## LIST OF FIGURES

---

1.1	The problem of unemployment, actual and perceived	2
1.2	Unemployment and vacancies, 1954–1989	3
1.3	Location of SCEL I towns	6
2.1	Change in primary sector industries, 1971–1981, in six areas	48
2.2	Change in manufacturing sector industries, 1971–1981, in six areas	50
2.3	Change in service sector industries, 1971–1981, in six areas	52
2.4	Change in construction, 1971–1981, in six areas	53
2.5	Level of unemployment in the six localities, 1960–1988	54
2.6	Risk of unemployment (smoothed) by age	56
3.1	A recursive determination model	74
3.2	Proportion of variance in Hope–Goldthorpe scale explained by prior characteristics and subsequent experiences, men	78
3.3	Proportion of variance in (logged) months of unemployment, men, all cohorts	94
3.4	Proportion of variance in (logged) months of unemployment, women, all cohorts	95
3.5	Explaining unemployment, men, proportion of variance explained by national unemployment this year (unsmoothed)	97
3.6	Explaining unemployment, men, proportion of variance explained by national unemployment this year (smoothed)	98
3.7	Explaining unemployment, men, proportion of variance explained by national unemployment this year (smoothed)	100
3.8	Explaining unemployment, women, proportion of variance explained by national unemployment this year (smoothed)	101

3.9	Explaining unemployment, men: proportion of variance explained by Hope–Goldthorpe score last year	103
3.10	Explaining unemployment, women: proportion of variance explained by Hope–Goldthorpe score last year	104
3.11	Explaining unemployment, men: proportion of variance explained by unemployment in years 1 and 2	107
3.12	Explaining unemployment, women: proportion of variance explained by unemployment in years 1 and 2	108
3.13	Explaining unemployment, men: proportion of variance explained by long-term unemployment history	109
3.14	Explaining unemployment, women: proportion of variance explained by long-term unemployment history	110
3.15	Explaining unemployment, men: proportion of variance explained by whether unemployed last year	111
3.16	Explaining unemployment, women: proportion of variance explained by whether unemployed last year	112
5.1	Husbands' unemployment and wives' employment, all areas, 1970–1986, for two age cohorts of wives	167
5.2	Husbands' unemployment and wives' employment, all areas, 1970–1986, by whether or not husband was unemployed in 1986	170
5.3	Representation of residual heterogeneity as Normally distributed with end-points (the 'mover–stayer' formulation)	171
6.1	GHQ scores for clusters and unemployed	201
6.2	Changes in GHQ scores for men unemployed at first survey	205
6.3	Changes in GHQ scores for women unemployed at first survey	206

## LIST OF TABLES

---

2.1	Unemployment rate by ethnic group	57
2.2	Risk of unemployment in different educational categories	58
2.3	Household composition by employment status of respondent	59
2.4	Six study areas compared with national pattern on indicators of economic health	60
2.5	Migration experience of adults in six study areas	60
2.A1	Detailed industrial change in the study localities, 1971–1981	64–5
3.1	Factors accounting for current occupational status level, Hope–Goldthorpe score, men, entry cohort 1961–1971	76
3.2	Factors accounting for current occupational status level, Hope–Goldthorpe score, women, entry cohort 1961–1971	80
3.3	Risk of unemployment by work history characteristics, men, entry cohort 1961–1971	82
3.4	Explanatory power of alternative measures of previous unemployment experience by years since entry to the work-force, men, entry cohort 1961–1971	85
3.5	Risk of unemployment by work history characteristics, men, entry cohort 1946–1956	88–9
3.6	Explanatory power of alternative measures of previous unemployment experience by years since entry to the work-force, women, entry cohort 1961–1971	90
3.7	Employment rate by family characteristics, women, entry cohort 1961–1971	91
3.8	Estimated mean months of unemployment per year by occupational status	105
4.1	Average number of jobs	119

4.2	Regression of number of jobs involving a change of employer	120
4.3	Duration of longest job: mean number of months	121
4.4	Employment commitment by type of unemployment	125
4.5	Employment deprivation by type of unemployment	127
4.6	Logistic regression: parameter estimates for the odds of employment commitment	130
4.7	Regression on index of employment deprivation	132
4.8	Logistic regression: parameter estimates for the odds of pay flexibility	134
4.9	Logistic regression: parameter estimates for the odds of skill flexibility	135
4.10	Logistic regression: parameter estimates for the odds of geographical flexibility	136
4.11	Determinants of job acquisition, all unemployed	141
4.12	Determinants of job acquisition, male unemployed	142
4.13	Determinants of job acquisition, female unemployed	143
4.14	Determinants of job acquisition amongst the unemployed seeking work	144
4.15	Determinants of job acquisition amongst the unemployed claiming benefits but not seeking work	147
4.16	Reasons for not looking for work amongst claimant non-seekers	148
5.1	Characteristics of partnerships, SCCL Household/Community Survey, 1987	162
5.2	Manual and non-manual occupations of husbands and wives by economic status of husbands, 1987	163
5.3	Economic status of husbands and wives, 1987 and 1982	165
5.4	Economic status of wives by net monthly income of husbands	166
5.5	Summary of model calibration results	175
5.6	Parameter estimates for Normal-Logistic model with end-points	177
5.7	Additional parameter estimates for Rochdale and all localities analyses	179
5.8	Employment shortfall percentages from calibrated models	182
6.1	Labour market effects on psychological health	189

6.2	Percentages of employees reporting that there was 'any chance at all of losing your job and becoming unemployed in the next twelve months'	204
7.1	Jahoda items by employment status	217
7.2	Jahoda scores by sociability	219
7.3	Men's and women's GHQ by levels of access to Jahoda categories of experience	221
7.4	Explaining SCEL men's and women's GHQ scores	222
7.5	Explaining women's GHQ scores: effect parameters	224
7.6	Explaining men's GHQ scores: effect parameters	225
7.7	Explaining the GHQ scores of unemployed men, married or cohabiting	227
7.8	Explaining the GHQ scores of unemployed and non-employed women, married or cohabiting	228
8.1	Methods of financial allocation used in households in which one or both partners were unemployed	235
8.2	Logistic regression of the female whole-wage system	237
8.3	Household labour market position and organization of domestic work	239
8.4	Domestic division of labour by household labour market situation, time budget diary estimates	241
8.5	Changes in the domestic division of labour since husband's unemployment	242
8.6	Leisure activities by employment status, men	245
8.7	Leisure activities by employment status, women	246
8.8	Overall leisure activity scores by partnership status	247
8.9	Changes in activities with unemployment	248
8.10	Comparison of time use, men, employed and unemployed, controlling for income and age	250
8.11	Comparison of time use, women, employed and unemployed, controlling for income and age	251
8.12	Extra household sociability by partnership status	252
8.13	Change in frequency in seeing non-household friends with unemployment	253
8.14	Friendship networks by employment status	254
8.15	Social support outside household	256
8.16	Satisfaction with family life by sex and domestic division of labour	259
8.17	Satisfaction with social life by sex, partnership status, and sociability	260

8.18	Psychological distress scores by sex and partnership status	261
9.1	Parameter estimates for the Basic Model	275
9.2	Parameter estimates for the Unemployment Model	283
9.3	Parameter estimates from a proportional hazards model using an index constructed from dissolution-related factors	285
9.4	Unemployment events of 896 respondents whose first marriages dissolved in the calendar year of dissolution and the years preceding and following it	286
9.5	Periods of unemployment in the years preceding and following the year of marital dissolution for 896 respondents whose first marriages ended in dissolution	286
9.6	Unemployment events in the twelve months preceding and following the month of marital dissolution for respondents whose month of marital dissolution was recorded	287
9.7	Case-control study results, men	290
9.8	Case-control study results, women	293-4
10.1	Labour market experience	302
10.2	Labour market experience and gender	303
10.3	Labour market experience and class	304
10.4	Labour market experience by area	306
10.5	Labour market experience and financial deprivation	310-11
10.6	Labour market experience and financial deprivation	312
10.7	Labour market experience and psychological well-being	314
10.8	Labour market experience and self-rated physical health	315
10.9	Labour market experience and use of health services	316
10.10	Labour market experience and items in the index of collectivism	318-19
10.11	Labour market experience and collectivism	322
10.12	Collectivism and class	323
10.13	Labour market experience, collectivism, and class	324
10.14	Area, party preference, and collectivism	326
10.15	Labour market experience, party preference, and collectivism	328
10.16	Regression on collectivism	330

10.17	Changes in attitudes to redistributive expenditure, 1986–1987	332
A1	The Work Attitudes/Histories Survey, 1986, achieved sample	338
A2	The Household and Community Survey, 1987, achieved sample by characteristics at time of Work Attitudes/Histories Survey	342
A3	The Baseline Employer sample	344
