|---|-----------|
| Preface to the Second Edition | v |
| Preface to the First Edition | vii |
| Acknowledgments | ix |
| Contributors | xvii |
| 1 Physiological Optics | 1 |
| Peter F. Sharp and Russell Philips | |
| 1.1 Introduction | 1 |
| 1.2 Optical Anatomy of the Eye | 1 |
| 1.3 Aberrations of the Eye | 3 |
| 1.3.1 Spherical Aberration | 3 |
| 1.3.2 Chromatic Aberration | 4 |
| 1.3.3 Oblique Astigmatism and Coma | 4 |
| 1.3.4 Curvature of Field | 4 |
| 1.4 The Visual Pathways | 4 |
| 1.4.1 Photoreceptors | 4 |
| 1.4.2 Bipolar, Ganglion, Horizontal, and Amacrine Cells | 5 |
| 1.4.3 Lateral Geniculate Nucleus | 12 |
| 1.4.4 Primary Visual Cortex | 13 |
| 1.5 Mechanisms of Viewing | 19 |
| 1.6 Color Vision | 22 |
| 1.7 Physical Performance of the Visual System | 24 |
| 1.7.1 Spectral Sensitivity | 24 |
| 1.7.2 Incremental Brightness Sensitivity | 24 |
| 1.7.3 Spatial Response | 25 |
| 1.7.4 Temporal Response | 25 |
| 1.7.5 Dynamic Range | 26 |
| 1.8 Information Transfer Rates | 27 |
| 1.9 References | 30 |
| 2 Detection of Vision Information | 33 |
| Charles A. Kelsey | |
| 2.1 Introduction | 33 |
| 2.2 Early Theories of Vision | 33 |
| 2.2.1 The Evil Eye | 34 |
| 2.3 Simple Experiments | 35 |
| 2.3.1 Inverted Image on the Retina | 35 |
| 2.3.2 Blind Spot | 36 |

| | | |
|-------|---|----|
| 2.3.3 | Horizontal and Vertical Detectors | 37 |
| 2.3.4 | Mach Bands | 38 |
| 2.3.5 | The Craik, Cornsweet, O'Brien Illusion | 38 |
| 2.3.6 | Herman Hering Grid | 39 |
| 2.3.7 | The Moon Illusion | 40 |
| 2.4 | Adaptation and After Images | 42 |
| 2.4.1 | Stimulus and Sensation | 44 |
| 2.5 | Three-Dimensional Vision | 44 |
| 2.6 | Stereoscopic Viewing | 45 |
| 2.7 | Cross-Eyed Technique of Three-Dimensional Viewing | 47 |
| 2.8 | Models of the Visual System | 47 |
| 2.8.1 | Feature Detection | 47 |
| 2.8.2 | The Bottom-Up and Top-Down Models | 49 |
| 2.8.3 | Ideal Observer Studies | 49 |
| 2.8.4 | Computational Models | 50 |
| 2.8.5 | Preattentive and Attentive Processing Textons | 51 |
| 2.9 | References | 53 |

3 Quantification of Visual Capability 57

Arthur P. Ginsburg and William R. Hendee

| | | |
|-------|--|----|
| 3.1 | Introduction | 57 |
| 3.2 | Visual Acuity | 57 |
| 3.3 | Contrast Sensitivity | 60 |
| 3.4 | Visual Physiology | 60 |
| 3.5 | Visual Filtering | 61 |
| 3.5.1 | Sine-Wave Gratings | 61 |
| 3.5.2 | Contrast Sensitivity Function | 63 |
| 3.5.3 | Channel Filter Images | 64 |
| 3.6 | Causes of Vision Loss | 67 |
| 3.7 | Detection and Identification of Visual Signals | 67 |
| 3.7.1 | Measuring Contrast Sensitivity | 69 |
| 3.7.2 | Sine-Wave Grating and Low Contrast Letter Charts | 71 |
| 3.7.3 | Test Modalities for Contrast Sensitivity | 78 |
| 3.7.4 | Interpreting Contrast Sensitivity: EyeView | 79 |
| 3.7.5 | Glare Testing | 81 |
| 3.7.6 | Applications to Imaging | 82 |
| 3.8 | Conclusions | 83 |
| 3.9 | References | 83 |

4 A Multiscale Geometric Model of Human Vision 87

Bart M. Ter Haar Romeny and Luc Florack

| | | |
|-----|--|-----|
| 4.1 | Introduction | 87 |
| 4.2 | Scale-Space | 90 |
| 4.3 | Scaled Differential Operators | 96 |
| 4.4 | Image Structure | 98 |
| 4.5 | Description of the Early Vision System | 99 |
| 4.6 | Differential Invariants | 103 |
| 4.7 | Applications | 115 |
| 4.8 | Discussion | 120 |
| 4.9 | References | 124 |

| | | |
|----------|---|------------|
| 5 | Human Response to Visual Stimuli | 127 |
| | Alastair G. Gale | |
| 5.1 | Introduction | 127 |
| 5.2 | Measuring Human Responses | 127 |
| | 5.2.1 Low Intensity Signals | 127 |
| | 5.2.2 Intense Stimuli | 129 |
| 5.3 | Complex Stimuli | 130 |
| | 5.3.1 Selective Visual Attention | 130 |
| | 5.3.2 Visual Scanning | 131 |
| | 5.3.3 Matching Image and Observer Characteristics | 133 |
| | 5.3.4 Focal Attention and Observer Factors | 134 |
| | 5.3.5 Individual Differences | 140 |
| | 5.3.6 Improving diagnostic accuracy | 140 |
| 5.4 | References | 141 |
| 6 | Cognitive Interpretation of Visual Signals | 149 |
| | William R. Hendee | |
| 6.1 | Early Views of Cognition | 149 |
| 6.2 | Western Philosophical Speculations on Cognition | 150 |
| 6.3 | Visual Texture Discrimination | 154 |
| 6.4 | Illusions | 158 |
| | 6.4.1 Ambiguities | 159 |
| | 6.4.2 Distortions | 160 |
| | 6.4.3 Paradoxes | 161 |
| | 6.4.4 Fictions | 162 |
| | 6.4.5 Summary | 163 |
| 6.5 | Color Vision | 163 |
| 6.6 | References | 173 |
| 7 | Visual Data Formatting | 177 |
| | Ulrich Raff | |
| 7.1 | Introduction | 177 |
| 7.2 | Brightness, Contrast, and Details | 179 |
| 7.3 | Texture Discrimination and Edge Detection | 187 |
| 7.4 | Medical Imaging and Information | 208 |
| 7.5 | Visual Information and Communication | 212 |
| 7.6 | Conclusions | 217 |
| 7.7 | References | 218 |
| 8 | Image Manipulation | 223 |
| | Ronald R. Price | |
| 8.1 | Introduction: The Digital Image | 223 |
| 8.2 | Interpolation | 224 |
| 8.3 | Gray-Level Manipulation | 225 |
| 8.4 | Filtering | 228 |
| 8.5 | Geometric Processing and Image Co-Registration | 238 |
| 8.6 | Image Subtraction | 241 |
| 8.7 | Segmentation | 242 |
| 8.8 | Maximum Intensity Projection | 246 |
| 8.9 | Conclusion | 248 |
| 8.10 | References | 248 |

| | | |
|-----------|---|------------|
| 9 | Physical and Psychophysical Measurement of Images | 251 |
| | Kevin S. Berbaum, Donald D. Dorfman, and Mark Madsen | |
| 9.1 | Introduction | 251 |
| 9.2 | Physical Measurements of Image Quality | 254 |
| 9.2.1 | Image Formation | 255 |
| 9.2.2 | Spatial Resolution | 257 |
| 9.2.3 | Noise | 258 |
| 9.2.4 | Signal-to-Noise Ratio | 260 |
| 9.3 | Limitations of Physical Analysis | 266 |
| 9.4 | Measuring Observer Performance: Basic Principles of ROC analysis | 269 |
| 9.5 | General Issues Regarding the Use of ROC Methods in Medical Imaging Research | 277 |
| 9.5.1 | Diagnostic Truth | 277 |
| 9.5.2 | Sampling | 278 |
| 9.5.3 | Statistical Precision and Power | 279 |
| 9.5.4 | Absolute versus Relative Performance | 280 |
| 9.5.5 | AFROC and FFE Analysis | 280 |
| 9.5.6 | Detection Methodology Applied to a Classification Problem | 282 |
| 9.6 | Statistical Issues in ROC Analysis | 284 |
| 9.6.1 | Fitting Individual ROC Curves | 286 |
| 9.7 | References | 287 |
| 10 | Computer Vision and Decision Support | 297 |
| | Henry A. Swett, Maryellen L. Giger, and Kunio Doi | |
| 10.1 | Introduction | 297 |
| 10.2 | Computer Vision | 298 |
| 10.2.1 | Image Processing | 299 |
| 10.2.2 | Image Segmentation | 301 |
| 10.2.3 | Feature Analysis | 301 |
| 10.3 | Computer Vision Examples | 303 |
| 10.3.1 | Mammography | 303 |
| 10.3.2 | Chest Radiography | 310 |
| 10.4 | Decision Support | 320 |
| 10.4.1 | Clinical Algorithms | 321 |
| 10.4.2 | Mathematical and Casual Models of Physical Processes | 322 |
| 10.4.3 | Statistical Pattern-Matching Techniques | 322 |
| 10.4.4 | Decision Theory | 323 |
| 10.4.5 | Connectionism | 323 |
| 10.4.6 | Symbolic Reasoning and Expert Systems | 323 |
| 10.4.7 | Critiquing Systems | 325 |
| 10.4.8 | Knowledge Filters | 326 |
| 10.5 | A Decision Support Example: Mammography | 326 |
| 10.6 | Combining Decision Support and Computer Vision | 331 |
| 10.7 | References | 333 |
| 11 | Architecture and Ergonomics of Imaging Workstations | 343 |
| | Paul S. Cho and H.K. Huang | |
| 11.1 | Architecture of Imaging Workstation | 343 |
| 11.1.1 | Image Processing Hardware | 343 |
| 11.1.2 | Display Monitor | 345 |
| 11.1.3 | Image Storage Devices | 350 |
| 11.2 | Examples of Imaging Workstation | 351 |
| 11.2.1 | Diagnostic Workstation | 352 |

| | | |
|-----------|---|------------|
| 11.2.2 | Review Workstation | 352 |
| 11.2.3 | Analysis Workstation | 353 |
| 11.2.4 | Digitizing and Printing Workstation | 353 |
| 11.2.5 | Interactive Teaching Workstation | 354 |
| 11.2.6 | Editorial and Research Workstation | 354 |
| 11.3 | Ergonomics of Imaging Workstation | 355 |
| 11.3.1 | Glare | 355 |
| 11.3.2 | Ambient Illuminance | 357 |
| 11.3.3 | User Interface | 357 |
| 11.3.4 | Multiple Display | 358 |
| 11.4 | References | 358 |
| 12 | Virtual Reality and Augmented Reality in Medicine | 361 |
| | David Hawkes | |
| 12.1 | Introduction | 361 |
| 12.1.1 | Virtual Reality | 362 |
| 12.1.2 | Augmented Reality | 362 |
| 12.1.3 | Tele-Presence | 363 |
| 12.1.4 | Real Time | 363 |
| 12.2 | Medical Applications of VR Technology | 364 |
| 12.2.1 | Teaching | 364 |
| 12.2.2 | Surgical Simulation and Training | 365 |
| 12.2.3 | Planning and Simulation of a Specific Procedure | 365 |
| 12.2.4 | Image-Guided Surgery | 366 |
| 12.2.5 | Remote Manipulation, Tele-Surgery, and Mentoring | 366 |
| 12.2.6 | Remote Consultation and Rehabilitation | 367 |
| 12.3 | Augmented Reality in Image-Guided Surgery | 367 |
| 12.3.1 | Three-Dimensional Medical Imaging | 367 |
| 12.3.2 | Applications in Skull Base Surgery and Neurosurgery | 373 |
| 12.3.3 | Visual Perception in Augmented Reality | 379 |
| 12.4 | Conclusions and Future Work | 384 |
| 12.5 | References | 385 |
| 13 | Problems and Prospects in the Perception of Visual Information | 391 |
| | Peter N. T. Wells | |
| 13.1 | Aspects of Visual Perception | 391 |
| 13.1.1 | Physiological Optics | 391 |
| 13.1.2 | Detection of Visual Information | 392 |
| 13.1.3 | Interpretation of Visual Images | 392 |
| 13.1.4 | A Multiscale Geometric Model of Human Vision | 392 |
| 13.1.5 | Human Response to Visual Stimuli | 393 |
| 13.1.6 | Cognitive Interpretation of Visual Signals | 394 |
| 13.1.7 | Visual Data Formatting | 394 |
| 13.1.8 | Image Manipulation | 395 |
| 13.1.9 | Physical and Psychophysical Measurement of Images | 396 |
| 13.1.10 | Computer Vision and Decision Support | 397 |
| 13.1.11 | Architecture and Ergonomics of Image Workstations | 397 |
| 13.1.12 | Virtual Reality and Augmented Reality in Medicine | 398 |
| 13.2 | Conclusions | 398 |
| 13.3 | References | 399 |
| | Index | 401 |
