

TABLE OF CONTENTS

Chapter 1. The Importance, Scope and Measurement of Human Capital	
1. Growing interest in human capital	7
2. The strategic role of human capital investment	8
3. Defining the scope of human capital	9
4. Analysis and measures	10
References	13
Chapter 2. Measuring the Stock of Human Capital	
1. Three approaches to measuring human capital stock	15
2. Measuring educational attainment	16
3. Measuring adult skills directly	22
4. Estimating the market value of human capital	28
5. Beyond individual characteristics	29
6. Conclusions	30
References	34
Chapter 3. Investment in Human Capital	
1. Measuring the resources invested	35
2. Financial measures of investment	36
3. Time investment: measuring participation	42
4. Conclusions	48
References	51
Chapter 4. Returns to Investment in Human Capital	
1. Benefits, costs and returns	53
2. Evidence of benefits of investment in human capital	54
3. Calculating rates of return	68
4. Conclusions	73
References	76
Chapter 5. Improving the Knowledge Base: Indicators, Data and Research Needs	
1. Identifying the principal gaps	81
2. From measuring participation in education and training to measuring human capital	82
3. Comparing investment costs with benefits	84
4. The cost of data collection	88
5. Conclusion: balancing measurement and understanding	89
References	90
Chapter 6. Human Capital Investment: Policy Issues and Questions	
1. The policy context	91
2. Five policy issues	92
Annex: Data for the figures	97

LIST OF FIGURES

- 2.1. Two measures of educational attainment of the adult population
- 2.2. Percentage of younger (25-34 year olds) and older adults (45-54) with upper secondary education or higher, 1995
- 2.3. Adults performing above and below an adequate threshold of literacy, 1994-95
- 2.4. Literacy levels of workers in different economic sectors
- 2.5. Adult literacy and educational attainment
- 3.1. Spending on education relative to national income, 1994
- 3.2. Average expected years of formal education, 1995
- 3.3. Percentage participation of employed adults (aged 25-64) in job-related training, 1994-95
- 3.4. Average duration of job-related training undertaken by employed adults aged 25-64, 1994-95
- 4.1A. Percentage of women aged 30-44 in employment, by level of educational attainment, 1995
- 4.1B. Expected years of unemployment over a working lifetime, by level of educational attainment for men aged 25-64, 1995
- 4.2. Education and earnings of persons aged 30-44, 1995
- 4.3. Costs and benefits of human capital investment
- 4.4. Annual rates of return to education

LIST OF TABLES

- 2.1. Number of research and development employees per 10 000 individuals in the labour force, 1994
- 3.1. Public expenditures on labour market training programmes in OECD countries, 1995
- 3.2. Expenditure on vocational training as a percentage of total labour costs
- 3.3. Participation in continuing education and training by adults: summary of results from the *International Adult Literacy Survey* in 1994-95
- 4.1. Impact of educational attainment, literacy and labour market experience on earnings
- 4.2. Impact of continuing education and training and enterprise flexibility on performance of workers and enterprises: summary of results from recent surveys and analyses
- 4.3. Selected evaluations of the effectiveness of labour market training and employment programmes
- 5.1. A framework for assessing costs and benefits of human capital investment
