

CONTENTS

Editor's Introduction viii

by Michael S. Lewis-Beck

Part I: Introduction to Factor Analysis: What It Is and How to Do It

by Jae-On Kim and Charles W. Mueller

1. Introduction 1
2. Logical Foundations of Factor Analysis 6
3. Obtaining Factor Analysis Solutions 40
- Note 64
- Questions Pertaining to Books, Journals, and
 Computer Programs 65
- References 65
- Glossary 69

Part II: Factor Analysis: Statistical Methods and Practical Issues

by Jae-On Kim and Charles W. Mueller

1. Introduction 75
2. Methods of Extracting Initial Factors 80
3. Methods of Rotation 97
4. Number of Factors Problem Revisited 109
5. Introduction to Confirmatory Factor Analysis 114
6. Construction of Factor Scales 128
7. Brief Answers to Questions Frequently Asked 141
- References 146
- Glossary 150

Part III: Principal Components Analysis

by George H. Dunteman

1. Introduction	157
2. Basic Concepts of Principal Components Analysis	165
3. Geometrical Properties of Principal Components	173
4. Decomposition Properties of the Principal Components	192
5. Principal Components of Patterned Correlation Matrices	195
6. Rotation of Principal Components	198
7. Using Principal Components to Select a Subset of Variables	200
8. Principal Components Versus Factor Analysis	205
9. Uses of Principal Components in Regression Analysis	215
10. Using Principal Components to Detect Outlying and Influential Observations	225
11. Use of Principal Components in Cluster Analysis	228
12. Use of Principal Components Analysis in Conjunction with Other Multivariate Analysis Procedures	230
13. Other Techniques Related to Principal Components	237
14. Summary and Conclusions	242
References	244

Part IV: Confirmatory Factor Analysis:

A Preface to LISREL

by J. Scott Long

Notation	247
Preface	249
1. Introduction	251
2. Specification of the Confirmatory Factor Model	258
3. Identification of the Confirmatory Factor Model	274
4. Estimation of the Confirmatory Factor Model	296
5. Assessment of Fit in the Confirmatory Factor Model	301
6. Conclusions	319
Appendix I: Correlations and Standard Deviations from Wheaton/Hennepin Sample	322
Appendix II: Software to Estimate the Confirmatory Factor Model (CFM)	322
Notes	323
References	326

**Part V: Covariance Structure Models:
An Introduction to LISREL**

by J. Scott Long

Notation 329

Preface 331

1. Introduction 333

2. The Measurement Model 341

3. The Structural Equation Model 347

4. The Covariance Structure Model 377

5. Conclusion 405

Appendix: Covariance/Correlation Matrices for Examples
408
