Foreword by Peter M. Bentler	vii
Preface	x
Acknowledgments	xiii

Part 1: Introduction

1. Structural Equation Models	3
2. Using the EQS Program	23

Part 2: Single-Group Analyses

Part Overview: Confirmatory Factor Analytic Models

3. Application 1: Testing the Factorial Validity of a Theoretical Construct (First-Order CFA Model)	41
4. Application 2: Testing the Factorial Validity of a Measuring Instrument (First-Order CFA Model)	73
5. Application 3: Testing the Factorial Validity of a Measuring Instrument (Second-Order CFA Model)	98
6. Application 4: Testing for Construct Validity: The Multitrait-Multimethod Model	120

Part Overview:	
The Full Latent Variable Model	
7. Application 5: Testing the Validity of a Causal Structure	138
Part 3: Multiple-Group Analyses	
Part Overview:	
Confirmatory Factor Analytic Models	
8. Application 6: Testing for Invariant Factorial Structure of a Theoretical Construct (First-Order CFA Model)	159
9. Application 7: Testing for Invariant Factorial Structure of a Measuring Instrument (First-Order CFA Model)	177
10. Application 8: Testing for Invariant Latent Mean Structures	191
Part Overview:	
The Full Latent Variable Model	
11. Application 9: Testing for Invariant Causal Structure	214
Part 4: Window Treatments:	
A Look at EQS/Windows (Version 4)	
12. Introduction to EQS/Windows	229
13. Application 10: Preliminary Data-Screening Analyses	238
14. Application 11: Building an EQS Model File—Instantly!	258
