| Figures and tables | vii |
| Preface | ix |
| 1 Technology in industry | 1 |
| <i>The economic dimension</i> | 1 |
| <i>The social dimension</i> | 3 |
| <i>National differences</i> | 4 |
| <i>The challenge for firms</i> | 8 |
| 2 Technological collaboration in industry | 10 |
| <i>What is collaboration?</i> | 10 |
| <i>The extent of collaboration</i> | 14 |
| <i>The focus of collaboration</i> | 17 |
| <i>Conclusions</i> | 24 |
| 3 Why collaborate? | 25 |
| <i>An innovation perspective</i> | 25 |
| <i>A corporate perspective</i> | 30 |
| <i>A public policy perspective</i> | 36 |
| <i>An internationalization perspective</i> | 38 |
| <i>Conclusions</i> | 39 |
| 4 Theoretical approaches to collaboration | 41 |
| <i>Changing systems of production</i> | 42 |
| <i>Technology and innovation</i> | 43 |
| <i>Economic and competitive relations</i> | 46 |
| <i>Collaboration and learning</i> | 49 |
| <i>Conclusions</i> | 55 |
| 5 Collaboration and innovation – the case of biotechnology | 57 |
| <i>Collaboration and the innovation process</i> | 57 |
| <i>Evolution in new technology: the case of biotechnology</i> | 59 |
| <i>The institutional response: collaborative policies</i> | 63 |
| <i>Case Study: Celltech/American Cyanamid</i> | 65 |
| <i>Conclusions</i> | 69 |

| | | |
|-----------|--|-----|
| 6 | Collaboration and innovation – networks, intermediaries and standards | 71 |
| | <i>Regional networks</i> | 71 |
| | <i>Contract research organizations</i> | 74 |
| | <i>Standards</i> | 77 |
| | <i>Case Study: GEC Sensors – TID/Alcatel</i> | 79 |
| | <i>Conclusions</i> | 85 |
| 7 | Public policy and technological collaboration | 87 |
| | <i>Support for collaboration</i> | 87 |
| | <i>The ESPRIT programme</i> | 87 |
| | <i>The Eureka programme</i> | 89 |
| | <i>The Alvey programme</i> | 91 |
| | <i>Case Study: Racal Electronics</i> | 93 |
| | <i>Conclusions</i> | 99 |
| 8 | Corporate technology strategy | 100 |
| | <i>Technology strategy and collaboration</i> | 100 |
| | <i>Case Study: BT&D technologies</i> | 103 |
| | <i>Case Study: Quantel/SSL</i> | 108 |
| | <i>Conclusions</i> | 111 |
| 9 | Internationalization and technological collaboration | 113 |
| | <i>Internationalization of technology</i> | 113 |
| | <i>Case Study: Ricard/DLW</i> | 119 |
| | <i>Conclusions</i> | 125 |
| 10 | Technological collaboration in Japan | 126 |
| | <i>Collaboration in Japan</i> | 126 |
| | <i>Conclusions</i> | 136 |
| 11 | The collaborative technological activities of small firms | 138 |
| | <i>Small firm collaborations</i> | 138 |
| | <i>External linkages of SMEs</i> | 141 |
| | <i>Conclusions</i> | 149 |
| 12 | Management of technological collaboration | 150 |
| | <i>The management problem of inter-firm linkages</i> | 150 |
| | <i>Conclusions</i> | 161 |
| 13 | The new challenges of technological collaboration | 163 |
| | <i>Corporate challenges</i> | 163 |
| | <i>Public policy challenges</i> | 168 |

| | Index | 187 |

Figures and tables

FIGURES

| | | |
|------|--|-----|
| 2.1 | Growth of newly established technology cooperation agreements in general and in information technology | 17 |
| 2.2 | Mergers and alliances among semiconductor firms | 19 |
| 3.1 | The Fifth Generation Innovation Process | 26 |
| 3.2 | DTI expenditure on innovation support | 37 |
| 5.1 | The 'coupling' model of innovation | 58 |
| 5.2 | Conceptualization of technology | 68 |
| 9.1 | Geographical distribution of alliances | 116 |
| 9.2 | Agreements by region and function | 117 |
| 12.1 | Motives and contributions in the case studies | 155 |

TABLES

| | | |
|-----|--|----|
| 1.1 | R&D expenditure by performing sector | 5 |
| 1.2 | Trends in industry-funded R&D | 5 |
| 1.3 | The largest corporate R&D spenders | 6 |
| 1.4 | National technological positions | 7 |
| 2.1 | 1990–4 EC Framework Programme | 15 |
| 2.2 | Studies of technological agreements | 18 |
| 2.3 | Focus of international collaborations | 20 |
| 2.4 | Technological intensity of alliance | 22 |
| 3.1 | Major public IT programmes – 1980 to present | 34 |

| | |
|---|-----|
| 5.1 Number of international agreements by biotechnology companies | 60 |
| 7.1 What Alvey allowed industrial participants to do | 92 |
| 8.1 Technology diversity in large European firms | 102 |
| 9.1 Joint ventures in the Soviet Union and Hungary | 118 |
| 11.1a US small businesses active in some high technology areas, by industry | 139 |
| 11.1b Number of innovations for large and small firms in the most innovative industries | 139 |
| 11.2 Some modes of large and small firm interaction | 140 |
| 11.3 Large and small firm advantages in innovation | 142 |
| 11.4 Kinds of agreements in high technology companies | 143 |
| 11.5 Ways of relating to universities by size of company | 146 |
| 12.1 Six case studies of technological collaboration | 153 |
