

TABLE OF CONTENTS

SUMMARY AND RECOMMENDATIONS	7
Chapter 1 INTRODUCTION	11
Chapter 2 TAXES, BENEFITS AND CHANGES IN THE LABOUR MARKET	13
Chapter 3 THE UNEMPLOYMENT TRAP	17
3.1 Replacement rates	17
3.1.1 Have unemployment benefit systems become more generous?	17
3.1.2 Taxation and typical net replacement rates	21
3.1.3 Typical net replacement rates for different family types	24
3.1.4 Housing support and typical net replacement rates	26
3.1.5 Social assistance benefits and typical net replacement rates	27
3.1.6 Replacement rates at different earnings levels	28
3.1.7 Duration of benefits	29
3.1.8 The distribution of work incentives over the population	30
3.1.9 Are replacement rates ‘too high’?	35
3.2 Other barriers to work rooted in the tax and benefit system	37
3.2.1 Other out-of-work benefits and unemployment benefits	37
3.2.2 Incomes and expenses in and out of work	38
3.2.3 Cash-flow and the transition to work	42
3.2.4 Uncertainty and the transition to work	43
3.3 Policy responses to promote employment	44
Chapter 4 THE POVERTY TRAP AND HIGH MARGINAL EFFECTIVE TAX RATES	47
4.1. What causes high METRs?	47
4.2. Who faces high METRs?	49
4.3 High METRs and the labour market	50
4.4 The poverty trap	51
4.5 Employment-conditional benefits and tax credits	53
4.5.1 The structure of schemes in OECD countries	53
4.5.2 Labour-market-incentive effects	54
4.5.3 Issues in scheme design	55
4.6 Taxation and high METRs	57
4.7 Tax and benefit systems and part-time work	58
4.8 Tax and benefit systems and casual work	60
4.9 Policy responses to reduce high METRs and tackle the poverty trap	62

<i>Chapter 5</i>	TAXES, BENEFITS AND THE COST OF LABOUR	65
5.1	The problem.....	65
5.2	Policy responses to reduce the cost of hiring low-wage workers.....	69
<i>Chapter 6</i>	TRADE-OFFS IN TAX AND BENEFIT REFORMS	71
6.1	Simulation 1: Reducing unemployment benefits by one fifth.....	72
6.1.1	Effects on labour market incentives.....	72
6.1.2	Distributional and revenue effects.....	72
6.1.3	Assessment.....	72
6.2	Simulation 2: Reducing benefit reduction rates by 20 percentage points.....	72
6.2.1	Effects on labour market incentives.....	72
6.2.2	Distributional and revenue effects.....	73
6.2.3	Assessment.....	74
6.3	Simulation 3: The effects of employment-conditional tax credits and benefits.....	74
6.3.1	Effects on labour market incentives.....	74
6.3.2	Distributional and revenue effects.....	75
6.3.3	Assessment.....	75
6.4	Simulation 4: Family or individual taxation?.....	75
6.4.1	Effects on labour market incentives.....	75
6.4.2	Distributional and revenue effects.....	76
6.4.3	Assessment.....	76
6.5	Simulation 5: Restructuring social security contributions.....	76
6.5.1	Effects.....	76
6.5.2	Assessment.....	77
6.6	Evaluating policy trade-offs.....	77
<i>Chapter 7</i>	CONCLUSIONS	79
<i>Annex 1</i>	MEASURING INCENTIVES	81
<i>Annex 2</i>	REPLACEMENT RATE CALCULATIONS	83
<i>Annex 3</i>	DESCRIPTION OF MICROSIMULATION MODELS	85
