1 Introduction	1
The Japanese Challenge	1
Explaining the Challenge: Culture, Institutions and History	3
Imitation and Innovation	4
Technology and the Japanese Periphery	5
Social Networks and Innovation	7
 Part I The Tokugawa Heritage, 1603–1867	
2 Society and Technology in Tokugawa Japan	13
Foreign Influences in a ‘Closed Country’	15
Heredity and Hierarchy	18
<i>Soroban</i> and Sword	20
Science and the Samurai	23
‘Develop Products, Promote Enterprise’	27
Peace and the Printed Word	32
Nature of Tokugawa Technology	34
Silk and Cotton	36
Gold, Silver and Iron	43
Saké-brewing	49
Carpentry and Instrument-making	51
3 Opening the Doors	55
Of Cannons, Iron Furnaces and the Outer Domains	55
Japan and the Black Ships	61
Hired Foreigners and Japanese Abroad	63

Part II Technology in Industrialising Japan, 1868–1945

4	Technology and the Meiji State, 1868–1912	71
	‘Under Reconstruction’	71
	The State-centred Approach	72
	The Revisionist Approach	84
	The Social Network Approach	88
5	Systems-building and Science-based Industry, 1912–1937	105
	Corporate Research and the Social Network of Innovation	106
	Science and Business: Company Research and the Acquisition of Technology	108
	The State and Corporate Research	122
	Subcontracting and Small Firms	129
	Government Planning and the Rise of Technology Policy	136
6	A War of Science and Technology, 1937–1945	143
	A New Order for Science and Technology	143
	The War and Corporate Research	149
	Subcontracting and the ‘Just-in-time’ System	153
	Scientists and Social Responsibility	155

Part III The Making of a Technological Superpower, since 1945

7	Technology and the ‘Economic Miracle’, 1945–1973	161
	Democracy, Technology and the New Japan	161
	Back to the Future: Technological and Industrial Recovery	164
	Imported Technology and Indigenous Innovation	166
	Rationalisation and the Productivity Movement	172
	From Rationalisation to Automation: Postwar Technology Policies	177
	The Social Network of Innovation in Postwar Japan	182
	Technology, Society and the Environment	202
8	High-tech Japan	209
	The Collapse of High Growth and the Birth of the ‘Information Society’	210
	Next Generation Technologies	212
	The Changing Shape of Corporate Research	219

<i>Index</i>	293

Illustrations

Map	Japan	x
2.1	Weaving looms	22
2.2	Silk-reeling equipment	38
2.3	Ore selectors at Besshi copper mines, c. 1800	46
2.4	Bellows	48
4.1	The Tsukiji silk factory, early 1870s	76
4.2	Illustration from Fukuzawa Yukichi's science text	81
4.3	The rattling spindle	90
5.1	The Shibaura electric factory	109
5.2	Domestic innovation and consumer reaction	119
5.3	Backstreet workshops, early 1920s	130
5.4	Japan prepares for war	138
7.1	Imports of technology, 1952–70	169
7.2	Imports of technology by country of origin, 1951–70	170
7.3	Advertisements for the Toyopet, mid 1950s	173
7.4	Consumer goods in postwar Japan	206
8.1	Designated Technopolises	227
8.2	Nuclear power as a social issue	234
8.3	Japan's experimental module for the 'Freedom' space station	237
8.4	Exports and imports of technology, 1980–90	241
8.5	Exports of technology by region, 1980–89	241

Tables

4.1	Foreign technicians employed by government and private enterprise, 1870s–1890s	79
5.1	Economic and population growth in Japan, 1911–1938	133
5.2	Indices of industrial production, 1940	137
5.3	Grants to inventors and private research laboratories, 1926–1937	139
6.1	Research projects of industrial laboratories, by topic, 1942	148
6.2	Research institutions: an international comparison	150
7.1	Research investment and the import of technology, by industry, 1960–1961	170
7.2	Government research expenditure as a percentage of all research expenditure, various countries, 1972	183
7.3	Research expenditure by sector of performance, various countries, 1972	184
8.1	The concentration of research and development (R&D) in Japan, 1970 and 1990	224
8.2	Small firms' share in Japanese research and development—manufacturing industry	225
