<i>List of illustrations</i>	ix
<i>Foreword</i>	xviii
<i>Preface</i>	xix
<i>Acknowledgements</i>	xxii
SECTION I	
Frameworks for practice	1
1 Normal development	3
2 Influences on problem development	34
3 Classification, epidemiology and treatment effectiveness	65
4 The consultation process and intake interviews	88
5 Report writing	140
SECTION II	
Problems of infancy and early childhood	169
6 Sleep problems	171
7 Toileting problems	200
8 Learning and communication difficulties	229
9 Autism and pervasive developmental disorders	289
SECTION III	
Problems of middle childhood	313
10 Conduct problems	315

viii	<i>Contents</i>	
11	Attention and overactivity problems	368
12	Fear and anxiety problems	403
13	Repetition problems	469
14	Somatic problems	501
SECTION IV		
	Problems in adolescence	575
15	Drug abuse	577
16	Mood problems	621
17	Anorexia and bulimia nervosa	675
18	Schizophrenia	706
SECTION V		
	Child abuse	749
19	Physical abuse	751
20	Emotional abuse and neglect	782
21	Sexual abuse	806
SECTION VI		
	Adjustment to major life transitions	857
22	Foster care	859
23	Separation and divorce	880
24	Grief and bereavement	911
	<i>Bibliography</i>	942
	<i>Index</i>	995

Illustrations

Figures

1.1	Well-being and strains across the family lifecycle	7
2.1	Predisposing, precipitating, maintaining and protective factors to consider in psychological problems of children and adolescents	36
2.2	Patterns of parenting	46
2.3	Modifying effect of parental support on the psychological distress of children who receive regular, occasional and no corporal punishment	47
2.4	Marital satisfaction across the lifespan	49
4.1	Stages of the consultation process	89
4.2	Intake information form	92
4.3	Genogram symbols	99
4.4	The Boyle genogram completed in 1994	104
4.5	Child-centred assessment: example of a genogram, lifeline and indicators of emotional climate used in a child-centred assessment	105
4.6	Process of recursive reformulation	112
4.7	Karpman's triangle	116
5.1	Example of progress notes from an assessment session	142
5.2	Example of progress notes from a treatment session	143
5.3	Example of a comprehensive assessment report	146
5.4	Example of an end-of-episode case summary	150
5.5	Example of a letter to a referring agent	153
5.6	Example of a letter to a client	154
5.7	Relationships between various types of report arising out of psychological consultations	158
5.8	Clinic audit form	161
5.9	Client audit form	162
5.10	Referrer audit form	163
6.1	Typical sleep requirements in childhood	173
6.2	Classification of sleep disorders in DSM IV	175

6.3	Classification of sleep disorders in ICD-10	176
6.4	Factors to consider in childhood sleep problems	184
6.5	Sleep diary	186
6.6	Child's start chart for sleep problems	193
7.1	Prevalence of wetting and soiling from birth to adolescence	206
7.2	Parent recording chart for monitoring changes in soiling and/or wetting	211
7.3	Parent recording chart for monitoring diet, fluids, exercise and laxative use	212
7.4	Factors to consider in enuresis	214
7.5	Factors to consider in encopresis	216
7.6	Child's star chart for enuresis and encopresis	221
8.1	Classification of disorders of learning and communication in DSM IV	230
8.2	Classification of disorders of learning and communication in ICD-10	231
8.3	Example of a report on a case of specific reading disorder (or dyslexia)	253
8.4	Abilities assessed by subtests of the WISC-III	266
8.5	Factors to consider in adjustment problems in cases of traumatic brain injury	274
9.1	Classification of pervasive developmental disorders in DSM IV	292
9.2	Classification of pervasive developmental disorders in ICD-10	292
10.1	Classification of disruptive behaviour disorders in DSM IV	320
10.2	Classification of disruptive behaviour disorders in ICD-10	320
10.3	Factors to consider in childhood conduct problems	338
10.4	Three-column chart for monitoring antecedents and consequences of positive and negative target behaviours	351
10.5	Child's star chart for conduct problems	352
10.6	Monitoring chart for time out	353
10.7	Points chart for an adolescent	354
10.8	Adolescents' privileges and fines	355
10.9	Daily report card	356
11.1	Factors to consider in attention deficit hyperactivity disorder (ADHD)	386
12.1	Classification of disorders where anxiety is a major feature in DMS IV	406
12.2	Classification of disorders where anxiety is a major feature in ICD-10	407
12.3	Factors to consider in childhood anxiety problems	437
12.4	Form for tracking fear	444
12.5	Relaxation exercises handout for parents and youngsters	446

12.6	Factors to consider in school refusal (SR)	453
13.1	Classification of disorders where repetition is a central feature in DSM IV	469
13.2	Classification of disorders where repetition is a central feature in ICD-10	470
13.3	Self-monitoring form for obsessive-compulsive disorder (OCD)	480
13.4	Factors to consider in obsessive-compulsive disorder	482
13.5	Form for assessing antecedents and consequences of tics throughout the day	494
13.6	Form for assessing the number of tics in a single time slot over a week	495
14.1	Classification of psychological conditions with predominantly physiological symptoms in DSM IV	504
14.2	Classification of psychological conditions with predominantly physiological symptoms in ICD-10	505
14.3	Psychological and physiological dimensions along which the aetiology and symptomatology of typical paediatric presentations fall	506
14.4	Factors to consider in somatic complaints	518
14.5	Diary for recording pain	527
14.6	Self-monitoring system for physical illnesses	528
14.7	Child's star chart for somatic complaints	530
14.8	Factors to consider in headaches	541
15.1	The 12 steps of AA	595
15.2	Factors to consider in adolescent drug abuse	606
16.1	Classification of disorders where mood is a major feature in DSM IV	627
16.2	Classification of disorders where mood is a major feature in ICD-10	628
16.3	Factors to consider in depression	646
16.4	A model of depression for psychoeducation	653
16.5	Self-monitoring form for depression	656
16.6	Factors to consider in suicide risk	665
17.1	Factors to consider in eating disorders	692
18.1	Classification of schizophrenia and other psychotic disorders in DSM IV	711
18.2	Classification of schizophrenia and other psychotic disorders in ICD-10	712
18.3	A diathesis–stress model of schizophrenia	725
18.4	Factors to consider in schizophrenia	729
18.5	Psychoeducational notes where a family member has a diagnosis of schizophrenia	737
19.1	A model of the sequence of events leading to an abusive act	758

19.2	Factors to consider in physical child abuse	760
19.3	Checklist of four conditions that predict positive treatment response in families where child abuse has occurred	769
20.1	Four feeding patterns associated with non-organic failure to thrive (NOFT)	789
20.2	Factors to consider in neglect, emotional abuse and related problems	794
21.1	A model of patterns of interaction in which repeated sexual abuse may be embedded	811
21.2	Factors to consider in child sexual abuse	814
21.3	A flow chart for taking action following an allegation of child sexual abuse	823
22.1	A co-operative foster-care system	871
22.2	A conflictual foster-care system	871
23.1	Factors to consider in parental post-separation adjustment and parenting abilities	887
23.2	Factors to consider in children's adjustment following separation or divorce	890
24.1	Factors to consider in children's grief reactions	926

Tables

1.1	Stages of the family lifecycle	5
1.2	Development of motor and sensory skills	9
1.3	Newman's revision of Erikson's psychosocial stage model	25
2.1	Defence mechanisms at different levels of maturity	41
2.2	Functional and dysfunctional, problem- and emotion-focused coping strategies	43
3.1	Multiaxial classification systems DSM IV and ICD-10	68
3.2	Reliability of diagnoses of four childhood psychological disorders	70
3.3	Co-morbidity in community populations for four major DSM diagnostic categories	71
3.4	Co-morbidity in community and clinic populations for four major syndromes on child- and parent-completed versions of Achenbach's Behaviour Checklist	73
3.5	Internalising, externalising and mixed syndromes assessed by the Child Behaviour Checklist and related instruments	75
3.6	Broad problem areas in clinical child psychology	79
3.7	Prevalence of childhood psychological disorder as assessed by Rutter's teacher's questionnaire in a series of international studies	80
3.8	Prevalence of conduct and emotional disorders in boys and girls in early, middle and late teens	81
3.9	Factors influencing the outcome of psychological treatment of children	82

3.10	Structured interviews for assessing psychological symptomatology in children	86
4.1	Psychometric instruments for assessing child and family problems	108
4.2	Guidelines for listening and communications skills	126
4.3	Guidelines for problem-solving skills	127
4.4	Guidelines for supportive play	129
4.5	Guidelines for reward systems	130
4.6	Guidelines for behaviour-control programmes	131
6.1	Diagnostic criteria for dyssomnias in DSM IV and ICD-10	177
6.2	Diagnostic criteria for parasomnias in DSM IV and ICD-10	179
6.3	Psychometric instruments for assessing children's sleeping and eating problems	187
7.1	Diagnostic criteria for elimination disorders in DSM IV and ICD-10	204
7.2	Theories and treatments of elimination disorders	207
7.3	Psychometric instruments for assessing enuresis	213
8.1	Diagnostic criteria for intellectual disability in DSM IV, ICD-10 and AAMR	234
8.2	Psychometric instruments for assessing intelligence and general cognitive abilities	236
8.3	Psychometric instruments for assessing adaptive behaviour	238
8.4	Psychometric instruments for assessing motor and sensory impairments	239
8.5	Diagnostic criteria for developmental language delay in DSM IV and ICD-10	246
8.6	Psychometric instruments for assessing language problems	250
8.7	Diagnostic criteria for specific learning disabilities in DSM IV and ICD-10	259
8.8	Psychometric instruments for assessing attainment and specific learning disabilities	262
8.9	A procedure for interpreting the WISC-III	264
8.10	Diagnostic criteria for learning disorders caused by head injury in DSM IV and ICD-10	270
9.1	Diagnostic criteria for autism in DSM IV and ICD-10	294
9.2	Clinical features of autism	296
9.3	Theories of autism	297
9.4	Psychometric instruments for assessing autism	302
9.5	Behavioural treatment strategies for managing problems presented by children with autism	308
10.1	Outcome for adults identified as conduct disordered during childhood or adolescence compared with control groups	315
10.2	Diagnostic criteria for oppositional defiant disorder in DSM IV, ICD-10 and Achenbach's Child Behaviour Checklist system	322

10.3	Diagnostic criteria for conduct disorder in DSM IV, ICD-10 and Achenbach's Child Behaviour Checklist system	323
10.4	Clinical features of disorders of conduct	325
10.5	Theories and treatments of conduct disorder	327
10.6	Psychometric instruments for assessing conduct	337
11.1	Diagnostic criteria for attention and hyperactivity syndromes in DSM IV, ICD-10 and Achenbach's Child Behaviour Checklist system	371
11.2	Clinical features of attention deficit hyperactivity disorder (ADHD)	373
11.3	Theories and treatments of attention deficit hyperactivity disorder (ADHD)	378
11.4	Psychometric instruments for assessing attention deficit hyperactivity disorder (ADHD)	384
12.1	Fears at different ages	404
12.2	Diagnostic criteria for separation anxiety disorder in DSM IV and ICD-10	412
12.3	Diagnostic criteria for phobias in DSM IV and ICD-10	414
12.4	Diagnostic criteria for generalised anxiety in DSM IV and ICD-10	418
12.5	Diagnostic criteria for panic disorder and agoraphobia in DSM IV and ICD-10	421
12.6	Diagnostic criteria for post-traumatic stress disorder (PTSD) in DSM IV and ICD-10	425
12.7	Clinical features of anxiety in children	428
12.8	Theories and treatments of anxiety	430
12.9	Psychometric instruments for assessing anxiety	435
13.1	Diagnostic criteria for obsessive-compulsive disorder (OCD) in DSM IV and ICD-10	473
13.2	Theories and treatments of obsessive-compulsive disorder (OCD)	474
13.3	Psychometric instruments for assessing obsessive-compulsive disorder (OCD)	481
13.4	Diagnostic criteria for Tourette's syndrome in DSM IV and ICD-10	491
13.5	Psychometric instruments for assessing Tourette's syndrome	493
14.1	Prevalence of most common illnesses in children aged 0–10 in the USA, 1980	506
14.2	Theories and treatments of somatisation problems, conversion problems and problems of adjustment to illness	508
14.3	Psychometric instruments for assessing somatic complaints	534
15.1	Diagnostic criteria for drug abuse and dependence in DSM IV and ICD-10	581
15.2	Clinical conditions arising from the effects of drug abuse in DSM IV and ICD-10	583

15.3	Intoxication and withdrawal syndromes for substances in DSM IV	584
15.4	Clinical features of drug abuse	587
15.5	Theories and treatments of drug abuse	591
15.6	Psychometric instruments for assessing drug abuse	608
16.1	Diagnostic criteria for depression in DSM IV, ICS-10 and Achenbach	625
16.2	Clinical features of depression	630
16.3	Theories and treatments of depression	633
16.4	Psychometric instruments for assessing depression	645
17.1	Diagnostic criteria for anorexia nervosa in DSM IV, ICD-10 and Lask and Bryant-Waugh	679
17.2	Diagnostic criteria for bulimia nervosa in DSM IV and ICD-10	680
17.3	Clinical features of eating disorders	681
17.4	Theories and treatments of eating disorders	683
17.5	Psychometric instruments for assessing eating disorders	691
18.1	Diagnostic criteria for schizophrenia in DSM IV and ICD-10	709
18.2	Clinical features of schizophrenia	714
18.3	Theories and treatments of schizophrenia	716
18.4	Psychometric instruments for assessing psychosis and related constructs	727
18.5	Positive and negative coping strategies used to manage psychotic symptoms	744
19.1	Checklist of items that raise suspicion of physical child abuse	756
19.2	Components of a comprehensive child-protection assessment package for use in cases of physical child abuse	767
19.3	Specific goals that may be targets for specific interventions in cases of child abuse and neglect	770
20.1	Clinical features of neglect and emotional abuse	785
20.2	Clinical features of non-organic failure to thrive (NOFT) and psychosocial dwarfism	788
20.3	Diagnostic criteria for reactive attachment disorder of infancy or early childhood in DSM IV and ICD-10	791
20.4	Psychometric instruments for assessing physical child abuse and neglect	796
20.5	Components of a comprehensive child-protection assessment package for cases of neglect or emotional abuse	801
21.1	A framework of factors indicative of child sexual abuse	825
21.2	Components of a comprehensive child-protection assessment package for use in cases of child sexual abuse	828
21.3	Psychometric instruments for assessing child sexual abuse	832
23.1	Extra stages in the family lifecycle entailed by separation or divorce and remarriage	893
23.2	Psychometric instruments for assessing separation or divorce	896

23.3	Areas requiring assessment for custody evaluation	904
23.4	Criteria for deciding for or against joint custody	905
23.5	Criteria for deciding for or against custody as being in the best interests of the child	906
24.1	Behavioural expressions of themes underlying children's grief processes following bereavement or facing terminal illness that may lead to referral	918
24.2	Theories of grief	923
24.3	Psychometric instruments for assessing grief and related constructs	933

Boxes

4.1	A framework for planning the agenda for assessment interviews	102
5.1	A framework for writing a case study	157
6.1	A case of a child with a sleep problem	172
7.1	A case of enuresis	201
7.2	A case of encopresis	202
8.1	A case of intellectual disability	233
8.2	A case of developmental language delay	244
8.3	A case of traumatic brain injury	269
9.1	A case of autism: Tom and the light box	290
10.1	A case of conduct disorder: Bill, the boy on the roof	317
11.1	A case of ADHD: Timmy, the motorboat	369
12.1	A case of separation anxiety and school refusal	410
12.2	A case of a specific phobia	413
12.3	A case of generalised anxiety disorder	416
12.4	A case of panic disorder with agoraphobia	419
12.5	A case of post-traumatic stress disorder (PTSD)	423
13.1	A case of obsessive-compulsive disorder (OCD)	471
13.2	A case of Tourette's syndrome	490
14.1	A case of recurrent abdominal pain	532
14.2	A case of severe migraine	540
14.3	A case of conversion symptoms	546
14.4	A case of asthma	555
14.5	A case of poorly controlled diabetes	565
15.1	A case of polysubstance abuse	578
15.2	A case of early drug experimentation	579
16.1	A case of adolescent depression	622
17.1	A case of anorexia nervosa	676
18.1	A case of schizophrenia: Julian, the boy who walked east	707
19.1	A case of physical child abuse	752
20.1	A case of neglect, non-organic failure to thrive (NOFT) and inhibited reactive attachment	783
21.1	A case of intrafamilial sexual abuse	807

21.2	A case of extrafamilial abuse	809
22.1	A case of foster care: the Rogers	860
23.1	A case of adjustment problems following separation	881
24.1	A case of bereavement	912
