

1. Principles of hematological cytomorphology	1
Technical notes	2
Anatomy and general pathology of cytomorphology	4
2. Automated methods in cytomorphological diagnosis	27
The three roles of automated differential counts	27
Automated methods for differential counting of leukocytes	30
Atypical cellular populations in automated cytochemistry	33
3. Myelodysplastic syndromes	43
Hemocytometry and peripheral blood morphology	44
Bone marrow morphology	49
Non-morphological abnormalities	69
The FAB classification of the myelodysplastic syndromes	69
Secondary myelodysplastic syndromes	85
Myelodysplastic syndromes not included in the FAB classification	89
Myelodysplasia in HIV infection	93
4. Chronic granulocytic leukemia and other myeloproliferative disorders ..	101
Chronic phase	101
Atypical chronic myeloid leukemia	108
Accelerated phase and blast crisis	115
Other myeloproliferative disorders	133
5. Acute myeloid leukemia	149
General criteria for the diagnosis and classification of the acute myeloid leukemia	149
Acute leukemia with granulocytic differentiation	158
Promyelocytic leukemia	179
Acute leukemia with monocytic differentiation	190
Erythroleukemia	206
Megakaryocytic leukemia	213
Acute myeloid leukemia with trilineage myelodysplasia	218
Secondary leukemia	220
Mixed lineage leukemia	222
6. Acute lymphoblastic leukemia	227
The morphological diagnosis of acute lymphoblastic leukemia	228
The integrated approach to the diagnosis of acute lymphoblastic leukemia	247

7. Lymphoproliferative disorders	257
<i>Lymphoproliferative disorders of B-lineage</i>	258
B-lineage chronic lymphocytic leukemia	258
B-lineage prolymphocytic leukemia	273
Hairy cell leukemia	276
Variant form of hairy cell leukemia (hairy cell variant)	281
<i>B-cell non-Hodgkin's lymphoma</i>	285
Splenic lymphoma with villous lymphocytes	286
Follicular lymphoma	289
Well differentiated lymphocytic lymphoma	295
Mantle cell lymphoma	296
Monocytoid B-cell lymphoma	297
Immunocytoma (lymphoplasmacytoid lymphoma)	298
High grade non-Hodgkin's lymphoma	298
<i>Lymphoproliferative disorders of T-lineage</i>	303
Large granular lymphocyte leukemia	303
T-lineage prolymphocytic leukemia	305
<i>Leukemic forms of T-cell lymphoma</i>	309
Cutaneous T-cell lymphoma	309
Adult T-cell leukemia-lymphoma	310
T-cell non-Hodgkin's lymphoma	311
8. Multiple myeloma and Waldenström's macroglobulinemia	317
Multiple myeloma	317
Plasma cell leukemia	341
Waldenström's macroglobulinemia	347
Other plasma cell dyscrasias	351
9. The rediscovery of the reticulocyte	357
Automated methods of reticulocyte counting	359
Reticulocyte maturation	363
Reticulocyte indices	365
Reticulocytes in hematological diagnosis	366
Bibliography	375
Index	377

List of reports

Chapter 3

Refractory anemia (Report 3.1)	48
Refractory anemia (Report 3.2)	56
Refractory anemia with excess of blasts (Report 3.3)	60
Secondary myelodysplastic syndrome, refractory anemia (Report 3.4) ...	64
Refractory anemia with excess of blasts in transformation (Report 3.5) ..	66
Refractory anemia with excess of blasts in transformation (Report 3.6) ..	70
Refractory anemia with excess of blasts (Report 3.7)	72
Refractory anemia with excess of blasts in transformation with monocytosis (Report 3.8)	76
Chronic myelomonocytic leukemia at presentation (Report 3.9)	80
Chronic myelomonocytic leukemia (Report 3.10)	82
Chronic myelomonocytic leukemia with marked leukocytosis (Report 3.11)	84
Chronic myelomonocytic leukemia (Report 3.12)	86
Chronic myelomonocytic leukemia with marked myeloproliferative features (Report 3.13)	88
Acute transformation of chronic myelomonocytic leukemia (Report 3.14)	90
Myelodysplasia in a patient with HIV infection (Report 3.15)	92

Chapter 4

Chronic granulocytic leukemia at diagnosis (Report 4.1)	104
Chronic granulocytic leukemia during treatment (Report 4.2)	106
Atypical chronic myeloid leukemia (Report 4.3)	112
Leukemoid reaction (Report 4.4)	114
Chronic granulocytic leukemia, accelerated phase (Report 4.5)	118
Myeloid blast crisis of chronic granulocytic leukemia (Report 4.6)	120
Megakaryocytic blast crisis of chronic granulocytic leukemia (Report 4.7)	126
Blast crisis of chronic granulocytic leukemia with involvement mainly of basophil lineage (Report 4.8)	128
Lymphoid blast crisis of chronic granulocytic leukemia (Report 4.9)	130
Polycythemia rubra vera (Report 4.10)	136
Polycythemia rubra vera (Report 4.11)	138
Essential thrombocythemia (Report 4.12)	140
Polycythemia rubra vera, evolution to myelofibrosis (Report 4.13)	146

Chapter 5

Acute myeloid leukemia with minimal maturation (FAB M0) (Report 5.1)	164
Acute myeloid leukemia without maturation (FAB M1) and with expression of lymphoid antigens (Report 5.2)	168

Acute myeloblastic leukemia with early granulocytic differentiation (FAB M1) (Report 5.3)	172
Acute myeloid leukemia with maturation (FAB M2) (Report 5.4)	174
Hypergranular promyelocytic leukemia (AML M3) (Report 5.5)	184
Acute myelomonocytic leukemia (FAB M4) with eosinophilia (Report 5.6)	194
Acute monoblastic leukemia without maturation (FAB M5a) (Report 5.7)	200
Acute monocytic leukemia with maturation (FAB M5b) (Report 5.8)	204
Erythroleukemia (FAB M6) with trilineage cytopenia (Report 5.9)	210
Megakaryocytic leukemia (FAB M7) (Report 5.10)	216

Chapter 6

Acute lymphoblastic leukemia (FAB L1) (Report 6.1)	234
Acute lymphoblastic leukemia (FAB L2) with common ALL phenotype (CD10+), Ph positive (Report 6.2)	240
Acute lymphoblastic leukemia (FAB L3) in a patient suffering from AIDS (Report 6.3)	244

Chapter 7

Chronic lymphocytic leukemia, B lineage, at presentation (Report 7.1) . .	262
Chronic lymphocytic leukemia, B-lineage, mixed cell type (CLL/PL) (Report 7.2)	268
Prolymphocytic leukemia, B-lineage (Report 7.3)	274
Hairy cell leukemia (Report 7.4)	280
Follicular lymphoma, already in leukemic phase at presentation (Report 7.5)	290
Follicular lymphoma/leukemia of mixed cell type (centrocytic-centroblastic) (Report 7.6)	294
Sézary's syndrome (Report 7.7)	308

Chapter 8

De novo plasma cell leukemia (Report 8.1)	344
Plasma cell leukemia as the terminal phase of multiple myeloma (Report 8.2)	346
