	332
d Rules of presentation	333
3 Graphs	334
4 Types of graphs	334
B PRESENTATION OF DATA IN QUALITATIVE RESEARCH	343
1 Introduction	343
2 Matrices	344
3 Figures	345
4 Charts	345
5 Summary	346
15 Central Tendency and Dispersion	347
1 Relational measures	347
2 Measures of central tendency:	349
a The mean	349
b The mode	351
c The median	352
d Mean, mode and median	354
e Using computers to determine central tendency	355
3 Measures of dispersion:	356
a Introduction	356
b Variance and standard deviation	356
c Computation of variance and standard deviation	358
d The range	361
4 Other measures:	363
a Standard scores	363
b <i>t</i> -scores	363
16 Associations	366
A CORRELATION:	366
1 Introduction	366
2 Overview of relevant options	367
3 Nominal measures of association:	368
a Yule's <i>Q</i>	368
b Other measures used for nominal data	369
4 Ordinal measures of association:	370
a Spearman's rank-order correlation coefficient	371
b Other measures used for ordinal data	375
5 Interval/ratio measures of association:	375
a Pearson's product-moment correlation coefficient	375
b Coefficient of determination	378
B REGRESSION AND PREDICTION	379

17 Tests of Significance	382
1 Introduction	382
2 Tests of significance: an overview	384
3 Nominal-level tests:	384
a The chi-square test	385
b The \emptyset -coefficient, contingency coefficient and Cramer's \emptyset	391
c Other nominal-level tests	393
4 Ordinal-level tests:	394
a The Kolmogorov-Smirnov test	394
b The Wald-Wolfowitz runs test	396
c The Mann-Whitney U test	397
d The sign test	399
e The Wilcoxon test	400
f The Kruskal-Wallis H -test	402
g The Friedman test	403
5 Interval/ratio tests:	405
a The z -test	406
b The t -test	407
6 Analysis of variance (ANOVA)	413

Part IV: Publication

18 Reporting	421
1 Introduction	421
2 Structure and content:	422
a The main body of the report	422
b Other sections of the report	424
3 Presentation	424
4 Size	425
5 Self-assessment:	425
a The abstract	425
b The main body of the report	425
c The references/bibliography	426
d General	426
6 The book	427
7 Obstacles to publication	428
Glossary	430
Bibliography	441
Index	453
