| PREFACE..... | xi |
| PART ONE. THEORETICAL METHODS AND ALGORITHMS..... | 1 |
| CHAPTER | |
| I. INTRODUCTION: A GUIDE TO CONTROL-REGULATION STRUCTURES OF INFORMATIONALLY DECENTRALIZED ECONOMIC SYSTEMS..... | 3 |
| 1.1. Background of the Study and Its Limitation..... | 3 |
| 1.2. Information Structures and Patterns of Large and Decentralized Systems..... | 6 |
| 1.3. The Optimality Approach: Dynamic Team Decisions..... | 8 |
| 1.3.1. Witsenhausen's Counterexample..... | 8 |
| 1.3.2. Dynamic Teams..... | 13 |
| 1.3.3. Some Remarks..... | 17 |
| 1.3.4. Related Topics: Decentralized Stochastic Control-Regulation..... | 19 |
| 1.4. The Stability and Stabilizability Approach..... | 22 |
| 1.4.1. Stabilization of Interconnected System and Related Topics..... | 22 |
| 1.4.2. McFadden's Decentralized Macroeconomic Systems..... | 25 |
| 1.5. The Control Simulation Approach..... | 27 |
| 1.6. Some Comments..... | 30 |
| References..... | 34 |
| II. INFORMATION AND CONTROL-REGULATION STRUCTURES OF A LARGE AND DECENTRALIZED SYSTEM..... | 39 |
| 2.1. Introduction..... | 39 |
| 2.2. The Model of a System and Controllability Conditions..... | 41 |
| 2.3. Information Structures and Observability Conditions..... | 43 |
| 2.4. Optimal Control Problem..... | 52 |
| 2.5. Optimal Condition..... | 53 |
| 2.6. Regulation Structure..... | 57 |

| | |
|---|-----|
| 2.7. Conclusions and Some Remarks..... | 62 |
| References..... | 63 |
| III. DYNAMIC TEAM DECISION FOR INFORMATIONALLY DECENTRALIZED CONTROL-REGULATION..... | 67 |
| 3.1. Introduction..... | 67 |
| 3.2. Informationally Decentralized Control-Regulation Problem..... | 69 |
| 3.3. Dynamic Team Decision..... | 72 |
| 3.4. Optimal Solutions..... | 75 |
| 3.4.1. The One-Step-Delay Sharing Information Case | 77 |
| 3.4.2. The Two-Step-Delay Sharing Information Case | 78 |
| 3.5. An Illustrative Example: An Aggregate Production Planning Model..... | 80 |
| Appendix: Suboptimal Decentralized Control-Regulation of Linear Stochastic System..... | 83 |
| 3.A.1. The Model and Problem Statement..... | 83 |
| 3.A.2. PBPS Team Decision Rules..... | 86 |
| 3.A.3. Some Remarks and Further Research..... | 88 |
| References..... | 89 |
| IV. A DECENTRALIZED COMPUTATIONAL METHOD AND ALGORITHM FOR TEAMS DECISION: AN ILLUSTRATIVE EXAMPLE..... | 93 |
| 4.1. Introduction..... | 93 |
| 4.2. The Basic Aggregate Production Planning Model and the Optimal Control Procedure..... | 94 |
| 4.2.1. The Basic Model..... | 94 |
| 4.2.2. The Optimal Control Procedure..... | 98 |
| 4.3. The Practical Control Simulation Method..... | 103 |
| 4.3.1. The Extended Model..... | 103 |
| 4.3.2. Determination of Optimal Planning Frame..... | 107 |
| 4.4. Some Remarks..... | 110 |
| References..... | 111 |

| | | |
|------|--|-----|
| V. | DYNAMIC OPTIMIZATION OF HIERARCHICAL INTERCONNECTED SYSTEMS..... | 113 |
| | 5.1. Introduction..... | 113 |
| | 5.2. Hierarchical Two-Level Control Structure..... | 115 |
| | 5.3. Two-Level Feedback Control Solution for Interaction Prediction Principle..... | 120 |
| | 5.4. An Illustrative Example: Model Formulation of Production Planning..... | 126 |
| | 5.5. Concluding Remarks..... | 130 |
| | References..... | 132 |
| VI. | STATE SPACE REPRESENTATION FOR MACROECONOMETRIC INTERCONNECTED MODELS AND HIERARCHICAL OPTIMIZATION BY DECOMPOSITION-COORDINATION..... | 133 |
| | 6.1. Introduction..... | 133 |
| | 6.2. State Space Representation for Macroeconometric Models Consisting of Interconnected Submodels.... | 134 |
| | 6.2.1. ϵ -Minimal Dimension Realization..... | 134 |
| | 6.2.2. State Space Representation for Macroeconometric Interconnected Submodels.... | 140 |
| | 6.3. Dynamic Optimization by Decomposition-Coordination..... | 141 |
| | 6.3.1. Two-Level Control Algorithm..... | 141 |
| | 6.3.2. Coordination Algorithm..... | 150 |
| | 6.3.3. The State Estimation of Hierarchical Level... | 160 |
| | 6.4. Conclusions and Further Research..... | 162 |
| | References..... | 165 |
| | PART TWO. APPLICATIONS AND METHODS IN PRACTICE..... | 167 |
| | CHAPTER | |
| VII. | A DIFFERENTIAL GAME FOR DECENTRALIZED MACROECONOMIC POLICIES IN INTERDEPENDENT ECONOMIES..... | 169 |
| | 7.1. Introduction..... | 169 |
| | 7.2. The Dynamic Game Model of Decentralized Interdependent Economies..... | 171 |

| | |
|---|-----|
| 11.2.1. Modeling for the Problem..... | 260 |
| 11.2.2. Linearized Model and Its Solutions..... | 263 |
| 11.3. The Control Simulation Method..... | 265 |
| 11.3.1. Convergent Criteria..... | 265 |
| 11.3.2. Coordination Problem..... | 267 |
| 11.4. The Practical Computation..... | 269 |
| 11.4.1. A Computational Method..... | 269 |
| 11.4.2. A Numerical Example..... | 271 |
| 11.4.3. Some Comments..... | 275 |
| 11.5. Suggestions for Further Research: Robust Design Methods..... | 276 |
| References..... | 279 |
| BIBLIOGRAPHY..... | 281 |

| | | |
|--------|--|-----|
| 7.2.1. | The Dynamic Game Model..... | 171 |
| 7.2.2. | State Space Representation for the Model..... | 174 |
| 7.3. | Controllability and a Dynamic Interpretation of Tinbergen Theorem..... | 177 |
| 7.4. | Optimal Control Policy of the Model..... | 182 |
| 7.5. | Nonzero-Sum Different Game for the Model..... | 185 |
| 7.5.1. | The Assumptions and Game Rules..... | 185 |
| 7.5.2. | Min-Min Control and Counteract-Move Control Games..... | 187 |
| 7.5.3. | Necessary and Sufficient Conditions for the Existence of Optimal Solution..... | 190 |
| 7.6. | Concluding Remarks..... | 193 |
| | References..... | 200 |
| VIII. | DECENTRALIZED STABILIZATION POLICIES IN INTERDEPENDENT ECONOMIES..... | 205 |
| 8.1. | Introduction..... | 205 |
| 8.2. | A Prototype Model of Open Economy..... | 205 |
| 8.3. | Decentralized Stabilization Policies..... | 209 |
| 8.3.1. | Decentralized Controllability: McFadden's Method..... | 209 |
| 8.3.2. | The Stabilization Policy 1..... | 211 |
| 8.3.3. | The Stabilization Policy 2..... | 214 |
| 8.4. | Some Remarks..... | 215 |
| | References..... | 216 |
| IX. | UNCOORDINATED STABILIZATION POLICIES FOR AN INFORMATIONALLY DECENTRALIZED ECONOMIC MODEL..... | 217 |
| 9.1. | Introduction..... | 217 |
| 9.2. | The Static Decentralized Policy..... | 218 |
| 9.3. | The Dynamic Decentralized Policy..... | 221 |
| 9.4. | The Basic Model of an Informationally Decentralized Economic Model and the Qualitative Analysis..... | 222 |
| 9.4.1. | The Basic Model and Its Conventional Analysis..... | 222 |

| | |
|--|-----|
| 9.4.2. Decentralized Policies and Stability: | |
| The Dynamic Case..... | 226 |
| 9.4.3. The Equilibrium Value and the Bias..... | 228 |
| 9.5. Further Research Suggested..... | 229 |
| 9.5.1. An Extension of the Model..... | 229 |
| 9.5.2. Rational Expectations, Information and Stabilization Policy..... | 231 |
| 9.5.3. The Direction and Design of Extended Model Formulation..... | 234 |
| References..... | 236 |

| | | |
|-----------|--|-----|
| X. | A QUANTITATIVE ANALYSIS OF DECENTRALIZED STABILIZATION POLICIES FOR MACROECONOMETRIC MODEL: COORDINATION AND UNCOORDINATION..... | 239 |
| 10.1. | Introduction..... | 239 |
| 10.2. | Policy Optimization for Macroeconometric Model..... | 240 |
| 10.2.1. | The Linearized Approximation..... | 240 |
| 10.2.2. | Determination of Feedback Parameter..... | 241 |
| 10.3. | Decentralized Stabilization Policies for Klein's Model I..... | 243 |
| 10.3.1. | Klein's Model I..... | 243 |
| 10.3.2. | Coordinated Policy..... | 244 |
| 10.3.3. | Uncoordinated Policy..... | 246 |
| (i). | The Government Sector..... | 246 |
| (ii). | The Private Sector..... | 247 |
| 10.4. | The Bias of the Decentralized Policy Rule..... | 248 |
| 10.5. | Some Remarks..... | 253 |
| Appendix: | Uchida's Control Test | 254 |
| | References..... | 257 |

| | | |
|-------|--|-----|
| XI. | TOWARDS A PRACTICAL METHOD OF MODELING AND SIMULATION ANALYSIS..... | 259 |
| 11.1. | Introduction..... | 259 |
| 11.2. | Modeling and Its Control Solutions..... | 260 |
