

CONTENTS

EDITORS' NOTES	1
<i>Richard E. Anderson, Joel W. Meyerson</i>	
1. The Economic Outlook and What It Means for Colleges and Universities	5
<i>Richard E. Anderson, William F. Massy</i>	
College and university administrators should prepare for a decade or more of limited resources and a potentially convulsive economy.	
2. Considering the Extremes	19
<i>Troy Y. Murray</i>	
The range of risks facing colleges and universities extends well beyond a modest inflationary period or a short recession.	
3. Evaluating the Risks for Specific Institutions	23
<i>William Nordhaus</i>	
Administrators can and should evaluate the specific exposure of their institutions to economic risks.	
4. Investing in an Uncertain Economic Environment	39
<i>Timothy Dalton, Kenneth Greiner</i>	
In spite of the economic uncertainties, colleges and universities must invest for the long term. Certain techniques can reduce the risks and increase the returns.	
5. Asset-Liability Management in Higher Education: Lessons from the Financial Markets	57
<i>Aaron S. Gurwitz</i>	
Colleges and universities can borrow techniques from large financial organizations to protect both sides of their balance sheets.	
6. The Outlook for State Support of Higher Education	69
<i>Steven D. Gold</i>	
As we enter the 1990s, states are particularly vulnerable to an economic downturn. Policymakers will, however, look to higher education to support state economic growth.	
7. Higher Education and the Federal Government	83
<i>Suzanne H. Woolsey</i>	
Government and university leaders sometimes have trouble reaching agreements because they are so much alike.
