Part III The standard of living and the London trades		157
6 The making of a wage rate		161
7 The challenge of sweated labour: a tale of four trades		179
8 The defences of the inferior artisans		209
Conclusion: downstream from industrialisation		231

Appendices:

1	Seventeenth- and eighteenth-century sources on occupations and incomes	241
2	Occupations insured with <i>Sun Fire Office</i> and <i>Royal Exchange Assurance, 1775–87</i>	250
3	1851 census: Armstrong classification	255
4	1851 census: summary tables	259
	<i>Bibliography</i>	265
	<i>Index</i>	281

Figures

1.1	1851 census: occupations in London (both sexes)	<i>page</i> 12
1.2	1851 census: percentage formed by Londoners of all people engaged in that economic activity, England and Wales (both sexes)	12
1.3	1851 census: economic activity in London compared with rest of England and Wales (both sexes)	13
1.4	1851 census: female occupations in London	15
1.5	1851 census: percentage formed by London females of all females engaged in that economic activity, England and Wales	16
1.6	1851 census: economic activity in London compared with rest of England and Wales (females)	16
1.7	1851 census: male occupations in London	24
1.8	1851 census: percentage formed by London males of all males engaged in that economic activity, England and Wales	24
1.9	1851 census: economic activity in London compared with rest of England and Wales (males)	25
2.1	Distribution of insured property by value among London trades, 1775–87	68
3.1	London building deeds, 1715–80	81
3.2	Net imports, London and outports, 1700–76	81
3.3	Beer production in London, 1700–1800	82
3.4	Coal imports to Port of London, 1715–1820	82
3.5	Tonnage of shipping entering Port of London, 1772–1850	86
3.6	Inward volumes, Port of London and UK, 1816–50	86
3.7	London building deeds, 1780–1860	88
3.8	Growth rate of London building deeds, 1720–1850	88

3.9	Bankruptcies in London, 1710-97	91
3.10	Peaks and troughs in London bankruptcies (1-3 stars), 1710-97	91
4.1	Monthly tonnage of ships entering the Port of London, 1835	107
4.2	Weekly wage bill of the West India Docks, 1811-12	108
4.3	Wet seasons in London, 1690-1850	114
4.4	Cold and freezing winters in England, 1690-1850	115
5.1	Percentage of deaths from various causes, London, 1688-1818	139
6.1	Money wage rates in London, 1700-1850	170
6.2	Cost of living indices, 1700-1850	171
6.3	Real wage rates of London bricklayers, 1700-1850	172

Tables

1.1	Female servants as percentage of total population, late seventeenth century	<i>page</i> 18
1.2	Female employment: insurance registers 1775–87 and 1851 census	21
1.3	Male servants as percentage of total population, late seventeenth century	26
2.1	1851 male occupied population: the most concentrated trades	41
2.2	The largest London male occupations, 1851	42
2.3	1851 census: women's occupations by age	47
2.4	Median incomes according to the amount of assessed tax paid annually	53
2.5	Distribution of taxed houses by amount of assessed tax paid	54
2.6	Shops per 100 taxable houses, 1798	61
2.7	Campbell's estimate of the cost of setting up a shop in London, 1747	62
2.8	Comparison of Campbell's estimate of the cost of setting up shop in London with median and top of third-quartile insurance policies, 1775–87	65
2.9	Insurance policies for London trades, 1776–85: mean, median, upper-quartile values and Gini coefficients	66
2.10	London occupations: liability for surtax in 1692 compared with rank order of insurance policy values, 1775–87	72
3.1	Peaks of bankruptcy in London and provincial England, 1708–1800	93
3.2	Trade cycles in England, 1785–1855	94
3.3	Recruitment for wartime, 1701–1815	97

4.1	Cold and freezing winters in London, 1690–1850	116
5.1	London's population, 1550–1851	126
5.2	Percentage natural increase in population of England required for different estimates of London's growth	127
5.3	London's crude death rate under different assumptions	131
5.4	Convulsions and infant mortality	132
5.5	Fall in mortality by age, 1730s–1838/44	134
5.6	Principal components of the fall in mortality, 1730s–1838/44	135
5.7	Convulsions and fever: correlation coefficients	136
5.8	Convulsions and smallpox: correlation coefficients by age	137
5.9	Expectation of life of London Quakers at birth and at age 30	138
5.10	Deaths from convulsions and fever: correlation coefficients	142
5.11	Deaths from measles: average difference from the mean by quarter century, 1750–1824	143
5.12	Mortality crises in London, 1690–1830	146
5.13	Increases of mortality in crisis years: proportion of increased mortality caused by smallpox, fever, consumption and bread prices	146
6.1	Decennial changes in London bricklayers' real wage rates, 5-year moving averages, 1750–1800	173
6.2	Assessment of rents under Schedule A, houses only, fixed prices (PBH index), 1806–14	176
7.1	Declared values of woollen fabrics exported as a percentage of the 1814–16 valuation	193
A1.1	London occupations, 1641–1700, compared with census returns, 1851	243
A1.2	London occupations, 1690s, compared with census returns, 1851	244
A2.1	Sectoral distribution of occupations insured with Sun Fire Office and Royal Exchange Assurance, 1775–87	254
