Preface	ix
<b>I Modeling the Economics of Climate Change</b>	
1 Introduction	3
2 The Structure and Derivation of the DICE Model	7
3 Macrogeophysics: Derivation of the Climate and Carbon-Cycle Equations	23
4 Geoeconomics: Energy, Emissions, and the Economic Impact of Climate Change	49
<b>II Model Results</b>	
5 Analysis of Policies to Slow Global Warming	77
<b>III Risk and Uncertainty in Policy toward Climate Change</b>	
6 Sensitivity Analysis of the DICE Model	101
7 Formal Sensitivity Analysis: Estimation of Uncertainty in Climate Change	137
8 Decision Analysis and the Value of Information	169
Appendix: Computer Program for the DICE Model	191
References	199
Index	205
