<i>List of tables</i>	11

<b>Preface</b>	13
----------------	----

<b>Introduction</b>	15
Setting problems in a framework 15; Characteristics of industrial markets 18; The place of industrial market research in the business environment 20; Summary 22	

---

## **Part One: Information That Can Be Made Available By Market Research**

---

<b>1. The Assessment of Market Size</b>	25
What is market size? 25; How useful is market size? 26; The importance of market segmentation 27; The methods of assessing market size 28; The assessment of sales area potential 30; Summary 31	
<b>2. The Analysis of Market Structure</b>	33
What is market structure? 33; How useful is market structure? 35; The analysis of market structure 37; Summary 38	
<b>3. The Analysis of Market Shares</b>	39
What is market share? 39; Factors influencing market share 40; How useful is market share? 41; The assessment of market share 42; Summary 43	
<b>4. The Analysis of Market Trends</b>	44
What are market trends? 44; How useful are market trends? 47; How to carry out trend analysis 48; Summary 49	
<b>5. Information on Customers and Prospects</b>	50
The importance of knowing the customer/prospect 50; Information which can be acquired on customers/prospects 50; Customer satisfaction studies – of growing importance 51; Obtaining information from customers 55; Summary 56	
<b>6. Information on Competitors</b>	57
The importance of knowing the competition 57; Information which can be acquired on competitors 58; How to obtain the information 60; Summary 65	

---

**Part Two: The Uses of Market Research**

---

- |     |   |     |
|-----|---|-----|
| 7.  | <b>Developing the Marketing Plan</b><br>What is a marketing plan? 69; The contents of a marketing plan 69; The role of market research in the marketing plan 73; Summary 74   | 69  |
| 8.  | <b>Improving the Competitive Position</b><br>What is a competitive position? 75; How suppliers can use promotion to influence their competitive position 75; The use of market research in sharpening the competitive position 77; Image and its relationship to competitive advantage 78; Researching image in industrial markets 79; Summary 80   | 75  |
| 9.  | <b>Influencing the Buying Decision</b><br>The persons who influence the buying decision 82; How buyers select suppliers 83; Non-differentiated products and their importance in industrial marketing 88; Influencing the buying decision without competing on price 88; Summary 91  | 82  |
| 10. | <b>Evaluating New Products and Services</b><br>What are new products and services? 92; The role of market research in evaluating conceptually new products 95; The role of market research in assessing modified or substitute products 96; Summary 97  | 92  |
| 11. | <b>Making Promotions Work Harder</b><br>The industrial promotional mix 98; The relationship between promotion and sales 100; Research to provide promotional messages 100; Research to isolate the media for a campaign 101; Research to show the impact of different types of promotion 101; Research to test advertisements 104; Research to test the effectiveness of promotional campaigns 104; Promotions which test themselves 105; Summary 106 | 98  |
| 12. | <b>Guiding Acquisitions and Investment Policy</b><br>The traditional approach to acquisitions 108; The role of market research in acquisition studies 108; Research to guide investment 112; Technology transfer 112; Summary 114   | 108 |

---

**Part Three: Organising the Project**

---

- |     |  |     |
|-----|--|-----|
| 13. | <b>Problem Definition and Research Design</b><br>What is a marketing research problem? 117; Pressures which influence the design of the research programme 118; Selecting the research method 120; Deciding on the size of the research programme 125; Summary 127 | 117 |
| 14. | <b>Taking and Giving a Market Research Brief</b><br>The importance of a research brief 128; What a research brief  | 128 |

- Special issues – postal/self-completion questionnaires 227;  
Summary 230
22. **Personal Interviewing** 231  
The role of the personal interviewer 231; Types of industrial interview 232; Planning the interviewing schedule 233; Obtaining the interview 233; Conducting the interview 236; The character of the interviewer 237; Summary 238
23. **Telephone Interviewing** 239  
The role of telephone interviewing 239; The pros and cons of telephone interviewing 239; Applications for telephone interviewing 241; Selecting and training telephone interviewing staff 242; Carrying out the interview 242; Summary 243
24. **Postal Surveys** 244  
Postal surveys as an alternative to telephone or personal interviews 244; The costs of postal surveys 247; Factors influencing postal response rates 248; Designing the questionnaire and cover letter 249; Coping with the response 252; Checking the validity of postal response 252; Variations on postal surveys 253; Summary 254
25. **Observation** 255  
Observation in industrial market research 255; Applications for observation 256; Planning the observation 257; Summary 258
26. **Group Discussions** 259  
Qualitative and quantitative research 259; Qualitative research techniques 259; The number and composition of groups 260; Venues and timing of groups 261; Achieving an adequate attendance 261; Hosting the group 263; Administering the group 263; Summary 264
27. **Clinics** 266  
The application of clinics in industrial market research 266; The stages in organising a clinic 267; Planning and running the clinic 268; Summary 269
28. **Forecasting** 272  
Types of forecast 272; The role of forecasts inside a company 273; Selecting the forecasting method 274; Historical analogy 276; Moving averages 276; Exponential smoothing 276; Correlation 277; Surveys of user opinions 278; Surveys of expert opinion 279; Composite forecasts 280; Summary 281

---

## Part Five: Processing and Presenting the Data

---

29. **Analysing the Data** 285  
Drawing together sources of data 285; Analysing desk

	research 285; End-user interviews 286; Overview interviews 288; Group discussions 288; Methods of quantitative analysis 289; Laying out the questionnaire for batch computer processing 291; Summary 291	
<b>30. Writing the Report</b>		<b>293</b>
	The purpose of market research reports 293; The structure of a market research report 293; The logic of preparing a report 298; Presenting the data 299; Summary 301	
<b>31. The Use of Personal Computers in Industrial Market Research</b>		<b>302</b>
	The role of personal computers 302; Word processing 302; Analysis 302; Interviewing 304; Questionnaire design 305; Modelling 305; Databases 312; Presentations 313; Summary 313	
<b>32. Presenting the Findings</b>		<b>314</b>
	The importance of presentation 314; What is a presentation? 314; Planning the presentation 315; Giving the presentation 316; Summary 317	

---

## Appendices

---

<i>Appendix 1: Statistical Methods</i>		<b>321</b>
	Introduction 321; Sampling 321; Establishing the relationship between two variables 326; Time series 330; Calculating compound growth 333	
<i>Appendix 2: Sources of Information</i>		<b>335</b>
	Market research organisations 335; Government departments 335; Publishers 337; International organisations 338	
<i>Appendix 3: Bibliography</i>		<b>340</b>
<b>Index</b>		<b>343</b>

# List of figures

1.1	The chain of derived demand	15
1.2	Life cycles in methods of copying	16
1.3	The construction of a life cycle for an industrial product	17
1.4	The segmentation of industry by company size, location and specialisation	18
1.5	The place of market research as a business tool	21
2.1	Interrelationships between suppliers, distributors and end users in an industrial market	36
4.1	Macro and micro factors influencing market trends	44
9.1	Non-differentiated products in the chain of derived demand	89
9.2	Product differentiation as an alternative to price cutting	91
10.1	Innovation by substitution in artwork lettering	93
11.1	The role of advertising on the buyer/specifier	98
14.1	Proposed timetable for UK adhesives study	135
15.1	Sequence of a typical industrial market research study	139
15.2	Example of interviewer's contact sheet	141
16.1	Pyramid of key financial ratios	153
20.1	Normal distribution curve of life of cutting tool in industrial establishments	197
20.2	Chart for measuring random sampling error	199
20.3	Example of a questionnaire designed to select its own sample	204
24.1	Questions and answers to consider when deciding how to do the research	246
24.2	Filing products survey	250
24.3	Example of a cover letter	251
26.1	Sample page from discussion group checklist on low cost daisywheel printers	265
27.1	Organisational chart for industrial clinic	270
29.1	Sample question from fork-lift truck personal visit survey showing response codes using column numbers	291
30.1	Steps in conventional problem solving in business	297
30.2	Steps in the formulation of conclusions for a market research report	297
A1.1	Scattergraph illustrations of correlation	326
A1.2	Correlation between two variables over time	327
A1.3	Quarterly sales of ABC company 1989–1992	331
A1.4	Quarterly sales and trends of ABC company 1989–1993	333

# List of tables

2.1	Market structure in the supply of sintered parts to fuel pump manufacturers	33
2.2	Classification of industrial markets by industry structure	34
4.1	Length of time taken between invention and commercial launch of selected industrial products	46
5.1	Strategic reactions to a customer satisfaction survey	52
6.1	Summary of five years of financial statistics on engineering company	62
8.1	The measurement of image	80
9.1	The areas of responsibility of company departments in the buying decision	83
9.2	Importance of factors influencing the choice of supplier of printing machines	85
9.3	Factors which may prompt a change in supplier of a finishing service	86
9.4	Price reductions required to change supplier of finishing service	86
11.1	Eleven types of industrial promotion	99
13.1	Questions to ask before commissioning research – and some specimen answers	119
13.2	Qualitative objectives	124
14.1	Checklist to guide a researcher when taking a brief	130
14.2	UK adhesives study: allocation of research time against activity	134
16.1	Calculation of market size for a cleaning chemical	151
16.2	Action checklist to determine market size by desk research	160
16.3	Action checklist to obtain product information by desk research	161
16.4	Action checklist to obtain information on a company or companies	162
17.1	The important commercial regions of the world	165
17.2	Checklist of questions for desk research country report	171
21.1	A classification of questionnaires	207
21.2	A classification of questions	212
24.1	Breakdown of costs in mailing 1000 postal questionnaires	247
24.2	Comparative costs per valid response of different interview methods	247
26.1	Ideal times for group discussions by class of respondent	261
28.1	Classification of forecasting methods by application	275
30.1	The application of charts and diagrams in market research reports	300

	should contain 128; The role of the researcher 129; Preparing the research proposal 132; Commissioning a research agency 135; Summary 137	
<b>15.</b>	<b>Administration of the Project</b> Finalising the timetable 138; Briefing the field force 138; Briefing desk researchers 143; Briefing recruiters for group discussions 143; Briefing analysts and report writers 144; Organising a personally conducted research programme 145; Reporting sessions 146; Summary 146	<b>138</b>
<hr/>		
<b>Part Four: Methods</b>		
<hr/>		
<b>16.</b>	<b>Domestic Desk Research</b> What is desk research? 149; When to use desk research 149; Where to find the data 154; How to use desk research 163; Summary 163	<b>149</b>
<b>17.</b>	<b>Desk Research on Overseas Markets</b> Setting research priorities in overseas markets 165; Deciding the method of research 166; The sources and availability of published data 167; Researching the US market 174; Summary 176	<b>165</b>
<b>18.</b>	<b>Researching European Markets</b> Introduction 178; What makes Europe difficult to research? 178; The problems of researching Eastern Europe 179; Types of European study 180; Planning a European study 181; Points to bear in mind 186; Summary 187	<b>178</b>
<b>19.</b>	<b>Electronic Desk Research</b> An alternative to library searches 189; Database search strategy 190; Editing on-line data 190; The need for experience and training 191; Choosing the right database 191; Equipment required to operate databases 193; The cost of operating databases 193; The pros and cons of databases 193; Summary 194	<b>189</b>
<b>20.</b>	<b>Sample Selection</b> Industrial and consumer samples compared 196; Selecting the sampling method according to the universe 197; Choosing an industrial sample frame 201; Summary 203	<b>196</b>
<b>21.</b>	<b>Questionnaire Design</b> The nature of business-to-business questionnaires 205; The role of the questionnaire 205; The size of industrial surveys 206; Classification of types of questionnaires 206; Different types of questions used 211; Deciding on the method of interviewing 215; Making workable questionnaires 216; Piloting questionnaires 221; The use of computers in questionnaire design 221; Pitfalls of questionnaire design 221; Special issues – telephone questionnaires 223; Special issues – visit questionnaires 225;	<b>205</b>

A1.1	Company sales of photocopiers and associated advertising expenditure	329
A1.2	Calculation of moving averages for ABC company 1989–1992	332
A1.3	Establishing the seasonal variation	332
