Introduction	
<i>Frederick Williams and David V. Gibson</i>	9
I. Challenges of Technology Innovation and Transfer	
1. The Coming Economy	
<i>George Kozmetsky</i>	21
II. The Organizational Setting of Technology Transfer	
2. The Intraorganizational Environment: Point-to-Point Versus Diffusion	43
<i>Dorothy Leonard-Barton</i>	
3. The Interorganizational Environment: Network Theory, Tools, and Applications	63
<i>Ellen R. Auster</i>	
III. Contexts of Technology Transfer	
4. Research Consortia: The Microelectronics and Computer Technology Corporation	93
<i>Christopher M. Avery and Raymond W. Smilor</i>	
5. University and Industry Linkages: The Austin, Texas, Study	109
<i>G. Hutchinson Stewart and David V. Gibson</i>	

6. University and Microelectronics Industry:
The Phoenix, Arizona, Study
Rolf T. Wigand 132
7. New Business Ventures: The Spin-Out Process
Glenn B. Dietrich and David V. Gibson 153
8. Transfer via Telecommunications:
Networking Scientists and Industry
Frederick Williams and Eloise Brackenridge 172

IV. International Perspectives

9. Mexico and the United States:
The Maquiladora Industries
Eduardo Barrera and Frederick Williams 195
10. Japan: Tsukuba Science City
James W. Dearing and Everett M. Rogers 211
11. Italy: Tecnopolis Novus Ortus and the EEC
Umberto Bozzo and David V. Gibson 226
12. Bangalore: India's Emerging Technopolis
*Arvind Singhal, Everett M. Rogers,
Harmeet Sawhney, and David V. Gibson* 240
13. Multinationals: Preparation for
International Technology Transfer
Eun Young Kim 258

V. The Literature of Technology Transfer

14. The State of the Field: A Bibliographic View
of Technology Transfer
*David V. Gibson, Frederick Williams,
and Kathy L. Wohler* 277
