	Preface	xi
Part One	What Managing Quality Means	1
	1 What is quality, and how can it be managed?	3
	Introduction	3
	Where quality is today	3
	The meaning of quality	4
	Quality 'grade' and quality 'level'	6
	Industrial quality: specification and contract	7
	Measuring quality	8
	Quality in service industries	9
	The management of quality	11
	The quality management system	15
	2 Quality in marketing	18
	Defining quality	18
	Planning is essential	21
	Good communications are important	24
	Market readiness	25
	Conclusion	26
	3 Quality in specification and design	27
	Introduction	27
	Design	27
	Some important aspects of design	39
	Products of the design process	43
	Management of change	43
	Value engineering	43
	Conclusions	44
	4 Quality in purchasing	45
	Introduction	45
	Evaluating suppliers	45
	Procuring supplies	49
	Good purchasing data – now what?	51

	Supplier evaluation	56
	Conclusions	60
5	Quality in production	61
	Introduction	61
	Planning – the key to quality	61
	Documentation	64
	Control of manufactured items and of manufacturing processes	65
	Adjustment of corrective action	69
	Manufacturing control	70
	Records	71
	Role of quality assurance in manufacturing	71
	Quality manager's department	72
	Conclusion	74
6	After-sales quality	75
	Introduction	75
	Storage, packing and delivery	75
	Marketing and servicing	78
	Maintenance	83
	Resolving customer queries and complaints	85
	Summary	88
Part Two	Quality Assurance Techniques	91
	Introduction	91
7	Creating the quality system	93
	Introduction	93
	Planning for quality	93
	The quality system	97
	Corrective actions to improve quality	101
	The importance of a quality system standard	103
8	ISO 9000 – the international quality standard	107
	Introduction	107
	The international standard for quality systems	107
	Elements of a quality system: ISO 9001	112
	Guidance for the use of ISO 9000 series documents	120
9	Quality auditing techniques	121
	Introduction	121
	Quality auditing	121
	Product, process and service quality audits	123
	Auditing the quality system	125
	Conducting a formal quality system audit	127
	The auditor	129

10	Inspection techniques	132
	Introduction	132
	Inspection	132
	Frequency of inspection	136
	Who carries out the inspection?	139
	Measurement and calibration	140
	Calibration systems	142
11	Statistical sampling inspection	145
	Introduction	145
	Statistical frequency distributions	145
	Statistical acceptance sampling	148
	Tables for sample inspection by variables and by attributes	148
12	Statistical process control	155
	Introduction	155
	Statistical quality control	155
	Control charting technique	161
	Statistical design of experiments	164
	Designing for yield and process control	166
13	The place of the computer	168
	Introduction	168
	Electronic computer system equipment	168
	The design and control of computer software	169
	Computer applications within the business	173
	Applications of computers within the QA department	175
	Summary	179
14	Reliability assurance	180
	Introduction	180
	What is reliability?	180
	Reliability and the market-place	182
	Organizing to achieve reliability	185
	Reliability of a system	188
	A reliability and maintainability programme	190
	Failure mode, effects and criticality analysis	192
	Summary	194
Part Three	Using People More Effectively	195
	Introduction	195
15	The sociology of people at work	197
	Introduction	197
	The team	197

Scientific management	197
Examples of Taylor's experiments	198
The Hawthorne experiments	200
Theories of human motivation	202
A people-based philosophy	205
Summary	207
16 Motivate or involve?	210
Introduction	210
Motivation or participation?	210
Zero defects	214
Quality circles	217
Similarities and distinctions between quality circles and zero defects	221
17 American quality 'gurus'	222
Introduction	222
Introducing the 'gurus'	222
Crosby	223
Deming	226
Juran	229
Shainin	231
18 Japanese quality management style	233
Introduction	233
The Japanese business	233
How are the Japanese companies managed?	235
Japanese quality authorities	239
Summary	244
19 Quality in the United Kingdom	245
Introduction	245
Quality in the United Kingdom	245
Leadership and quality management in industry in the United Kingdom	245
Working for Japanese companies	248
United Kingdom 'gurus'	252
BS 5750: a standard for quality management systems	255
20 Total quality management	260
Introduction	260
Total quality management	260
The quality chains	262
Quality in all functional departments	265
Three major components of TQM	267
Planning the implementation of TQM	268
A model for TQM	270

	The 'mind-set'	272
	Conclusion	272
21	Quality managers and their departments	274
	Introduction	274
	The management representative for quality	274
	The quality assurance function	278
	QA department personnel	286
22	Quality in service industries	290
	Introduction	290
	Material and personal services	291
	ISO 9000 Guidelines for Services	292
	Quality in marketing a service	294
	Analysis and improvement of service performance	297
Part Four	Quality – the Key to Prosperity	299
	Introduction	299
23	Ways of looking at quality-related costs	301
	Introduction	301
	The importance of measuring quality	301
	Different ways of looking at quality-related costs	303
	Total loss to society	304
	The process cost model	305
	The concept of economic quality	307
	Summary	311
24	The prevention-appraisal-failure model	312
	Introduction	312
	The cost of quality	312
	Prevention costs	314
	Appraisal costs	316
	Failure costs	317
	Collecting quality cost information	319
	Monitoring quality costs	323
	Presenting and using quality cost information	325
	Summary	327
25	Just-in-time and variability reduction	328
	Introduction	328
	Cost savings of prevention	328
	Just-in-time	331
	Compatibility of design with manufacturing capability	336
26	Quality, safety and product liability	343
	Introduction	343
	Quality, safety and consumerism	343

The European Community Directive on Product Liability	344
Risk minimization	346
Product safety and liability in ISO 9000	352
27 The international market-place	354
Introduction	354
Winner takes all!	354
The single European market	356
Best practice benchmarking	362
Learning through other companies' experiences	363
Benefits of BPB	364
28 Quality trends, challenges and opportunities	365
Introduction	365
Quality trends, challenges and opportunities	365
Appendix: British Standards mentioned in the text	368
References	371
Index	373
