Index of Tables	XX
Index of Figures	XXI
1 Introduction	3
1.1 International Economics as a distinct subject	3
1.2 The pure theory of international trade: an overview	5
References	6
2 The classical (Ricardo-Torrens) theory of comparative costs	7
2.1 Comparative costs (advantages) and international trade	7
2.2 Alternative graphic representations	10
2.3 A modern interpretation in terms of optimization	14
2.3.1 Maximization of real income in each country	14
2.3.2 Maximization of real world income	16
2.4 Generalizations	18
2.4.1 Two goods and $n$ countries	18
2.4.2 $m$ goods and $n$ countries	20
2.5 The problem of the determination of the terms of trade	23
Appendix	24
A.2.1 Maximization of world income and the dual problem	24
A.2.2 Maximization of national income and minimization of real cost	26
A.2.3 On the determination of the terms of trade	28
References	32
3 The neoclassical theory of international trade	33
3.1 The transformation curve and the box diagram	33
3.2 General equilibrium in a simple closed economy	38
3.2.1 The supply curves	38
3.2.2 The demand curves	40
3.2.3 General equilibrium and Walras' law	41
3.3 General equilibrium in open economies and international trade	42
3.4 Marshallian reciprocal demand curves, international equilibrium, and stability	45
3.4.1 Derivation of the offer curve	45
3.4.2 International equilibrium and stability	47
3.5 Increasing returns to scale	52
3.6 The gains from trade	54
3.7 Generalizations	57
Appendix	58
A.3.1 The transformation curve and the box diagram	58
A.3.1.1 A formal derivation of the transformation curve and its properties	58
A.3.1.2 The convexity or concavity of the transformation curve	60

A.3.1.3	Homogeneous production functions and the transformation curve . . .	61
A.3.2	A simple closed economy . . . . .	63
A.3.2.1	The basic model . . . . .	63
A.3.2.2	The supply side of the model . . . . .	64
A.3.2.3	The demand side of the model . . . . .	65
A.3.3	International trade and offer curves . . . . .	66
A.3.3.1	The equilibrium conditions. The offer curve and its slope . . . . .	66
A.3.3.2	Relationships between the various elasticities . . . . .	67
A.3.4	Stability . . . . .	69
A.3.4.1	Terms-of-trade adjustment . . . . .	69
A.3.4.2	Quantity adjustment . . . . .	69
A.3.5	Duality approach . . . . .	71
	References . . . . .	75
4	The Heckscher-Ohlin model . . . . .	76
4.1	Basic assumptions and their meaning . . . . .	76
4.1.1	Relative price of goods and relative price of factors . . . . .	80
4.2	Proof of the fundamental theorem . . . . .	82
4.3	Factor price equalization . . . . .	85
4.3.1	A graphic treatment . . . . .	87
4.4	Extensions and qualifications . . . . .	90
4.4.1	Non-identical structures of demand . . . . .	90
4.4.2	Factor-intensity reversals . . . . .	92
4.5	Leontief's paradox and other empirical studies . . . . .	94
	Appendix . . . . .	98
A.4.1	Factor-intensity reversals . . . . .	98
A.4.2	Proof of the fundamental theorem . . . . .	101
A.4.3	The factor price equalization theorem . . . . .	102
A.4.4	A brief outline of the generalizations of the Heckscher-Ohlin model . . . . .	103
	References . . . . .	106
5	Tariffs, protection, economic integration . . . . .	107
5.1	Introduction . . . . .	107
5.2	Partial equilibrium effects of a tariff . . . . .	107
5.3	The so-called social costs of a tariff . . . . .	109
5.4	General equilibrium effects of a tariff . . . . .	112
5.4.1	The production-possibilities frontier and tariffs. The Stolper-Samuelson theorem . . . . .	112
5.4.2	Tariffs and reciprocal demand curves . . . . .	116
5.4.2.1	The Metzler and Lerner cases . . . . .	118
5.4.3	The optimum tariff . . . . .	120
5.5	Quotas and other non-tariff barriers . . . . .	122
5.5.1	Quotas . . . . .	123
5.5.2	Export duties . . . . .	125
5.5.3	International cartels . . . . .	126
5.5.4	Dumping . . . . .	131
5.5.5	Other impediments to free trade . . . . .	133
5.6	Free trade versus protection and the theory of second best . . . . .	135
5.6.1	The optimum tariff again . . . . .	135
5.6.2	The infant industry . . . . .	135
5.6.3	Distortions in domestic goods markets . . . . .	137
5.6.4	Distortions in domestic factor markets . . . . .	140
5.6.5	Non-economic motives for protection . . . . .	141
5.6.6	The theory of second best . . . . .	142
5.7	Intermediate goods and the effective rate of protection . . . . .	144
5.8	Customs unions and economic integration . . . . .	147

5.8.1	The various degrees of integration . . . . .	147
5.8.2	The effects of a customs union . . . . .	148
5.8.3	Empirical problems . . . . .	153
5.9.	The “new” protectionism . . . . .	154
5.9.1	Introductory remarks . . . . .	154
5.9.2	Voluntary export restraints . . . . .	154
5.9.3	Subsidies . . . . .	156
5.9.4	The political economy of protectionism . . . . .	158
5.9.4.1	The demand and supply of protection . . . . .	158
	Appendix . . . . .	161
A.5.1	General equilibrium effects of a tariff: the Stolper-Samuelson theorem . . . . .	161
A.5.2	Tariffs, terms of trade, domestic relative price . . . . .	161
A.5.3	The optimum tariff . . . . .	164
A.5.4	Cartels; dumping . . . . .	165
A.5.5	The theory of second best . . . . .	167
A.5.6	The effective rate of protection . . . . .	169
A.5.7	Lobbies, political parties and endogenous tariff determination . . . . .	170
	References . . . . .	172
6	International trade and economic growth . . . . .	173
6.1	Introduction . . . . .	173
6.2	The effects of growth on the volume of trade . . . . .	173
6.2.1	Consumption effects . . . . .	174
6.2.2	Production effects . . . . .	175
6.2.3	A reformulation in terms of elasticities; the total effect . . . . .	176
6.3	Growth and terms of trade; immiserizing growth . . . . .	178
6.3.1	The large country and the terms of trade . . . . .	178
6.3.2	Immiserizing growth . . . . .	180
6.4	Increase in factor endowments and international trade: Rybczynski’s theorem . . . . .	181
6.4.1	Rybczynski’s theorem . . . . .	181
6.4.2	An alternative diagram and the effects on the terms of trade . . . . .	183
6.5	Technical progress and international trade . . . . .	185
6.5.1	Types of technical progress . . . . .	185
6.5.2	Effects of neutral technical progress on production levels and on the terms of trade . . . . .	187
6.5.3	Effects of biased technical progress . . . . .	189
6.5.3.1	Capital-saving progress in the capital-intensive sector . . . . .	190
6.5.3.2	Labour-saving progress in the capital-intensive sector . . . . .	191
6.5.4	Conclusion . . . . .	193
6.6	Dynamic models . . . . .	194
6.6.1	A simple closed-economy two-sector growth model . . . . .	195
6.6.2	Extension to an open economy . . . . .	198
	Appendix . . . . .	199
A.6.1	Classification of the effects of growth . . . . .	199
A.6.2	Comparative statics of the effects of growth in general . . . . .	201
A.6.2.1	Immiserizing growth . . . . .	203
A.6.3	Changes in factor endowments, Rybczynski’s theorem, and the terms of trade . . . . .	205
A.6.3.1	Simultaneous increase in both factors . . . . .	208
A.6.4	Technical progress . . . . .	210
A.6.4.1	Effects of technical progress on factor intensities and factor rewards . . . . .	211
A.6.4.2	Effects of technical progress on output levels . . . . .	214
A.6.4.3	Effects of technical progress on the terms of trade . . . . .	216
A.6.5	Dynamic models . . . . .	216

A.6.5.1	A simple model	216
A.6.5.2	Momentary equilibrium	218
A.6.5.3	Long-run equilibrium	220
References		223
7	Some refinements of the orthodox theory	224
7.1	Introduction	224
7.2	Transport costs and international trade	224
7.3	Intermediate goods	228
7.4	Elastic factor supply	231
7.5	Non-traded goods	232
7.6	Natural resources, specific productive factors, "Dutch disease" and de-industrialization	236
7.7	International factor mobility	241
7.8	International trade under uncertainty	245
7.9	Illegal transactions in international trade and the economic theory of smuggling	247
Appendix		251
A.7.1	The cost of transport	251
A.7.2	Intermediate goods	251
A.7.2.1	Final goods as inputs	251
A.7.2.2	Pure intermediate goods	253
A.7.3	Elastic supply of factors	256
A.7.4	Non-traded goods	258
A.7.4.1	The behaviour of the offer curve	259
A.7.5	Specific factors and de-industrialization	261
A.7.5.1	Effects on prices, outputs and factor rewards	263
A.7.6	International factor mobility	264
A.7.7	Uncertainty and international trade	266
A.7.8	Smuggling	269

8	The New Theories of International Trade	272
8.1	Introduction	272
8.2	The precursors	274
8.2.1	Availability	274
8.2.2	Technology gaps	275
8.2.3	The product cycle	276
8.2.4	Income effects	277
8.2.4.1	Linder's theory	277
8.2.4.2	Barker's variety hypothesis	278
8.2.5	Intra-industry trade: early explanations	279
8.3	Neo-Heckscher-Ohlin theories	281
8.4	Monopolistic competition and international trade	283
8.4.1	Introduction	283
8.4.2	A Simple synthesis model	285
8.5	Oligopoly and international trade	288
8.5.1	Introduction	288
8.5.2	Homogeneous commodities	288
8.5.3	Vertically differentiated goods	291
8.5.4	Horizontally differentiated goods	292
Appendix		294
A.8.1	A Neo-Heckscher-Ohlin model	294
A.8.2	A model of monopolistic competition and international trade	298
A.8.2.1	Love for variety and demand	298

A.8.2.2	The production side	301
A.8.2.3	International trade	302
A.8.2.4	Tariffs	303
A.8.3	Homogeneous goods, oligopoly, and trade	304
A.8.4	Vertically differentiated goods, oligopoly, and trade	308
A.8.4.1	Consumers	308
A.8.4.2	Firms, and market equilibrium	309
A.8.4.3	International trade	312
A.8.5	Horizontal differentiation, oligopoly, and trade	313
A.8.5.1	Demand for characteristics	313
A.8.5.2	The production side	313
A.8.5.3	International trade and commercial policy	314
