
CONTENTS

Preface	xvii
Acknowledgments	xxi
1 Basic Concepts	1
1.1 Quality—A Look at History	1
1.2 Quality—The Changing Business Conditions	2
1.3 “Quality” Defined	3
1.4 The Quality Function	5
1.5 Managing for Quality	7
1.6 Quality, Costs, and Schedules	10
1.7 Quality Disciplines and Other Disciplines	11
1.8 Perspective on Quality—Internal versus External	11
Summary	12
Problems	13
References	14
Supplementary Reading	14
2 Companywide Assessment of Quality	15
2.1 Why Assessment?	15
2.2 Cost of Poor Quality	16
2.3 Categories of Quality Cost	16
2.4 Objectives of Evaluation	19
2.5 Relating the Grand Total to Business Measures	20
2.6 Analysis of Quality Costs	21
2.7 Economic Models of Quality of Conformance	24
2.8 Cost Balance Different in Certain Circumstances	27
2.9 Standing in the Marketplace	28
2.10 Company Culture on Quality	31
2.11 Assessment of Current Quality Activities	33
Summary	36
Problems	37
References	38
Supplementary Reading	38

3	Quality Improvement and Cost Reduction	40
3.1	Sporadic and Chronic Quality Problems	40
3.2	Project-by-Project Approach	41
3.3	Example of a Project	42
3.4	Prove the Need	45
3.5	Identify Projects	47
3.6	Organize Project Teams	50
3.7	Experiences with the Project-by-Project Approach	52
3.8	Breakthrough Sequence for an Individual Project	52
3.9	Verify the Project Need and Mission	53
3.10	Diagnose the Causes	53
3.11	Provide a Remedy and Prove Its Effectiveness	73
3.12	Deal with Resistance to Change	75
3.13	Institute Controls to Hold the Gains	77
	Summary	77
	Problems	78
	References	80
	Supplementary Reading	81
4	Quality Planning and Sales Income	82
4.1	Contribution of Quality to Sales Income	82
4.2	Quality and Financial Performance	83
4.3	Quality Leadership and Business Strategy	84
4.4	Impact of Quality on Lost Sales	86
4.5	Level of Satisfaction to Retain Present Customers	87
4.6	Planning for Product Quality to Generate Sales Income	88
4.7	Spectrum of Customers	88
4.8	Life Cycle Costs	89
4.9	Achieving a Quality Superiority for a Product	91
4.10	A Road Map for Planning of Products for Salability	92
	Summary	96
	Problems	96
	References	97
	Supplementary Reading	97
5	Control of Quality	98
5.1	Definition of Control	98
5.2	Self-Control	99
5.3	The Control Subject for Quality	101
5.4	Units of Measure	103
5.5	Setting a Goal for the Control Subject	104
5.6	The Sensor	105
5.7	Measuring Actual Performance	106
5.8	Interpreting the Difference between Actual Performance and the Goal	107
5.9	Taking Action on the Difference	111
5.10	Continuous Process Regulation	112
	Summary	113

Problems	113
References	114
Supplementary Reading	114
6 Strategic Quality Management	115
6.1 Elements of Strategic Management	115
6.2 Integrating Quality into Strategic Management	116
6.3 Quality and the Management Cycle	118
6.4 Quality Policies	119
6.5 Quality Goals	123
6.6 Resources for Quality Activities	129
6.7 Training for Quality	130
6.8 Implementing Total Quality	131
6.9 Obstacles to Achieving Successful SQM	135
Summary	136
Problems	137
References	137
Supplementary Reading	138
7 Organization for Quality	139
7.1 Evolution of Organization for Quality	139
7.2 Coordination of Quality Activities	140
7.3 Tomorrow—A Company without Walls	141
7.4 Role of Upper Management	142
7.5 Role of Middle Management	143
7.6 Role of the Work Force	144
7.7 Role of Teams	145
7.8 Quality Circles	147
7.9 Self-Managing Teams	149
7.10 Role of the Quality Director	152
Summary	155
Problems	156
References	156
Supplementary Reading	157
8 Developing a Quality Culture	158
8.1 Technology and Culture	158
8.2 Theories of Motivation	159
8.3 Create and Maintain Awareness of Quality	162
8.4 Provide Evidence of Management Leadership	164
8.5 Provide for Self-Development and Empowerment	167
8.6 Provide Participation as a Means of Inspiring Action	172
8.7 Provide Recognition and Rewards	173
8.8 Time to Change the Culture	176
Summary	177
Problems	177
References	178
Supplementary Reading	178

9	Basic Probability Concepts	179
9.1	Statistical Tools in Quality	179
9.2	The Concept of Variation	179
9.3	Tabular Summarization of Data: Frequency Distribution	180
9.4	Graphical Summarization of Data: The Histogram	182
9.5	Box-and-Whisker Plots	183
9.6	Quantitative Methods of Summarizing Data: Numerical Indices	184
9.7	Probability Distributions: General	186
9.8	The Normal Probability Distribution	187
9.9	The Normal Curve and Histogram Analysis	189
9.10	The Exponential Probability Distribution	192
9.11	The Weibull Probability Distribution	194
9.12	The Poisson Probability Distribution	197
9.13	The Binomial Probability Distribution	198
9.14	Basic Theorems of Probability	199
	Summary	200
	Problems	201
	References	204
	Supplementary Reading	204
10	Statistical Tools for Analyzing Data	205
10.1	Scope of Data Analysis	205
10.2	Statistical Inference	205
10.3	Sampling Variation and Sampling Distributions	206
10.4	Statistical Estimation: Confidence Limits	209
10.5	Importance of Confidence Limits in Planning Test Programs	212
10.6	Determination of the Sample Size Required to Achieve a Specified Accuracy in an Estimate	213
10.7	Tests of Hypothesis	213
10.8	Testing a Hypothesis When the Sample Size Is Fixed in Advance	217
10.9	Drawing Conclusions from Tests of Hypotheses	223
10.10	Determining the Sample Size Required for Testing a Hypothesis	225
10.11	The Design of Experiments	225
10.12	Some Tools for Sound Experimentation	228
10.13	Contrast between the Classical and Modern Methods of Experimentation	229
10.14	Regression Analysis	229
10.15	Enumerative and Analytic Studies	233
10.16	Computer Software for Statistical Analysis	234
	Summary	234
	Problems	235
	References	238
	Supplementary Reading	239

11	Understanding Customer Needs	240
11.1	Quality and Competitive Advantage	240
11.2	Identify the Customers	240
11.3	Scope of Human Needs	242
11.4	Sources of Market Quality Information	243
11.5	Marketing Research in Quality	244
11.6	Needs Related to Product Features	245
11.7	Needs Related to Product Deficiencies	248
11.8	Special Sources of Marketing Research Information	250
	Summary	250
	Problems	250
	References	251
	Supplementary Reading	252
12	Designing for Quality	253
12.1	Opportunities for Improvement in Product Design	253
12.2	Early Warning Concept and Design Assurance	254
12.3	Designing for Basic Functional Requirements	255
12.4	Designing for Time-Oriented Performance (Reliability)	260
12.5	Availability	271
12.6	Designing for Safety	272
12.7	Designing for Manufacturability	275
12.8	Cost and Product Performance	276
12.9	Design Review	277
12.10	Concurrent Engineering	279
12.11	Improving the Effectiveness of Product Development	279
12.12	Software Development	281
	Summary	283
	Problems	283
	References	285
	Supplementary Reading	286
13	Designing for Quality-Statistical Tools	287
13.1	Quality Measurement in Design	287
13.2	Failure Patterns for Complex Products	288
13.3	The Exponential Formula for Reliability	291
13.4	The Relationship between Part and System Reliability	294
13.5	Predicting Reliability during Design	295
13.6	Predicting Reliability Based on the Exponential Distribution	297
13.7	Predicting Reliability Based on the Weibull Distribution	297
13.8	Reliability as a Function of Applied Stress and Strength	298
13.9	Availability	299
13.10	Setting Specification Limits	300
13.11	Analyzing Process Data to Set Limits on Discrete Components or Parts	301
13.12	Specification Limits for Interacting Dimensions	303

Summary	308
Problems	308
References	312
Supplementary Reading	312
14 Supplier Relations	313
14.1 Supplier Relations—A Revolution	313
14.2 Scope of Activities for Supplier Quality	314
14.3 Specification of Quality Requirements for Suppliers	315
14.4 Supplier Selection	316
14.5 Assessment of Supplier Capability	317
14.6 Contract Management	320
14.7 Supplier Certification	327
Summary	328
Problems	328
References	329
Supplementary Reading	330
15 Supplier Relations—Statistical Tools	331
15.1 Quality Measurement in Supplier Relations	331
15.2 Definition of Numerical Quality and Reliability Requirements for Lots	332
15.3 Quantification of Supplier Surveys	334
15.4 Use of Histogram Analysis on Supplier Data	335
15.5 The Lot Plot Plan	336
15.6 Pareto Analysis of Suppliers	336
15.7 Supplier Quality Rating	337
Summary	340
Problems	340
References	342
Supplementary Reading	342
16 Manufacture	343
16.1 Importance of Manufacturing Planning for Quality	343
16.2 Initial Planning for Quality	343
16.3 Concept of Controllability; Self-Control	348
16.4 Defining Quality Responsibilities on the Factory Floor	360
16.5 Self-Inspection	363
16.6 Automated Manufacturing	367
16.7 Overall Review of Manufacturing Planning	369
16.8 Process Quality Audits	370
16.9 Quality and Production Floor Culture	373
Summary	373
Problems	374
References	376
Supplementary Reading	376

17	Statistical Process Control	377
17.1	Definition and Importance of SPC	377
17.2	Quality Measurement in Manufacturing	378
17.3	Statistical Control Charts—General	379
17.4	Advantages of Statistical Control	380
17.5	Steps in Setting Up a Control Chart	381
17.6	Control Chart for Variables Data	384
17.7	PRE-Control	391
17.8	Process Capability	393
17.9	Estimating Inherent or Potential Capability from a Control-Chart Analysis	399
17.10	Measuring Process Performance	401
17.11	Process Capability Analysis Using Probability Paper	403
17.12	The Assumptions Underlying a Process Capability Study	404
17.13	Attributes Control Charts	405
17.14	Special Control Charts	408
17.15	Statistical Process Control and Quality Improvement	411
17.16	Pursuit of Decreased Process Variability	413
17.17	The Loss Function	416
	Summary	418
	Problems	419
	References	424
	Supplementary Reading	425
18	Inspection, Test, and Measurement	426
18.1	The Terminology of Inspection	426
18.2	Conformance to Specification and Fitness for Use	427
18.3	Disposition of Nonconforming Product	430
18.4	Inspection Planning	432
18.5	Seriousness Classification	437
18.6	Automated Inspection	439
18.7	How Much Inspection Is Necessary?	440
18.8	Inspection Accuracy	441
18.9	Errors of Measurement	442
	Summary	451
	Problems	451
	References	454
	Supplementary Reading	454
19	Inspection and Test—Sampling Plans	456
19.1	The Concept of Acceptance Sampling	456
19.2	Economics of Inspection	457
19.3	Sampling Risks: The Operating Characteristic Curve	460
19.4	Analysis of Some Rule-of-Thumb Sampling Plans	463
19.5	Evaluation of Parameters Affecting Acceptance Sampling Plans	464
19.6	Quality Indices for Acceptance Sampling Plans	465

19.7	Types of Sampling Plans	467
19.8	Single Sampling, Double Sampling, and Multiple Sampling	468
19.9	Characteristics of a Good Acceptance Plan	469
19.10	ANSI/ASQC Z1.4	470
19.11	Dodge-Romig Sampling Tables	475
19.12	Acceptance Sampling by Variables	478
19.13	Sampling Procedures Based on Prior Quality Data	481
19.14	Selection of a Numerical Value of the Quality Index	482
19.15	How to Select the Proper Sampling Procedures	483
	Summary	485
	Problems	486
	References	488
	Supplementary Reading	489
20	Marketing, Field Performance, and Customer Service	490
20.1	Scope of This Chapter	490
20.2	Customer Perception of Quality	490
20.3	Quality Concepts in a Marketing Function	493
20.4	Warranty of Quality	493
20.5	Field Performance	495
20.6	Safety and Product Liability	504
20.7	Frontline Customer Contact in Service Industries	506
20.8	Processing and Resolution of Customer Complaints	507
20.9	Obtaining Feedback on Field Performance	510
20.10	Customer Defections	512
	Summary	513
	Problems	513
	References	514
	Supplementary Reading	515
21	Marketing, Field Performance, and Customer Service—Statistical Tools	516
21.1	Quality Measurement in Marketing, Field Performance, and Customer Service	516
21.2	Significance of Field Complaints	516
21.3	Estimating Lost Profit Due to Product Problems	518
21.4	Analyzing Field Data	520
	Summary	528
	Problems	528
	References	529
	Supplementary Reading	530
22	Administrative and Support Operations	531
22.1	Definition and Scope	531
22.2	Quality Planning	532

22.3	Quality Control	535
22.4	Quality Improvement	538
22.5	Business Process Quality Management	541
	Summary	546
	Problems	546
	References	547
	Supplementary Reading	547
23	Quality Information Systems	548
23.1	Scope of a Quality Information System	548
23.2	Relationship of a Quality Information System to a Management Information System	549
23.3	Planning a Computer-Based Quality Information System	550
23.4	Selection of Off-the-Shelf Software	551
23.5	Creating New Software	552
23.6	Creating the Computer Software Program	553
23.7	Controlling the Quality of Computer Software	555
23.8	Reports on Quality	557
	Summary	562
	Problems	563
	References	563
	Supplementary Reading	564
24	Quality Assurance	565
24.1	Definitions of Quality Assurance	565
24.2	Concept of Quality Assurance	565
24.3	Quality Audit—The Concept	567
24.4	Subject Matter of Audits	568
24.5	Structuring the Audit Program	569
24.6	Planning and Performing Audits on Activities	570
24.7	Human Relations in Auditing	574
24.8	Audit Reporting	575
24.9	Essential Ingredients of a Quality Audit Program	577
24.10	Quality Surveys	578
24.11	Product Audit	582
24.12	Sampling for Product Audit	584
24.13	Reporting the Results of Product Audit	584
	Summary	586
	Problems	587
	References	587
	Supplementary Reading	588
	Appendix I Examples of Examination Questions and Answers	589
	Appendix II Tables	605
	Index	621
