

# Contents

<b>1</b>	<b>Introduction to Models of Financial Markets</b>	<b>3</b>
1.1	Models of Financial Markets . . . . .	3
1.2	A Discrete One-Period Model . . . . .	5
1.3	Pareto Efficiency . . . . .	9
1.4	Attainable Set and Budget Sets . . . . .	14
1.5	Arbitrage Strategies . . . . .	17
1.6	Completeness . . . . .	19
<b>2</b>	<b>One-Period Equilibrium Price Measures</b>	<b>23</b>
2.1	Equilibrium Price Measures . . . . .	23
2.2	The Price Functional . . . . .	29
2.3	Risk and Return . . . . .	36
<b>3</b>	<b>A Discrete Multiperiod Model</b>	<b>48</b>
3.1	Elements of the Model . . . . .	48
3.2	Information Structures . . . . .	49
3.3	Informational Consistency . . . . .	53
3.4	Pareto Efficiency . . . . .	56
3.5	Completeness . . . . .	57
3.6	Value Processes . . . . .	65
3.7	Self-Financing Strategies . . . . .	69
<b>4</b>	<b>Multiperiod Equilibrium Price Measures</b>	<b>74</b>
4.1	Equilibrium Price Measures . . . . .	74
4.2	The Price Functional . . . . .	83
4.3	Attainable Set and Budget Sets . . . . .	87
<b>5</b>	<b>Discrete Stochastic Calculus</b>	<b>93</b>
5.1	Introduction . . . . .	93
5.2	Covariation Processes and Orthogonal Martingales . . . . .	94
5.3	Stochastic Integrals . . . . .	99
5.4	Change of Measure and Girsanov's Theorem . . . . .	105

5.5	Representation of Martingales . . . . .	111
5.6	The Doob Decomposition . . . . .	121
<b>6</b>	<b>Extensions of the Discrete Multiperiod Model</b>	<b>127</b>
6.1	Introduction . . . . .	127
6.2	A Simple Option Pricing Model . . . . .	128
6.3	An Explicit Option Pricing Formula . . . . .	133
6.4	Representation of Equilibrium Price Measures . . . . .	138
6.5	Completeness . . . . .	147
6.6	Risk and Return . . . . .	150
<b>7</b>	<b>The Wiener Process</b>	<b>156</b>
7.1	Introduction . . . . .	156
7.2	General Information Structures . . . . .	158
7.3	The Wiener Process . . . . .	164
<b>8</b>	<b>Itô Calculus</b>	<b>182</b>
8.1	Introduction . . . . .	182
8.2	The Itô Integral . . . . .	182
8.3	Properties of the Itô Integral . . . . .	189
8.4	Itô's Formula for the Wiener Process . . . . .	193
8.5	Representation of Martingales . . . . .	194
8.6	A Second Definition of the Itô Integral . . . . .	196
8.7	Itô Processes . . . . .	197
8.8	Stochastic Exponentials . . . . .	202
<b>9</b>	<b>The Black-Scholes Model</b>	<b>205</b>
9.1	Elements of the Model . . . . .	205
9.2	Completeness . . . . .	217
9.3	An Explicit Trading Strategy . . . . .	227
<b>10</b>	<b>Local Martingales and Semimartingales</b>	<b>232</b>
10.1	Introduction . . . . .	232
10.2	Local Martingales . . . . .	242
10.3	Maximal and Quadratic Spaces . . . . .	245
10.4	Orthogonal Local Martingales . . . . .	248
10.5	Predictable Processes . . . . .	250
10.6	Semimartingales . . . . .	254
10.7	Projections . . . . .	257
10.8	The Doob-Meyer Decomposition . . . . .	258
10.9	Quadratic Variation Processes . . . . .	259

<b>11 General Stochastic Calculus</b>	<b>268</b>
11.1 Lebesgue-Stieltjes Integrals . . . . .	268
11.2 Stochastic Integrals . . . . .	271
11.3 Itô's Formula . . . . .	281
11.4 Stochastic Exponentials . . . . .	282
11.5 Stable Spaces of Martingales . . . . .	285
11.6 Girsanov's Theorem . . . . .	287
<b>12 A Continuous Multiperiod Model</b>	<b>293</b>
12.1 Introduction . . . . .	293
12.2 Equilibrium Price Measures . . . . .	294
12.3 Elements of the Model . . . . .	296
12.4 Trading Strategies . . . . .	297
12.5 Completeness . . . . .	305
12.6 Risk and Return . . . . .	313
12.7 Representation of Risk Adjustment Processes . . . . .	318
12.8 Intermediate Consumption . . . . .	326
