Preface	v
---------------	---

Part I: Psychological Assessment

Chapter 1	Computer-Assisted Ambulatory Performance Tests in Everyday Situations: Construction, Evaluation, and Psychometric Properties of a Test Battery Measuring Mental Activation	3
	<i>Lothar Buse and Kurt Pawlik</i>	
Chapter 2	Simultaneous Computer-Assisted Assessment of Causal Attribution and Social Coping in Families	25
	<i>Meinrad Perrez, Peter Wilhelm, Dominik Schoebi, and Monique Horner</i>	
Chapter 3	Psychological Monitoring in Sociodiagnosics	45
	<i>Urs Baumann, Ludwig Feichtinger, and Claudia Thiele</i>	
Chapter 4	Electronic Momentary Assessment: Real-World, Real-Time Measurement of Patient Experience	69
	<i>Michael R. Hufford, Saul Shiffman, Jean Paty, and Arthur A. Stone</i>	
Chapter 5	MONITOR: Acquisition of Psychological Data by a Hand-Held PC ...	93
	<i>Jochen Fabrenberg, Paul Hüttner, and Rainer Leonhart</i>	
Chapter 6	Does the Retrospection Effect Hold as a Stable Phenomenon? First Results from a Transcultural Self-Monitoring Study of Mood and Cognitive States in Brazil and Germany	113
	<i>Christoph Käppler and Stephan Rieder</i>	
Chapter 7	Ambulatory Monitoring of Diurnal Changes in Pain in Chronic Pain Disorder, Migraine and Rheumatoid Arthritis	123
	<i>Guido Godaert, Marjolijn Sorbi, Madelon Peters, Caroline Dekkers, and Rinnie Geenen</i>	
Chapter 8	Development and User's Acceptance of the General Electronic Psychotherapy Diary	129
	<i>Michael Hinkel and O. Berndt Scholz</i>	
Chapter 9	States of Aversive Tension in Patients with Borderline Personality Disorder: A Controlled Field Study	135
	<i>Christian Stiglmayr, Tanja Grathwol, and Martin Bobus</i>	
Chapter 10	Daily Mood Reports in Hindsight: Results of a Computer-Assisted Time Sampling Study	143
	<i>Petra Hank, Peter Schwenkmezger, and Jens Schumann</i>	

Chapter 11	Time Series Analysis of Diary Data	157
	<i>Ralf Ott and O. Berndt Scholz</i>	
Chapter 12	A Multilevel Approach to Analyze Ambulatory Assessment Data: An Examination of Family Members' Emotional States in Daily Life ...	173
	<i>Peter Wilhelm</i>	

Part II : Psychophysiological Assessment

Chapter 13	Posture and Motion Analysis by Ambulatory Accelerometry	193
	<i>Hans Bussmann, Rita van den Berg-Emons, and Henk Stam</i>	
Chapter 14	Accelerometry in Clinical Psychophysiology	207
	<i>Joke Tulen, Anita Volkers, Dirk Stronks, Marinel Cavelaars, and Wim Groeneveld</i>	
Chapter 15	Assessment of Posture, Motion, and Hand Tremor by Calibrated Accelerometry	233
	<i>Friedrich Foerster</i>	
Chapter 16	Ambulatory Monitoring of Blood Pressure in Daily Life: A Tool for Investigating Psychosocial Processes	257
	<i>Andrew Steptoe</i>	
Chapter 17	The Assessment of Blood Pressure Variability in Behavior Modification: The Identification of Relevant Situation and Mood Factors	271
	<i>Lutz Mussgay, Frithjof Niegot, and Heinz Rüddei</i>	
Chapter 18	Ambulatory 24-Hour Monitoring of Brachial and Finger Blood Pressure in Normotensive and Hypertensive Males	293
	<i>Reingard Seibt, André Berndt, Dieter Knöpfel, and Klaus Scheuch</i>	
Chapter 19	Respiratory Pathophysiology of Clinical Anxiety Outside the Laboratory: Assessment of End-Tidal pCO ₂ , Respiratory Pattern Variability, and Transfer Function RSA	313
	<i>Frank H. Wilhelm, Georg W. Alpers, Alicia E. Meuret, and Walton T. Roth</i>	
Chapter 20	Cardiovascular Reactivity to Work Stress Assessed by Ambulatory Blood Pressure, Heart Rate, and Heart Rate Variability	345
	<i>Tanja G. M. Vrijkotte, Harriette Riese, and Eco J. C. de Geus</i>	
Chapter 21	Objective Characteristics of Jobs Affect Blood Pressure at Work, after Work, and at Night	361
	<i>Renate Rau</i>	

Chapter 22	Heart Rate Monitoring in an Academic Test Situation	387
	<i>Hans Zeier, Alexandra Häseli, and Joachim Fischer</i>	
Chapter 23	On-Line Measurement of Additional Heart Rate. Methodology and Applications	399
	<i>Michael Myrtek and Friedrich Foerster</i>	
Chapter 24	Interactive Psychophysiological Monitoring of Emotions in Students' Everyday Life. A Replication Study	415
	<i>Michael Myrtek, Denis Zanda, and Eveline Aschenbrenner</i>	
Chapter 25	In-Flight Psychophysiological Monitoring	435
	<i>Glenn Wilson</i>	
Chapter 26	Psychophysiological Monitoring of Air Traffic Controllers: Exploration, Simulation, Validation	455
	<i>Joachim Vogt and Michael Kastner</i>	
Chapter 27	Ecological Momentary Assessment in Aviation: The Development of a Pilot Experience Evaluating Device (PEED) for the In-Flight Registration of Flight Phases, Mental Effort, and Reaction Time	477
	<i>Eamonn K. S. Hanson and Jan Barzański</i>	
Chapter 28	Ambulatory Monitoring of Menopausal Hot Flashes	493
	<i>Robert R. Freedman</i>	
Chapter 29	Giving Feedback to Asthma Patients. Ambulatory Monitoring in Patient Education	505
	<i>Christian Leopold and Rainer Schandry</i>	
Chapter 30	Ambulatory Assessment of Hypoglycemia Unawareness in Type 1 Diabetes	525
	<i>Thomas Kubiak and Norbert Hermanns</i>	
Chapter 31	Feasibility of Ambulatory Sleep Diagnosis	535
	<i>Egon Stephan, Dirk Alfer, Ansgar Feist, Leonie Fricke, Markus Mühlensiepe, Rolf K. Weiss, and Jörn P. Sieb</i>	
Chapter 32	Electrodermal Long-Term Monitoring in Everyday Life	549
	<i>Wolfram Boucsein, Florian Schaefer, and Thorsten Sommer</i>	
Chapter 33	Some New Developments in Ambulatory Assessment Devices	561
	<i>Egon Stephan, Gerhard Mutz, Ansgar Feist, and Rolf K. Weiss</i>	
Chapter 34	From Ambulatory Assessment to Telemedicine. Conceptual, Technical and Political Aspects of Remote Data Assessment and Transfer	569
	<i>Christian Leopold</i>	

Chapter 35	Origins and Developments of Ambulatory Monitoring and Assessment	587
	<i>Jochen Fabrenberg</i>
