ABOUT THE AUTHOR	xv
PREFACE	xvii
ACKNOWLEDGMENTS	xix
INTRODUCTION	xxi

PART ONE

TODAY'S MODELS AND THEIR ROLE IN APPLICATION DEVELOPMENT 1

1

MODELS, REPOSITORIES, AND CASE: PUTTING THEM IN PERSPECTIVE 1

CASE Defined	2
The Original Intentions of CASE	2
The Original Intentions of CASE-Based Models	3
Barriers to CASE Modeling Success	4
The Limited Effect of Good Models	9
The Role of a Repository	11

2

GOOD CASE ENVIRONMENTS 13

Good CASE-Based Application Development	13
The Available Tool Set	13

The Right Tool for the Right Job	14
Consistent Tool Usage	14
CASE Case Studies	14
Common CASE Benefits	18
Common CASE Deployment Shortcomings	19
Common Misperceptions of CASE "Success"	21
Missing Links: Where Even Good CASE Deployment Falls Short	23

3

EVALUATING TODAY'S MODELS

25

Logical Data Model	28
Process Models	37
Data Flow Diagram	44
Physical Models	45
Tool-Specific Considerations	51
Relating Models to the Coded Application	52
Program Libraries	52
File Descriptions, Database Definitions	53
Production Control	53
Summary	54

4

BUILDING UPON TODAY'S GOOD MODELS

55

What Is Needed for Improved Model Impact?	55
The CASE Role in Application Maintenance	56
Reusing Today's Models	58
What a Good Model Needs to Become Reusable	59
Preparing for Model-Driven Development	62
The Defined Strategic Role of CASE	64
Modeling the Enterprise	65
Planning Models	66
Summary	66

5

MODELS AND FORWARD ENGINEERING

69

CASE-Based Schema Generation	70
CASE-Based Code Generation	77
Is Model-Driven Development Really Here?	77
Case Study 1	82
Case Study 2	82

6

CREATING MODELS FROM CODE

85

CASE-Based Reverse Reengineering	86
Case Study	94

7**SHARING TODAY'S GOOD MODELS****97**

- The Codeveloped Application 97
- How a CASE Model Is Shared Today 99

8**A SUMMARIZED VIEW OF TODAY'S MODELS****105**

- Model Accuracy and Accessibility 106
- The Model as a Mainstream MIS Deliverable 107
- The Model's Role in the Application Life Cycle 110

9**A LOOK AT INTEGRATED CASE****113**

- ICASE vs. CASE 113
- ICASE Advantages 116
- ICASE Shortcomings 117
- Case Study 118

PART TWO**THE MODELING ENVIRONMENT 123****10****THE PEOPLE SIDE OF CASE-BASED MODELING****123**

- Qualifications of the CASE Practitioner 123
- Inspiring the Use of CASE 125
- CASE Model Quality Control 127
- Executive CASE Responsibility 127
- Justifying the CASE Investment 130
- Summary 131

11**THE CURRENT MIS PERSPECTIVE ON MODELING****133**

- The Model's Role in MIS Planning: Short Term vs. Long Term 134
- Aligning MIS Planning with Business Planning 135
- Structure in the Organization: The Effect of Methodology 137
- MIS Cultural Beliefs 139

PART THREE

INTEGRATING TODAY'S MODELS: THE NEED FOR A BRIDGE 141

12

VIEWING MODELS THROUGH THE EYES OF THE TOOL 141

- Why the Deployed Tool Set Is So Important 142
- What Is Meant by *Integration*? 143
- Why a Bridge Between Tools Is Necessary 146
- Why a Bridge Between Tool Components Is Necessary 149
- The Issues Involved in Building Bridges 152

13

CASE METADATA CONSTRUCTS 155

- Metadata Defined 155
- A Real-Life Metadata Analogy 159
- Common Metadata Constructs by Submodel 161
- Where Common Constructs Become Uncommon 166
- Example: A Model Represented in Various Tools 169
- Summary 210

14

THE ATTRIBUTES OF CASE METADATA 211

- Metadata Attributes Defined 211
- Common Metadata Attributes, Uncommon Representations 213
- Uncommon Metadata Attributes 214
- Representing Uncommon Metadata Attributes
(Fudging the Descriptions) 219

15

VERTICAL CASE INTEGRATION 223

- Vertical Integration Defined 223
- Model Access Within a Single Vendor's Vertical Tool Set 225
- Model Access/Transfer Across Multiple Vendor Tools 228
- Examples 231

16

HORIZONTAL CASE INTEGRATION 235

- Horizontal Integration Defined 235
- The CASE Import/Export Dilemma 238

Sample Model Import/Export Formats	243
Importing Nonexistent Metadata Constructs	251

17

MODEL MANAGEMENT

255

Model Management Defined	255
Multuser Access to Specific Models and Submodels	257
Read/Write Protection	257
Update/Version Management	258
Configuration Management	260
Backup/Restore	260
Summary	262

PART FOUR

THE REPOSITORY AS THE BRIDGE **263**

18

WHAT IS A REPOSITORY?

263

The Dictionary Definition	263
The MIS Definition	264
The IRDS Definition	268
The Definition as Shaped by Other Standards	271
My Definition	271
The Generic Repository Architecture	272

19

A REPOSITORY'S PURPOSE

275

The Integrated Holding Area	275
The Repository Role in Application Development	276
Repositories and CASE	280
Repositories Beyond CASE	280
Examples	282
Summary	286

20

A LOOK AT REPOSITORY STANDARDS

287

CDIF	288
IRDS	293
PCTE	298
ATIS	303
AD/Cycle	304

Standards Unification?	307
Summary	307

21

DISTRIBUTED REPOSITORIES

Mainframe vs. LAN Architectural Differences	309	309
Linked vs. Standalone Repositories	322	
Summary	327	

22

REPOSITORY BENEFITS

Application Development Using a Repository	329	329
--	-----	------------

PART FIVE

REPOSITORY IMPLEMENTATION 337

23

GETTING THERE (IMPLEMENTING A REPOSITORY): STEP 1 337

Are You Ready? (Assessing the Current Environment)	337	
Case Studies	340	
Summary	344	

24

GETTING THERE: STEP 2

Defining the Repository's Scope	345	345
Repository/Tools Architecture	348	
Tool Selection	349	
Detailed Implementation Plan Requirements	352	
Case Studies	355	
Summary	358	

25

ESTABLISHING AND POPULATING THE REPOSITORY

The Repository Metamodel (the Meta-Metamodel)	359	359
A Real-Life Metamodel	365	
Establishing <i>Your</i> Metamodels	367	
Model Metadata Mapping and Consolidation	369	
Examples	372	
Data vs. Metadata	374	
Populating the Repository	375	

Case Studies 377
 Summary 381

26

MODEL INTEGRATION

383

Model vs. Project 384
 Integration Within Models 386
 Integration Between Models 387
 Eliminating Redundancy 392
 Examples 393
 Case Study 394
 Summary 396

27

PUTTING THE REPOSITORY TO USE

397

Repository Access Reasons 397
 Repository Policies 398
 Repository Administration 404
 Incorporating the Repository into Your Application Development
 Environment 406
 Case Studies 408

28

SPECIAL CONSIDERATIONS FOR DISTRIBUTED REPOSITORY IMPLEMENTATION

413

The Importance of the Repository Architecture 413
 Distributing the Repository Metamodel 415
 Tying the Architecture to the Contents 417
 Redundant vs. Nonredundant Distributed Repository Contents 418
 Application vs. Enterprise Views 420
 Distributed Repository Functions 421
 Distributed Repository Access Considerations 422
 Distributed Repositories in the Non-MIS World 423
 Summary 424

29

THE TIME HAS COME

425

Current Tasks to Ensure an Organization's Repository Readiness 425
 Short-Term Repository Objectives 426
 Long-Term Repository-Based Development Goals 427
 Business Strategy/MIS Collaboration 427
 The Future Direction of Repositories and Their Deployment 428
