Preface		vii
Contents		xi
Introduction		1
0.1.	Intrinsic Relationship Between the Evolution of the Division of Labor and Other Economic Phenomena	1
0.2.	The Implications of the Dichotomy Between Pure Consumers and Pure Producers for Economic Analysis	3
0.3.	Why Economists Shifted Their Attention From the Economic Organization Problem to the Resource Allocation Problem	4
0.4.	Diversifying the Frameworks of Economic Analysis	12
<i>Part I:</i>	<i>Economies and Diseconomies of Specialization</i>	
Chapter 1:	Analytical Frameworks of Economics	18
1.1.	What is a Framework of Economic Analysis	18
1.2.	Assessment of Quality of a Framework	21
1.3.	The Framework in This Book	29
Chapter 2:	Economies of Specialization and Transaction Costs	39
2.1.	A System of Production for a Consumer-producer	39
2.2.	Preferences for Diverse Consumption and Transaction Costs	50
2.3.	Individual Decision Problems	52
2.4.	Equilibrium and Its Comparative Statics	59
2.5.	Welfare Implications of Equilibrium	67
2.6.	The Distinctive Features of Equilibrium in our Framework	69
Chapter 3:	The Pricing Mechanism and ex post Transaction Costs	71
3.1.	A Bilateral Bargaining Model	71
3.2.	The Endogenization of the Choice of the First Mover	80
3.3.	Why the Market Emerges from the Division of Labor	86
3.4.	The Bargaining Equilibrium with Unemployment	90
3.5.	The Endogenization of the Principal-agent Relationship	92
Chapter 4:	Economies and Diseconomies of Information Asymmetry	94

4.1.	Specialization and Economies of Information Asymmetry	94
4.2.	Economies of Information Asymmetry	96
4.3.	Dual Functions of the Price System: Coordinating the Division of Labor and Promoting Information Asymmetry	99
4.4.	The Function of the Market in Exploiting Economies of Information Asymmetry	115

Part II: Rethinking Trade Theory and Development Economics

Chapter 5:	Why and How International Trade Emerges from Domestic Trade	117
5.1.	Rethinking Trade Theory	117
5.2.	Conflict Between Preferences for Diverse Consumption and Economies of Specialization	118
5.3.	The Equilibrium Level of Division of Labor	120
5.4.	Comparative Statics	127
5.5.	Evolution of the Division of Labor Generated by Exogenous Evolution of Transaction Efficiency	134
5.6.	Organizational Efficiency and the Function of the Market in Discovering the Efficient Pattern of Organization	136
5.7.	Emergence of International Trade from Domestic Trade	138
5.8.	Why do we need the market?	142
5.9.	Unequal Income Distribution and Dual Economy	144
Appendix 5.1: Proof of Lemma 2.1 for the Model in This Chapter		145
Chapter 6:	Emergence of Professional Middlemen and Urbanization	147
6.1.	A Model with Trading Activities and Heterogeneous Parameters	147
6.2.	Decisions on Being a Professional Middleman	149
6.3.	Market Structures and Corner Equilibria	151
6.4.	The Pareto Optimal Pattern of Trade and Economic Organization	156
6.5.	How Does the Market Sort out the Efficient Pattern of Economic Organization?	161
6.6.	Equilibrium Trade Pattern, Level of Division of Labor, and Urbanization	165
6.7.	Emergence of Professional Middlemen and a Hierarchical Structure of Economic Organization and a Dual Structure Between the Urban and Rural Sectors	168
Appendix 6.1: Proof of Lemma 6.2		172
Appendix 6.2: Proof of Proposition 6.7		173
Chapter 7:	Endogenous Evolution of the Division of Labor	176
7.1.	Evolution of the Division of Labor, the Accumulation of	

	Human Capital, and Development of Endogenous Comparative Advantages	176
7.2.	A Dynamic Model with Learning by Doing	178
7.3.	Optimum Speed of Learning by Doing and Evolution of Endogenous Comparative Advantage	181
7.4.	The Evolution of the Extent of the Market, Trade Dependence, Endogenous Comparative Advantages, and Economic Structure	194
7.5.	Rethinking Development Economics and Growth Theory	196
	Appendix 7.1: Proof of Lemma 2.1 for the Dynamic Model	201
Chapter 8	Concurrent Increases in Specialization and Consumption Variety	202
8.1.	Why the Variety of Available Goods and Specialization Increase Concurrently	202
8.2.	Tradeoffs among Economies of Specialization, Economies of Complementarity, and Transaction Costs	204
8.3.	The Function of the Market in Determining the Efficient Variety of Available Consumer Goods	206
8.4.	Implications of the Endogenization of Aggregate Demand	208
Part III:	<i>Rethinking Theory of the Firm and Economics of Property Rights</i>	
Chapter 9:	Why and How Firms Emerge from the Division of Labor	214
9.1.	Why is the Institution of the Firm Needed?	214
9.2.	Economies of Specialization in Roundabout Production	215
9.3.	The Efficient Pattern of Economic Organization	216
9.4.	The Institution of the Firm and the Structure of Residual Rights	218
9.5.	Economies of Specialization, Economies of Division of Labor, and Economies of the Firm	223
9.6.	Does the Structure of Residual Rights Make a Difference?	228
Chapter 10:	Function of the Market in Searching for Efficient Contractual Arrangements	234
10.1.	Formalizing the Economics of Property Rights	234
10.2.	A Tradeoff Between Economies of Specialization and Coordination Reliability	236
10.3.	Concurrent Increases in Productivity, the Level of Division of Labor, and a Risk of Coordination Failure	247
10.4.	The Invisible Hand and "Market Failure"	252

Chapter 11:	The Extent of the Market and Rights Specified in a Contract vs. Rights to Contracting	257
11.1.	Two Functions of the Market: Executing Exchanges and Keeping Pressure on the Incumbent Trader Partners	257
11.2.	A Tradeoff Between Economies of Specialization and Coordination Reliability	259
11.3.	Efficient Vagueness of Property Rights and Market Size	264
11.4.	Possible Extensions and Applications	274
Part IV:	<i>Specialization and Hierarchical Structures of the Division of Labor</i>	
Chapter 12:	Emergence of New Producer Goods and Related New Technology	277
12.1.	A Tradeoff Between Economies of Specialization and Economies of Complementarity	278
12.2.	The Efficient Number of Producer Goods and Level of Specialization	279
12.3.	Concurrent Changes in the Level of Division of Labor, Productivity, and Input Diversity	285
12.4.	Changes in Economic Structure	288
	Appendix 12.1: Proof of Lemma 12.1	291
Chapter 13:	Economies of Roundaboutness and Industrialization	293
13.1.	The Division of Labor and Roundabout Production	293
13.2.	A Model with a Variable Hierarchical Structure of Goods	295
13.3.	Corner Equilibria in Ten Market Structures	298
13.4.	Concurrent Evolution of Specialization and Roundaboutness	305
13.5.	Concurrent Evolution of Specialization, Roundaboutness, and Firms and Disappearance of Traditional Goods	309
	Appendix 13.1: The Structure with Goods $z, y, v, x,$ and w	315
	Appendix 13.2: The Structures without Good y	315
Chapter 14:	Efficient Hierarchy and the Division of Labor	317
14.1.	Why Can a Hierarchy Improve Efficiency?	317
14.2.	A Centralized Hierarchy and the Division of Labor	319
14.3.	A Decentralized Hierarchy and the Division of Labor	323
14.4.	Evolution of the Hierarchical Structure of the Market	336

Part V:		<i>Complicated Dynamic Mechanisms Generating Endogenous Evolution of the Division of Labor</i>	
Chapter 15:	Entrepreneurship, Investment, and Experiments with Economic Organizations		340
15.1.	The Efficient Pattern of the Division of Labor in a Walrasian Regime		341
15.2.	Costs in Acquiring Information about the Efficient Pattern of the Division of Labor		342
15.3.	Information Costs and Endogenous Evolution of the Division of Labor		346
15.4.	Information Asymmetry, Entrepreneurship, and Investment		356
15.5.	Investment and the Function of the Price System in Coordinating Experiments with Patterns of the Division of Labor		361
	Appendix 15.1: Solution of the Dynamic Programming Problem		363
Chapter 16:	Concurrently Endogenous Evolution of Specialization, Firms, and Product Diversity		366
16.1.	A Dynamic Equilibrium Model with Learning by Doing and an Endogenous Number of Producer Goods		367
16.2.	Dynamic Equilibrium Level of Specialization and Input Variety		370
16.3.	Concurrent Evolution of Specialization, Variety of Producer Goods, and the Institution of the Firm		380
	Appendix 16.1: Proof of Lemma 16.1		385
	Appendix 16.2: Proof of Proposition 16.1		386
	Appendix 16.3: Proof of Proposition 16.2		389
Part VI:		<i>Empirical Evidence and Rethinking Macroeconomics</i>	
Chapter 17:	Why and How Money Emerges from the Division of Labor		391
17.1.	Why Is Money Needed?		391
17.2.	A Model Endogenizing the Monetary Regime		394
17.3.	Efficient Level of Division of Labor and Monetary Regime		396
17.4.	Implications of the Institution of the Firm for Monetary Regime		405
	Appendix 17.1: Proof of Lemma 17.1		408
Chapter 18:	The Division of Labor, Business Cycles, and Unemployment		411

18.1.	Market Failure or Market Miracle?	411
18.2.	The Relationship Between the Business Cycle and the Division of Labor	414
18.3.	Cyclical vs. non-cyclical Corner Equilibria	416
18.4.	General Price Level, Business Cycles, and Unemployment Rate	428
18.5.	Emergence of Firms and Fiat Money from the Division of Labor	432
Chapter 19:	Testing the Theories in this Volume against Empirical Observations	434
19.1.	Difficulties in Testing the Theories in this Volume	434
19.2.	The Model and Underlying Theory	438
19.3.	Measuring the Level of Division of Labor	441
19.4.	Quantifying Efficiency in Specifying and Enforcing Property Rights	443
19.5.	The Main Results	467
19.6.	More Empirical Studies	468
Epilogue		471
