PREFACE

vii

PART I: METHODOLOGY AND PERSPECTIVE

1	INTRODUCTION	3
1.1	The Research Problem	3
1.2	The FAR project	5
1.2.1	Aim of the Study	5
1.2.2	Research Questions and Activities	7
1.3	Structure of the Study	8
2	A SYNTHETIC RESEARCH APPROACH	11
2.1	In Search of a Disciplined Methodology	11
2.2	The Analytical Research Approach	12
2.3	The Clinical Research Approach	13
2.4	The Synthetic Research Approach	15
2.4.1	The Product	17
2.4.2	The Process	18
2.5	The Synthetic Research Design	20
3	A REVISION OF MANAGEMENT AND ORGANIZATION	25
3.1	Flexibility as a New Management Challenge	25
3.2	Changes in the Environment of Organizations and its Management	26
3.3	Changes in Dominant Thoughts on Management	29
3.4	A Postmodern Management Perspective	36

PART II: ON THE CONCEPT OF FLEXIBILITY

4	FLEXIBILITY, HALLMARK OF POSTMODERN ORGANIZATION: A THEORETICAL EXPOSÉ	41
4.1	Exploring Various Theoretical Perspectives	41
4.2	Theories of Strategic Management	42
4.2.1	The Linear Model: Planning Strategies	42
4.2.2	The Adaptive Model: Preparedness Strategies	45
4.2.3	The Interpretative Model: Strategies of Context	48
4.2.4	Contributions of Strategic Management	49
4.3	Contingency Theories	51
4.3.1	Static Contingency Theory	51
4.3.2	Population-Ecology Theory	53
4.3.3	Dynamic Contingency Theory	55
4.3.4	Contributions of Environment-Organization Theories	59

4.4	Organizational Learning Theories	60
4.4.1	Single-Loop Learning: Limited Search	61
4.4.2	Double-Loop Learning: Expanded Search	63
4.4.3	Deutero-Learning: Balancing Single-Loop and Double-Loop Learning	65
4.4.4	Contributions of Learning Theories	65
4.5	Theories of Innovation and Entrepreneurship	66
4.5.1	Incremental Innovations promoted by Austrian Entrepreneurs	70
4.5.2	Radical Innovations promoted by Schumpeterian Entrepreneurs	71
4.5.3	Complementarity of Incremental and Radical Innovations and their Associated Modes of Entrepreneurship	73
4.5.4	Contributions of Theories of Innovation and Entrepreneurship	76
4.6	Tensions within Theories: The Paradoxical Nature of Flexibility	77
4.6.1	Change and Preservation: The Risk of Schismogenesis	78
4.6.2	Four Generic Ways of dealing with the Flexibility Paradox	79

5 GRASPING THE PARADOX OF FLEXIBILITY:

	A SYSTEMATIC AND MULTIDIMENSIONAL PICTURE OF FLEXIBILITY	83
5.1	An Inquiry into Definitions of Flexibility	83
5.2	A Comparison of Definitions of Flexibility	84
5.2.1	A Review of Definitions	85
5.2.2	An Evaluation of Definitions: Similarities and Differences	90
5.3	Organizational Flexibility and Systems Theory of Control	97
5.3.1	Flexibility from Different Control Perspectives: The First Half of the CO-TS Game	103
5.3.2	Flexibility in terms of Properties of Control	105
5.3.3	Organizational Flexibility as a Two-Dimensional Concept: A Comprehensive Definition	108
5.3.4	Reconsidering the Management and Organization Design Task of Flexibility: The Second Half of the CO-TS Game	112

	TOWARDS A CONCEPTUAL MODEL OF ORGANIZATIONAL FLEXIBILITY	117
6.1	Variations in Organizational Flexibility	117
6.2	The Management Challenge	118
6.2.1	The Flexibility Characteristic and Flexibility Mix	119
6.2.2	Different Types of Flexibility	119
6.2.3	The Metaflexibility	123
6.3	The Organization Design Challenge	127
6.3.1	The Organizational Technology	129
6.3.2	The Organizational Structure	139
6.3.3	The Organizational Culture	168

6.4	Environmental Turbulence	188
6.4.1	Conceptualization of Environment: Levels of Aggregation and Decomposition	189
6.4.2	Dimensions of Environmental Turbulence	192
6.5	A Conceptual Model of Organizational Flexibility	198
6.5.1	A Taxonomy of Organizational Flexibility	199
6.5.2	Basic Assumptions of the Conceptual Model: Theoretical Propositions and Hypotheses	202

PART III: THE PROCESS OF FLEXIBILITY IMPROVEMENT

7	THE FLEXIBLE FORM: ONGOING PROCESSES TO OVERCOME RIGIDITY AND CHAOS	207
7.1	A Permanently Flexible Form: a Utopia?	207
7.2	An Organizational Typology	208
7.3	Trajectories of Transformation	211
7.4	The Natural Trajectory of Routinization	212
7.5	The Reverse Trajectory of Revitalization	215
8	THE FLEXIBILITY AUDIT & REDESIGN METHOD	221
8.1	Clinical Understanding of the Flexibility Process	221
8.2	A Global 'Thinking Model'	222
8.3	Blind Spots in Consulting Processes	227
8.3.1	The Basic Attitude and Client-Consultant Relationship	228
8.3.2	Design Concepts	229
8.3.3	Design Approaches: Engineering versus Developing	231
8.4	A Process Model of Flexibility Improvement: the FAR Method and its Observation and Analysis Instruments	233
8.4.1	Orientation	236
8.4.2	Diagnosis	239
8.4.3	Redesign	246
8.5	FARSYS I & II	249

PART IV: THE METHOD IN PRACTICE

9	THE FAR PROJECT - A MULTI-CASE LONGITUDINAL STUDY	253
9.1	Selection of Cases: Theoretical Sampling	253
9.2	The Case Study Protocol	256
9.3	Case X: Professional Revitalization of Administrative Department Corporate Accounts	261
9.4	Case Y: Entrepreneurial Revitalization of Assembly Department Glass-Bead Diodes	275
9.5	Case Z: Strategic Focusing of the Professional Service Department Gas Research	295
9.6	An Evaluation of the Empirical Claims and Underlying Hypotheses of the FAR Method	315

10	CONCLUSIONS AND RESEARCH IMPLICATIONS	321
10.1	The State of Knowledge of Synthetic Research	321
10.2	The FAR Method in Perspective: Suggestions for Further Research	322
10.3	Rigor or Relevance	326
