

# Contents

Preface	ix
Acknowledgments	xiii
<b>1. Introduction to the Biology of Communication: Toward the Development of Scientific Theories of Communication</b>	<b>1</b>
Geneses of Communibiology	2
The Basic Idea	3
Why “Communibiology?”	4
Psychobiology as a Point of Departure	4
Communibiology as Paradigm Rather Than Religion	6
Issues Readers Can Expect to Confront	8
<b>2. Necessary and Desirable Characteristics of Scientific Theory in Communication</b>	<b>13</b>
An Overview of Scientific Theory	15
Necessary Features of Scientific Theory	17
Criteria for Evaluating Theory	20
Irrelevant Criteria for Evaluating Theory	24
Approaches to Theory	25
Goals of Theoretical Work	26

<b>3. Rationale for a New Paradigm:</b>	
<b>Limitations of Existing Models of Communication</b>	<b>27</b>
Communication as Learned Behavior	28
Communication as Adaptation to Situation	37
The Demise of Radical Environmentalism	41
<b>4. Revisiting Discarded Models of Communication:</b>	
<b>Methodological and Conceptual Oversights Underlying the Rejection of Trait Models</b>	<b>43</b>
Oversights in the Criticism of Trait Models	44
Psychobiology and the Resurgence of Trait Perspectives	54
<b>5. Contributions of Contemporary Temperament</b>	
<b>Theorists and Psychobiologists: A Brief Overview</b>	<b>57</b>
Temperament as Behavioral Pattern	58
Temperament as Personality Profile	62
Temperament as Neurobiological Functioning	65
Conclusion	65
<b>6. Communication as Temperamental Expression:</b>	
<b>Communiology</b>	<b>67</b>
Temperament and Communication	67
A Trait Perspective on Communication	69
Assumptions Leading to Communiology	71
Rationale for Focusing on Temperament	79
A Tentative Conceptualization of Communication	80
<b>7. Dimensions of Communicative Functioning:</b>	
<b>Super Traits</b>	<b>83</b>
Extraversion, Neuroticism, and Psychoticism	85
Alternatives to Eysenck's Big Three	90
Intellectual Competence	91
<b>8. Neurobiological Bases of Communicative Functioning</b>	<b>93</b>
Composition and Structure of the Human Brain	94
Functional Organization of Brain Regions	96
Evolution, Genetics, Neurobiology, and Communiology	104
Summary	105
<b>9. Strategies for Communiological Research</b>	<b>107</b>
Alternative Research Models for Communiological Research	107
Opportunities for Interdisciplinary Research	114

<b>10. Implications for Theory and Research: What Needs Doing and What It All Means</b>	<b>115</b>
Implications for Communication Theory	116
Implications for Communication Research	121
<b>11. Implications of Communiology for Applied Contexts: How Does It Change Our Approach in the “Real World?”</b>	<b>127</b>
Paradigmatic Assumptions	128
The Role of Culture	130
Communication in the “Real World”	130
<b>12. Epilogue</b>	<b>135</b>
