

Contents

PART I

Introduction: Scale and Scope	1
1 The Modern Industrial Enterprise	3
2 Scale, Scope, and Organizational Capabilities	14
The New Institution	14
Historical Attributes	18
Economies of Scale and Scope in Production	21
Economies of Scale and Scope in Distribution	28
Building the Integrative Hierarchy	31
First-Mover Advantages and Oligopolistic Competition	34
Continuing Growth of the Modern Enterprise	36
Horizontal and Vertical Combination	37
Geographical Expansion and Product Diversification	38
The Modern Enterprise in Labor-Intensive Industries	45

PART II

The United States: Competitive Managerial Capitalism	47
3 The Foundations of Managerial Capitalism in American Industry	51
The Domestic Market	51
The Impact of the Railroads and Telegraph	53
The Revolution in Distribution	58
The Revolution in Production	62
Branded, Packaged Products	63
Mass-Produced Light Machinery	65
Electrical Equipment	68
Industrial Chemicals	69
Metals	70

Merger, Acquisition, and Rationalization	71
Political and Legal Responses	78
The Response of Financial Institutions	79
The Response of Educational Institutions	82
The Coming of Competitive Managerial Capitalism	84
4 Creating Organizational Capabilities: Vertical Integration and Oligopolistic Competition	90
Oil: From Monopoly to Oligopoly	92
Creating the Monopoly	92
Changing Markets and Sources of Supply	96
Vertical Integration and Oligopolistic Competition	97
Rubber: A Stable Oligopoly	105
Industrial Materials: Evolutionary and Revolutionary Technological Change	110
Paper	112
Stone, Clay, Glass, and Cement	113
Fabricated Metals	119
Primary Metals: Technology and Industrial Concentration	121
Aluminum	122
Copper and Other Nonferrous Metals	124
Steel	127
Major Trends	140
5 Expanding Organizational Capabilities: Investment Abroad and Product Diversification in Food and Chemicals	146
Branded, Packaged Products: Foods, Consumer Chemicals, Tobacco	147
General Characteristics	147
Selecting the Players, 1880 to World War I	149
Continuing Investment in Marketing and Distribution	155
Expansion through Direct Investment Abroad	157
Continuing Growth through Diversification	161
Diversification through Merger	165
Perishable Products	166
Scope-Related Growth	168
Industrial Chemicals	170
General Characteristics	170
The Players Selected	172
Continuing Growth through Diversification	175
Diversification through Merger	178
The Du Pont Example	181
Diversification, Organizational Complexity, and Managerial Control	188
6 Expanding Organizational Capabilities: Investment Abroad and Product Diversification in Machinery	194
General Characteristics	194
Nonelectrical Machinery	196

The Players Selected	196
Continuing Growth through Expansion Abroad	199
Growth through Diversification	201
Transportation Equipment	205
The Players Selected	205
Expansion Abroad	208
Growth through Diversification	209
Electrical and Electronic Equipment	212
The Players Selected	212
Expansion Abroad	216
Growth through Diversification	217
Organizational Complexities and Managerial Control	221
The Dynamics of Modern Industrial Enterprise: The American Experience	224

PART III

Great Britain: Personal Capitalism	235
7 The Continuing Commitment to Personal Capitalism in British Industry	239
Underlying Differences	239
Prototypes of British Industrial Enterprise: Cadbury Brothers and Imperial Tobacco	242
Domestic and Foreign Markets	249
The Impact of the Railroads	252
The Revolution in Distribution	255
The Revolution in Production	261
Entrepreneurial Success: Branded, Packaged Products	262
Entrepreneurial Success: Rubber, Glass, Explosives, Alkalies, and Fibers	268
Entrepreneurial Failure: Machinery, Electrical Equipment, Organic Chemicals, Electrochemicals, and Metals	274
Accounting for Entrepreneurial Failure	284
Growth through Merger and Acquisition, British Style	286
Continuing Dominance of Personal Management	291
8 Creating Organizational Capabilities: Success and Failure in the Stable Industries	295
The Impact of World War I	295
The Modern Industrial Enterprise during the Interwar Years	297
Oil: The Creation of Organizational Capabilities	298
Rubber: The Enhancement of Organizational Capabilities	304
Industrial Materials: Organizational Capabilities Constrained by the Ways of Personal Management	306
Rayon	306
Stone, Clay, and Glass	311

	Paper	314	
	Metal Fabricating	316	
	Metal Making	320	
	Textiles	332	
	Costs of the Failure to Develop Organizational Capabilities	334	
9	Creating Organizational Capabilities: Success and Failure in the Dynamic Industries		337
	Machinery	338	
	Nonelectrical Machinery: Continuing Foreign Dominance	339	
	Transportation Equipment	340	
	Electrical Equipment: Catching Up	348	
	Industrial Chemicals	356	
	The Personally Managed Firms	356	
	Imperial Chemical Industries: Organizational Achievement	358	
	Branded, Packaged Products	366	
	The Bastion of the Family Firm	367	
	Expansion Overseas and Product Diversification	371	
	Perishable Products	375	
	Unilever: From Personal to Collective Management	378	
	Implications of the British Experience	389	

PART IV

	Germany: Cooperative Managerial Capitalism		393
10	The Foundations of Managerial Capitalism in German Industry		397
	Similarities and Differences	397	
	Two German Industrial Enterprises: Gebrüder Stollwerck and Accumulatoren-Fabrik AG	398	
	Domestic and Foreign Markets	409	
	The Impact of the Railroads	411	
	The Railroads and the New Financial Institutions	415	
	Changes in Distribution	419	
	The Legal and Educational Environment	423	
	The Coming of Cooperative Managerial Capitalism	426	
11	Creating Organizational Capabilities: The Lesser Industries		428
	The Second Industrial Revolution	428	
	Branded, Packaged Products: Limited Entrepreneurial Response	430	
	Other Lesser Industries: Effective Entrepreneurial Response	434	
	Oil: Late Challengers	435	
	First Movers, European Style: Rubber, Rayon, Alkalies, and Explosives	441	
	First Movers, American Style: Light, Mass-Produced Machinery	446	
	The German Entrepreneurial Response in the Lesser Industries	452	
	Textiles: A Labor-Intensive Industry	453	

12	Creating Organizational Capabilities: The Great Industries	456
	Nonelectrical Machinery: Exploiting Economies of Scope 456	
	Electrical Machinery: Exploiting Economies of Scale and Scope 463	
	Siemens and AEG: Creating Industrial Giants 464	
	Merger and Rationalization 467	
	Chemicals: Exploiting Economies of Scope 474	
	The Dye Makers: Creating Capabilities 474	
	The Dye Makers: Interfirm Cooperation 479	
	Other World Leaders in Pharmaceuticals, Agricultural Chemicals, and Electrochemicals 481	
	Metals: Exploiting Economies of Scale 486	
	First Movers in Nonferrous Metals 486	
	Steel: Europe's Leaders 488	
	Organizational Capabilities and Industrial Power 496	
13	War and Crises: Recovery in the Lesser Industries	503
	War and Postwar Crises 504	
	Impact on Interfirm Relationships 506	
	The Growth of I.G.'s and Konzerne 506	
	The Changing Role of Banks 512	
	Recovery in the Lesser Industries after Stabilization 513	
	Branded, Packaged Products and Textiles: Weak Recovery 514	
	Oil: Dismemberment 519	
	Rubber, Rayon, Alkalies, Explosives and Light Machinery: Strong Recovery 521	
	Transportation Equipment: A New Start 527	
	Recovery as a Function of Organizational Capabilities 531	
14	Recovery in the Great Industries	534
	Nonelectrical Industrial Machinery: Revival and Rationalization 535	
	Electrical Machinery 538	
	Rapid Recovery and Continued Modernization 539	
	The Evolving Structure of the Leaders 543	
	Metals 550	
	Steel: Merger, Rationalization, and Restructuring 550	
	Nonferrous Metals: The Return of Metallgesellschaft 561	
	Chemicals 563	
	The Formation of I.G. Farben 564	
	Rationalization at I.G. Farben 569	
	I.G. Farben's Changing Structure: Failure to Achieve Overall Control 573	
	The Independents 584	
	The German Experience: The Evolution of Cooperative Managerial Capitalism 587	
	Conclusion: The Dynamics of Industrial Capitalism	593
	Organizational Capabilities as the Core Dynamic 594	
	First Movers and Challengers 597	
	Challengers from Abroad and from Other Industries 601

Index	837

Tables

1. The world's industrial production, 1870–1938 4
2. Long-term changes in shares of major sectors in total output, United States, Great Britain, and Germany 5
3. Long-term changes in shares of subdivisions of the industrial sector in total output, United States, Great Britain, and Germany 6
4. Long-term changes in the sectoral distribution of the labor force, United States, Great Britain, and Germany 7
5. The world's largest industrial enterprises with more than 20,000 employees, by industry and country, 1973 19
6. The 200 largest industrial enterprises in the United States, by industry, 1917–1973 21
7. The 200 largest industrial enterprises in Great Britain, by industry, 1919–1973 22
8. The 200 largest industrial enterprises in Germany, by industry, 1913–1973 23
9. Population and GDP per capita at 1970 U.S. prices, United States, Great Britain, and Germany, 1870–1979 52
10. Manufacturers' domestic distribution channels and concentration ratios in materials industries, 1929–1954 111
11. Percentage of total output produced by U.S. Steel Corporation, 1901–1927 138
12. Manufacturers' domestic distribution channels and concentration ratios in labor-intensive industries, 1929–1954 142–143
13. Manufacturers' domestic distribution channels and concentration ratios in the food, tobacco, and consumer-chemical industries, 1935–1954 153
14. Establishment of manufacturing operations in Great Britain by U.S. industrial enterprises, 1900–1971 158
15. Establishment of manufacturing operations in Germany by U.S. industrial enterprises, 1900–1971 159
16. Method of U.S. firms' entry into Great Britain, 1900–1971 160
17. Method of U.S. firms' entry into Germany, 1900–1971 160
18. Changes in shares of branches of manufacturing in output of total manufacturing grouped by rapidity of growth in initial period, United States, 1880–1948 225–226

19. Production of steel ingots and castings, by process, Great Britain, United States, and Germany, 1875–1914 282
20. The largest industrial enterprises in Great Britain in 1919, 1929, and 1948 367
21. The most important railway transactions of the Darmstädter Bank and the Disconto-Gesellschaft 417–418
22. Product line of the Maschinenfabrik Augsburg-Nürnberg (MAN) in the late 1920s 461
23. Rationalization in the production of Vereinigte Stahlwerke (VSt), 1933 555
24. Share of the U.S. market in the personal computer industry, 1976–1982 612
25. Multinational enterprises, classified by structure and by diversity of products made abroad for 162 American industrial enterprises, 1966 614
- A.1. The 200 largest industrial enterprises in the United States, ranked by assets, 1917 638
- A.2. The 200 largest industrial enterprises in the United States, ranked by assets, 1930 644
- A.3. The 200 largest industrial enterprises in the United States, ranked by assets, 1948 651
- A.4. Turnover in the list of the 200 largest industrial enterprises in the United States in food, chemicals, and machinery, 1917, 1930, and 1948 658
- B.1. The 200 largest industrial enterprises in Great Britain, ranked by market value of shares, 1919 666
- B.2. The 200 largest industrial enterprises in Great Britain, ranked by market value of shares, 1930 673
- B.3. The 200 largest industrial enterprises in Great Britain, ranked by market value of shares, 1943 680
- B.4. Turnover in the list of the 200 largest industrial enterprises in Great Britain in food, chemicals, and machinery, 1919, 1930, and 1943 687
- C.1. The 200 largest industrial enterprises in Germany, ranked by assets, 1913 696
- C.2. The 200 largest industrial enterprises in Germany, ranked by assets, 1929 705
- C.3. The 200 largest industrial enterprises in Germany, ranked by assets, 1953 714
- C.4. Turnover in the list of the 200 largest industrial enterprises in Germany in food, chemicals, and machinery, 1913, 1929, and 1953 722
