Preface	v
1 Introduction	1
1.0 Motivation	1
1.1 Outline	3
2 Structure of the Direct and Cost and Revenue Restricted Technology	5
2.0 Introduction	5
2.1 The Parent Technology	6
2.2 The Cost Restricted Technology	13
2.3 The Parent and Indirect Technologies: A First Comparison	17
2.4 The Revenue Restricted Technology	20
Appendix: Cost and Revenue Functions	23
2.P Problems	30
Notes	31
3 Representations of Technology	33
3.0 Introduction	33
3.1 The Direct and Indirect Output Distance Functions	35
3.2 The Direct and Indirect Input Distance Functions	45
3.3 Piecewise Linear Models	53
3.P Problems	61
Notes	62
4 Indirect Revenue Maximization, Indirect Cost Minimization and Profit Maximization	63
4.0 Introduction	63
4.1 Revenue Maximization	64
4.2 Cost Minimization	74
4.3 Profit Maximization	82
Appendix: Cost and Revenue Dualities	85
4.P Problems	86
Notes	87

5	Applications of Duality	88
5.0	Introduction	88
5.1	Dualities Between Direct and Indirect Production	89
5.2	Shadow Pricing Inputs and Outputs	94
5.3	Scale Elasticity and Returns to Scale	103
5.P	Problems	107
	Notes	108
6	Efficiency Gauging	109
6.0	Introduction	109
6.1	Indirect Input and Output Technical Efficiency Measures	110
6.2	Decomposition of Indirect Efficiency	114
6.3	Calculating Efficiency: Nonparametric Approach	119
6.4	Calculating Efficiency: Parametric Approach	125
6.P	Problems	130
	Notes	131
7	Productivity	132
7.0	Introduction	132
7.1	Malmquist Productivity Indexes	134
7.2	Piecewise Linear Calculation of Productivity	137
7.3	Parametric Calculation of Productivity	144
7.4	The Fisher Ideal Index Approach to Productivity Measurement	151
7.5	The Törnqvist Index Approach to Productivity Measurement	158
	Appendix: The Translog Identity	160
7.P	Problems	160
	Notes	161
	Appendix A: Standard Notations and Mathematical Appendix	162
	References	165
	Index	168
