Abstract	7
Zusammenfassung	7
1. INTRODUCTION	9
2. CHINA, THE ENERGY GIANT	9
2.1 Energy production	9
2.2 Energy use	13
2.3 Local environmental damages from energy production and consumption	15
3. VOLUME OF FOREIGN DIRECT INVESTMENT IN THE CHINESE ENERGY SUPPLY SECTOR AND BARRIERS TO ITS EXPANSION	16
4. CHINESE CLIMATE POLICY AND CDM PROJECTS	19
4.1 Chinese climate policy	19
4.2 Climate cooperation – JI, AIJ and CDM	21
4.3 U.S.-China climate policy Co-operation	22
4.4 EU energy and climate policy co-operation with China	23
4.5 Japanese climate co-operation	24
5. OPTIONS FOR A COMBINATION OF CDM WITH COMMERCIAL ACTIVITIES IN CHINA	26
5.1 Energy supply	26
5.1.1 Upgrading of existing and new coal-fired power stations	26
5.1.2 Capture of coalbed methane	28
5.1.3 Electricity and natural gas import from Russia	28
5.1.4 Renewable energy	29
5.2 Energy demand	31
5.3 Overarching programmes	34
6. CONCLUSIONS: CHANCES AND RISKS OF ENERGY-RELATED CDM PROJECTS IN CHINA	35
6.1 Opportunities	35
6.2 Risks	35
