

CONTENTS

Series Editor's Introduction	1
1. Introduction	3
Definition of Data Theory	4
Objectives of This Monograph	4
2. Measurement	5
Measurement as Theory Testing	5
Levels of Measurement	7
3. Data Theory	13
Data as a Geometric Model	14
Coombs's Theory of Data	16
An Alternative Theory of Data	22
The Importance of Data Theory	26
4. Dimensionality	26
Dimensionality as Variation Among Objects	27
Dimensionality as a Mathematical Model	28
Physical Versus Conceptual Dimensions	29
Scaling and Dimensional Analysis	33
Scaling Results and Interpreting Dimensions	37
5. Data Theory and Scaling Methods	38
Single Stimulus Data	38
Stimulus Comparison Data	53
Similarities Data	58
Preferential Choice Data	66
Interpretations of Data	72
6. Alternating Least Squares, Optimal Scaling	74
7. Conclusions	81
Notes	82
References	85
About the Author	89
