|--|------------|
| <b>Introduction</b>  | <b>vii</b> |
| <b>Chapter 1. Classes of Linear Operators</b>  | <b>1</b>   |
| 1.1. Basic notions   | 1          |
| 1.2. Closed and closable operators   | 4          |
| 1.3. Normally solvable operators   | 12         |
| 1.4. Invertibly reducible operators  | 18         |
| 1.5. Pseudo-resolvents   | 29         |
| <b>Chapter 2. Semigroups of Operators and Markov Processes</b>   | <b>33</b>  |
| 2.1. Basic notions   | 33         |
| 2.2. Infinitesimal operators of ergodic Markov processes   | 35         |
| 2.3. Holomorphic semigroups with invertibly reducible infinitesimal operators  | 43         |
| 2.4. Semigroups of operators uniformly and strongly ergodic at the infinity  | 46         |
| 2.5. "Generating" operators of ergodic semi-Markov processes   | 53         |
| 2.6. Abstract potential operators  | 57         |
| 2.7. Examples of invertibly reducible operators  | 65         |
| <b>Chapter 3. Perturbations of Invertibly Reducible Operators</b>  | <b>81</b>  |
| 3.1. Eigen-projectors and eigen-operators  | 81         |
| 3.2. Inversion of an invertibly reducible operator perturbed on the spectrum   | 90         |
| 3.3. Resolvents of singularly perturbed semigroups   | 98         |
| 3.4. Limit theorems and asymptotic expansions for resolvents of singularly perturbed semigroups                      | 103        |
| 3.5. Limit theorems and asymptotic expansions for resolvents of singularly perturbed semigroups. The case of $s > 2$ | 109        |

|   |            |
|---|------------|
| <b>Chapter 4. Singular Perturbations of Holomorphic Semigroups</b>                | <b>119</b> |
| 4.1. Principal problems. The method of Vishyk-Lyusternik-Vasilyeva                | 119        |
| 4.2. Structure of singularly perturbed semigroups                                 | 121        |
| 4.3. Regular lumped approximations to solutions of singularly perturbed equations | 127        |
| <br>  |            |
| <b>Chapter 5. Asymptotic Expansions and Limit Theorems</b>                        | <b>131</b> |
| 5.1. Strong limits of singularly perturbed semigroups. Resolvent approach         | 131        |
| 5.2. Asymptotic analysis of singularly perturbed semigroups. The case of $s = 1$  | 134        |
| 5.3. Asymptotic analysis of singularly perturbed semigroups                       | 153        |
| <br>  |            |
| <b>Chapter 6. Asymptotic Phase Lumping of Markov and Semi-Markov Processes</b>    | <b>167</b> |
| 6.1. Limit theorems   | 167        |
| 6.2. Asymptotic phase lumping. The case of $s = 1$                                | 181        |
| 6.3. Some examples  | 198        |
| 6.4. Asymptotic phase lumping. The case of $s \geq 2$                             | 202        |
| 6.5. Classification of processes admitting asymptotic phase lumping               | 213        |
| 6.6. Limit theorems and asymptotic theorems for additive functionals              | 214        |
| <br>  |            |
| <b>Chapter 7. Applications of the Theory of Singularly Perturbed Semigroups</b>   | <b>241</b> |
| 7.1. Tikhonov systems of differential equations                                   | 241        |
| 7.2. Nonrelativistic limit of the Dirac operator                                  | 246        |
| 7.3. Hydrodynamic limit for the linearized Boltzmann equation                     | 254        |
| <br>  |            |
