List of Tables	viii
Acknowledgements	xi
1. Introduction	1
2. Determinants of Internationalisation	30
3. Overseas Production and Exporting Performance	95
4. The Determinants of Industrial Diversification	108
5. Industrial and Geographical Diversification: Complements or Substitutes?	134
6. Summary and Conclusions	150
References	167
Index	173

List of Tables

1.1	Large-firm concentration ratios	7
1.2	Large-firm concentration ratios (firm), 1962-1982	9
1.3	Measures of industrial diversification (industry averages)	12
1.4	Industrial diversification measures DI(W) and DI(U) by area/country	14
1.5	Industrial diversification measures DH and DW by area/country	15
1.6	Industrial diversification of the sales of the 792 rationalised sample firms in 1982	16
1.7	Distribution of the sales of the 792 rationalised sample firms in 1982, by product and main industry of source firms	18
1.8	Correlations between measures of diversification and penetration	19
1.9	Measures of penetration (industry averages)	21
1.10	Geographical diversification of the sales of the 792 rationalised sample firms by country	23
1.11	Geographical diversification of the sales of the 792 rationalised sample firms by industry	24
2.1a	Regression equations with overseas production ratio as dependent variable - full sample	38
2.1b	Regression equations with parent export ratio as dependent variable - full sample	39
2.1c	Regression equations with overseas sales ratio as dependent variable - full sample	40
2.1d	Regression equations with overseas market sourcing ratio as dependent variable - full sample	41
2.2a	Regression equations with overseas production ratio as dependent variable - area/country samples	42
2.2b	Regression equations with parent export ratio as dependent variable - area/country samples	45
2.2c	Regression equations with overseas sales ratio as dependent variable - area/country samples	48
2.2d	Regression equations with overseas market sourcing ratio as dependent variable - area/country samples	50
2.3a	Regression equations with overseas production ratio as dependent variable, with dummy variables	52

6.4	Summary of relationships between penetration and the dependent variables	154
6.5	Summary interpretation of industry dummy variable results for USA firm sample	157
6.6	Summary interpretation of industry dummy variable results for UK firm sample	158
6.7	Summary interpretation of industry dummy variable results for Japanese firm sample	159
6.8	Summary interpretation of industry dummy variable results for Other Europe firm sample	160

2.3b	Regression equations with parent export ratio as dependent variable, with dummy variables	54
2.3c	Regression equations with overseas sales ratio as dependent variable, with dummy variables	56
2.3d	Regression equations with overseas market sourcing ratio as dependent variable, with dummy variables	58
2.4a	Regression equations with overseas production ratio as dependent variable, industry samples	60
2.4b	Regression equations with parent export ratio as dependent variable, industry samples	63
2.4c	Regression equations with overseas sales ratio as dependent variable, industry samples	66
2.4d	Regression equations with overseas market sourcing ratio as dependent variable, industry samples	69
3.1a	Regressions with PER as dependent variable and OPR as an independent variable – country/area samples	101
3.1b	Regressions with PER as dependent variable and OPR as an independent variable – industry samples	102
3.2	Regressions with IER as dependent variable	103
3.3	Regressions with CIE as dependent variable	104
3.4	Regressions with CEE as dependent variable	105
4.1a	Determinants of industrial diversification - all countries	116
4.1b	Determinants of industrial diversification - all countries	117
4.2a	Determinants of industrial diversification - country and area subsamples	118
4.2b	Determinants of industrial diversification - country and area subsamples	121
4.3a	Determinants of industrial diversification - industry subsamples	124
4.3b	Determinants of industrial diversification - industry subsamples	125
5.1	Regressions with ID as dependent variable and OPR as an independent variable	139
5.2	Regressions with ID as dependent variable and PER as an independent variable	141
5.3	Regressions with ID as dependent variable and OSR as an independent variable	143
5.4	Regressions with ID as dependent variable and SR as an independent variable	145
6.1	Summary of relationships between firm size and the dependent variables	151
6.2	Summary of relationships between R&D intensity and the dependent variables	153
6.3	Summary of relationships between large-firm concentration ratio and the dependent variables	153
