

Table of Contents

Model-Based Analysis of Neurophysiological Brain Function: Introductory Remarks	
D. Yves von Cramon	1
 Part I Models & Concepts	
 What Can Synergetics Contribute to the Understanding of Brain Functioning?	
Hermann Haken	7
 A Preliminary Physiology of Macro-Neocortical Dynamics and Brain Function	
Paul L. Nunez	41
 Traversing Scales of Brain and Behavioral Organization	
I. Concepts and Experiments	
J.A. Scott Kelso, Armin Fuchs, and Viktor K. Jirsa	73
II. Analysis and Reconstruction	
Armin Fuchs, Viktor K. Jirsa, and J.A. Scott Kelso	90
III. Theoretical Modeling	
Viktor K. Jirsa, J.A. Scott Kelso, and Armin Fuchs	107
 EEG-Detected Episodes of Low-Dimensional Self-Organized Cortical Activity and the Concept of a Brain Attractor	
R. Cerf, E.H. El Ouasdad, and M. El Amri	126

Part II Methods & Applications

Source Modeling	147
Spatio-Temporal Dipole Analysis	
Thomas R. Knösche	150
Distributed Source Models: Standard Solutions and New Developments	
Rolando Grave de Peralta Menendez, and Sara Gonzalez Andino	176
The Spatial Distribution of Spontaneous EEG and MEG	
Jan C. De Munck, and Bob W. Van Dijk	202
Neurophysiological Brain Function and Synchronization Processes	229
Dynamic Topographic Spectral Analysis of Cognitive Processes	
Bärbel Schack	230
Complex Phase Synchronization in Neurophysiological Data	
Peter Tass, Jürgen Kurths, Michael Rosenblum, Jörg Weule, Arkady Pikovsky, Jens Volkmann, Alfons Schnitzler, and Hans-Joachim Freund	252
Spatio-Temporal Modeling Based on Dynamical Systems Theory	
Christian Uhl, and Rudolf Friedrich	274
Subject Index	307
