<i>Figures</i>	ix
<i>Foreword</i>	xi

Part I Concepts

1 No End in Sight – Current Debates on the Future of Industrial Work	1
<i>Norbert Altmann, Christoph Köhler, Pamela Meil</i>	
2 Stranger in Paradise – An American’s Perspective on German Industrial Sociology	12
<i>Pamela Meil</i>	
3 The Contradictions of Post-Tayloristic Rationalization and the Uncertain Future of Industrial Work	26
<i>Burkart Lutz</i>	
4 Systemic Rationalization and Inter-Company Divisions of Labour	46
<i>Dieter Sauer, Manfred Deiß, Volker Döhl, Daniel Bieber, Norbert Altmann</i>	

Part II Development and Application of New Technologies

5 On the History of NC-Technology – Different Paths of Development	63
<i>Hartmut Hirsch-Kreinsen</i>	
6 The Role of Manufacturing Technology Markets in Systemic Rationalization Processes	77
<i>Volker Döhl</i>	
7 Thinking Machines, Dreaming Engineers? Towards Applied Expert System Technology	92
<i>Manfred Moldaschl</i>	

8	Computerized Manufacturing and Sensory Perception – New Demands on the Analysis of Work <i>Fritz Böhle, Brigitte Milkau, Helmuth Rose</i>	104
Part III CIM and Organizational Change in the Mechanical Engineering Industries		
9	Diffusion of CIM-Technologies – Dynamic Dissemination and Alternative Paths of Innovation <i>Rainer Schultz-Wild</i>	123
10	Technological Innovation – Organizational Conservatism? <i>Christoph Köhler, Klaus Schmierl</i>	142
11	Flexible Manufacturing Systems and Work Organization <i>Marhild von Behr, Hartmut Hirsch-Kreinsen, Christoph Köhler, Christoph Nuber, Rainer Schultz-Wild</i>	160
12	Bringing Skills Back to the Process <i>Rainer Schultz-Wild</i>	185
Part IV Restructuring of Work in Mass Production Industries		
13	Work Structuring and Company Performance Policies <i>Norbert Altmann, Peter Binkermann, Klaus Düll</i>	201
14	The Future of the Mass Production Worker <i>Günter Bechtle, Klaus Düll</i>	212
15	Towards a Polarization of Skill Structures <i>Manfred Deiß</i>	227
Part V Job Structures and Skill Formation		
16	Vocational Training, Job Structures and the Labour Market – An International Perspective <i>Werner Sengenberger</i>	245
17	Education and Job Hierarchies – Contrasting Evidence from France and Germany <i>Burkart Lutz</i>	257
18	Mechanical Engineer versus Computer Scientist – Different Roads to CIM in France and Germany <i>Burkart Lutz, Pierre Veltz</i>	274

x *Figures*

11.1	Wage structure in a gear production department by occupation (1982)	162
11.2	Floor plan of the FMS	165
11.3	Alternative job structures in flexible manufacturing systems (FMS)	167
11.4	Systems of job rotation	176
12.1	Training scheme for the industrial metal trades in the Federal Republic of Germany (as revised in 1984)	195

19	New Production Structures à l'Italiano? – Similarities and Differences in the West German and Italian Steel Industries <i>Ingrid Drexel</i>	290
Part VI Large and Small Firms		
20	The Development and Structure of Small-Scale Firms <i>Stefanie Weimer</i>	313
21	Small Supplier Firms at the Crossroads – Meeting New Challenges through Cooperative Retraining Schemes <i>Hans Gerhard Mendius, Stefanie Weimer</i>	323
22	Small Firms in Big Subcontracting <i>Klaus Semlinger</i>	342
Part VII New Technologies and Industrial Relations		
23	Unions' Policies Towards New Technologies in the 1980s – An Example from the Metal Industry <i>Norbert Altmann</i>	361
24	Rationalization Strategies and Representation of Worker Interests <i>Norbert Altmann</i>	385
	<i>Notes</i>	400
	<i>References</i>	418
	<i>Index</i>	436

Figures

9.1	Computer-integrated manufacturing (CIM)	125
9.2	Computer-based technologies – 1986/7 implemented or planned – utilization rates in the West German capital goods industry (N = 1,096)	126
9.3	CAP and PPC by company size (number of workers) – utilization rates in the West German capital goods industry (N = 1,096)	128
9.4	Computer integration – in 1986/7 implemented or planned – West German capital goods industry (N = 1,096)	129
9.5	Utilization rates of computer-based technologies in machine-building industry (N = 572) and other branches of the capital goods industry (N = 524)	131
9.6	CAD and CAP by company size (number of workers) utilization rates in the West German machine-building industry (N = 572)	132
9.7	PPC and CAQ by company size (number of workers) – utilization rates in the West German machine-building industry (N = 572)	133
9.8	Computer integration – in 1986/7 implemented or planned – West German machine-building industry (N = 572)	134
9.9	Alternative organizational concepts inherent in CIM-components	136
9.10	Effects of the implementation of computer-based technologies – West German capital goods industry (N = 1,096)	140
10.1	Functions and tasks	143
10.2	Job design in alternative work systems	145
10.3	Work systems in selected branches of the capital goods industry	146
10.4	Companies according to their dominant organizational strategy (60 cases out of West German capital goods industry)	148
