Figures and Tables	ix
Preface	xiii
I. TOTAL QUALITY MANAGEMENT	
1. Strategic Total Quality Management (STQM) <i>Christian N. Madu and Chu-hua Kuei</i>	3
2. Strategies for Global Competitiveness with Information Technology <i>Christian N. Madu and Chu-hua Kuei</i>	27
3. A Comparative Analysis of Japanese and American Production Management Practices <i>Roy Nersesian</i>	37
4. Quality Assurance and Expert Systems <i>John F. Affisco and Mahesh Chandra</i>	73
II. SELECTION AND IMPLEMENTATION OF NEW TECHNOLOGIES	
5. Strategic Thrust of Manufacturing Automation Decisions: A Conceptual Framework <i>Christian N. Madu and Nicholas C. Georgantzas</i>	103
6. A Strategic Decision Model for the Selection of Advanced Technology <i>Chinho Lin, Chu-hua Kuei, John Aheto, Christian N. Madu</i>	123
7. A New Look at Strategic Capital Budgeting Decisions <i>Rudolph A. Jacob and Christian N. Madu</i>	139

8. A Quality Confidence Procedure for GDSS Application in Multicriteria Decision Making <i>Christian N. Madu</i>	149
9. Project Management in the Adoption and Implementation of New Technologies <i>Adedeji B. Badiru</i>	165
10. Licensing: An Intangible but Strategic Source of Revenue <i>Vasanthakumar Bhat</i>	183
11. Strategic Cost Analysis as a Global Competitive Weapon <i>Rudolph A. Jacob</i>	195
 III. STRATEGIC MANAGEMENT	
12. Synchronous Production Innovation and Performance in Manufacturing <i>Nicholas C. Georgantzas and Jack Shapiro</i>	207
13. Strategic Information System Planning in the Health Care Industry— A Case Study <i>Michael J. Corrigan and Chu-hua Kuei</i>	223
14. Scenario-Driven Technological Development Planning: A Process View <i>Nicholas C. Georgantzas and William Acar</i>	243
15. Managing Innovative Technologies <i>Chimezie A. B. Osigweh, Yg., and Michael Segalla</i>	261
16. Setting Priorities for the Information Technology Industry in Taiwan— A Delphi Study <i>Christian N. Madu, Chu-hua Kuei, and Assumpta N. Madu</i>	279
 IV. KNOWLEDGE-BASED TECHNIQUES	
17. The Role of Artificial Intelligence and Expert Systems in New Technologies <i>Adedeji B. Badiru</i>	301
18. Knowledge-Based Techniques for Management of New Technologies <i>Bay Arinze</i>	319
 V. PRODUCT DESIGN AND INVENTORY MANAGEMENT	
19. Product Design: The Next Source of Competitive Advantage <i>Vasanthakumar Bhat</i>	335

<i>Contents</i>	vii
20. Reducing Lot Sizes—Analytical Results and Techniques for Implementation <i>John F. Affisco, Farrokh Nasri, and M. Javad Paknejad</i>	351
Index	369
Contributors	379

Figures and Tables

Figures

1.1	STQM Transformation Process Overview	20
1.2	System Transformation Process	21
3.1	Stable Process	53
3.2	Nonstable Process—Shifting Mean	53
3.3	Nonstable Process—Expanding Variance	54
3.4	Stable Process—Tampering	54
4.1	Expert Systems Architecture	74
4.2	A Frame Representation for Statistical Control Charts	76
4.3	Inference Processes	77
4.4	Screen 1—Sampling First Cut	87
4.5	Screen 2—Categories of Product and Process	88
4.6	Screen 3—Level of Inspectors Training	89
4.7	Screen 4—Record Keeping/Inspection Tradeoffs	90
4.8	Screen 5—Desired AQL	91
4.9	Screen 6—Capability of Vendor	92
4.10	Screen 7—Conclusions	93
5.1	A Model of Manufacturing Automation Decision-Making, Implementation and Control	107
5.2	Hierarchical Network Structure of the Manufacturing Automation Decision-Making Process	112
6.1	Decision Hierarchy of Objective, Criteria, and Alternatives	128
7.1	A Cognitive Map for Strategic Capital Budgeting Decisions	141
7.2	AHP Model for Strategic Capital Budgeting Decision	143
7.3	Significant Criteria to Evaluate Strategies	144
7.4	Comparison Matrix and Weights of Goals	146
7.5	Comparison Matrices and Weights of Resource Allocation Strategies	146
7.6	Resource Allocation Strategy Weights	147
8.1	Quality Confidence Limits	157
9.1	Project Management Steps	168

9.2	Elements of Project Control	168
9.3	Cost/Benefit Analysis of Technology	172
9.4	Technology Conversion Strategies	176
9.5	A Communication Matrix	176
9.6	Functional Responsibility Chart	178
9.7	Technology Transfer Model	178
9.8	Project Technology Transfer Loop	180
9.9	Matrix Organization	181
11.1	Overview of Business Functions, Departments, and Activities	198
11.2	Cost of Light Fixtures A and B	201
11.3	Cross-Subsidization of Products	203
12.1	Initial Two-Dimensional Configuration of Production Innovations	215
12.2	Two-Dimensional Configuration Linking Production Innovations with Performance Improvements	216
13.1	The Formative Years	226
13.2	Organization Model I	229
13.3	The MIS Organizational Matrix at Monmouth	228
13.4	Organization Model II	229
13.5	Perspective: Five Competitive Forces in Healthcare	231
13.6	Ethernet Cable, Vax Processors, and STAR Coupler	233
13.7	The Network at Monmouth Medical Center for Pathology	234
13.8	The Network at Monmouth Medical Center	235
13.9	Integrating DIGITAL's VAX to Fax into Clinical Reporting	236
13.10	Distributed Bedside Reporting via VAX-PC LAN	237
13.11	Digital's Proposed Remote Clustering utilizing FDDI Technology	239
14.1	Scenario-Driven Technological Development Planning Process	247
14.2	ID and CSM of Technological Development Planning	252
14.3	Behavioral Patterns of Investment (I), Productivity (P) and Revenue (R)	254
15.1	Market Segmentation Approach to Training Needs	271
16.1	The Information Systems Industry in Taiwan	280
16.2	A Strategic Framework for the Transfer of Technology	282
16.3	Generation of Criteria	285
16.4	Cognitive Map	286
16.5	Pairwise Comparisons	290
17.1	Expert Systems Structure	303
17.2	Technology Condition and Action Relationships	303
17.3	Formation of a Subset of a Knowledge Base	307
17.4	Technology Relations on Knowledge-Base Sets	307
17.5	Decision Flow Diagram for Justex	311
17.6	Justex Consultation Screen 1	313
17.7	Justex Consultation Screen 2	313
17.8	Justex Consultation Screen 3	314
17.9	Justex Conclusion Screen	314
17.10	Development and Implementation of Robex	316
17.11	Consultation Interface for Robex	316
18.1	Structure of a Knowledge Based System	321
18.2	Commercial Examples of Knowledge-Based Systems	325
18.3	Structure of a Neural Network	328
19.1	Design for Manufacturability	337

19.2	Design for Flexible Manufacturing Systems	338
19.3	Design for Assembly	340
19.4	Design for Recyclability	344
20.1	EOQ and Inventory Costs	353
20.2	Percentage Total Cost Savings Over EOQ-SLT	357

Tables

1.1	Dimensions of Strategic Total Quality Management	6
1.2	New Management Focus and Target for Strategic Total Quality Management	10
1.3	Japan's Green Technologies	12
1.4	Japan's Industry Strategies for the Greening of the Environment	13
1.5	A Contrast of Strategic Total Quality Management to Total Quality Management and Traditional Quality Assurance	15
1.6	Top Management Strategies for Quality Improvement	17
1.7	Major Techniques in the STQM Transformation Process	25
3.1	Simulation of the Normal Variability in a Roll of a Die	49
3.2	Definition of Quality	55
3.3	Managing Quality by Varying Settings	56
3.4	Managing Quality by Reducing Variance	57
3.5	Normal Management Reactions to Test Results	62
3.6	Purchasing: A World Apart	64
4.1	Some Commercial Expert System Building Tools	80
4.2	Potential Quality Assurance Expert System Applications	84
4.3	Framework for the Use of Expert Systems in Quality Assurance	94
4.4	Some Fielded Quality-Related Expert Systems	98
5.1	Decision Making Strategies for Conflict Resolution in the Idea Generation Phase	108
5.2	Significant Factors in Automation Decision	113
5.3	Judgments with Respect to Goal	115
5.4	Goal: Total Productivity Improvement	116
5.5	Judgments with Respect to Goal	116
5.6	Total Productivity Improvement Tally for Leaf Nodes	117
6.1	The Relationships Among Activities and Automation Technologies	126
6.2	The Input Data of the Analysis Matrices	129
8.1	Significant Factors in the Automation Decision	151
8.2	GDSS Questionnaire	152
8.3	Calculations for Study	153
8.4	Priority Indices of the 17 Respondents	156
8.5	Priority Indices of the Criteria	160
8.6	Kolmogorov-Smirnoff Test for Normality	160
10.1	Advantages and Disadvantages of Licensing—from the Licensor's Perspective	185
10.2	Advantages and Disadvantages of Licensing—from the Licensee's Perspective	191
12.1	Sample characteristics	211
12.2	Statistical Results Derived in T = 1, 2, and 3 Dimensions	213
15.1	The Changing Nature of Skills in Banks and Insurance Companies	269
16.1	Cognitive Mapping—Exploring Linkages	287

16.2	Expert Choice—The Hierarchy of Preferences	289
16.3	Expert Choice—the Group Judgment	292
16.4	Overall Priorities for IT Policy	293
20.1	Comparative Results for Setup Cost-Reduction Case	355
20.2	Comparative Results for Uniform and Normal Lead Time	358
20.3	Optimal Values for Lead Time Variance Reduction and Simultaneous Models	360
20.4	Comparative Results for Lead Time Variance Models (16-week mean lead time)	362
