Acknowledgements	viii
Preface	ix
Part I Introduction	
Chapter 1 Some problems of Economic Science's Methodology	3
1.1 The relationship between economic theory and reality	3
1.2 Economic theory and tools	7
Part II The origins and development of Input-Output analysis and General Equilibrium Theory	
Chapter 2 The origins of Input-Output analysis	15
2.1 Walras' theoretical version of Input-Output	15
2.2 Marx's monetary (empirical) Version of Input-Output	18
2.3 Leontief's Input-Output	24
Chapter 3 Classical General Equilibrium Theory	28
3.1 Smith - the originator of General Equilibrium Theory	28
3.2 Walras' original General Equilibrium Theory	38
3.3 Marx and General Equilibrium Theory	52
Part III Complete Input-Output system models	
Chapter 4 Original (theoretical) Input-Output system models	63
4.1 Problems in Input-Output analysis	63
4.2 Original structure of Input-Output	65

4.3 Quantitative demand model of Input-Output	67
4.4 Supply price model with absolute and different prices	68
Chapter 5 Empirical (monetary) Input-Output system models	75
5.1 Input-Output in monetary terms	75
5.2 Quantitative demand models of monetary Input-Output	79
5.3 Quantitative supply models of monetary Input-Output	81
5.4 Supply price models of monetary Input-Output	82
5.5 Demand price models of monetary Input-Output	85
 Part IV The Renewal Classical General Equilibrium Theory	
Chapter 6 Mixed competition's General Equilibrium Theory with Price (Wages, Profits) Discrimination à la Walras	91
6.1 Definitions	92
6.2 Quantitative equilibrium	98
6.3 Price equilibrium	99
6.4 The iterative process of establishment of General Equilibrium analysis - a numerical example	101
Chapter 7 Applicable general equilibrium analysis	108
7.1 Demand side general equilibrium	108
7.2 General Equilibrium from the supply side of factors	111
7.3 Iterative process of adjustment	113
 Part V Practical Application and Conclusions	
Chapter 8 General equilibrium analysis: a case study-Israel	117
8.1 Small open economics specific problems	117
8.2 The inverse linkage between the prices of exported commodities and factors	119
8.3 Export, import and exchange rate in the small open economy	128
Chapter 9 Summary and Conclusions	138
9.1 Summary of Chapters	138
9.2 Warning from the mathematization of economic theory	143
 Appendices	
A An example of the confusion between monetary and theoretical Input-Output	151
B Marx and some economic aspects of Perestroika	153
C Transformation of prices	156

D Inaccuracy of the title "index" for the price	158
E Seton's review	161
Bibliography	169
Index of names	175
Subject index	177
